

Closed-loop recycling

All together better

IN-HOUSE PROCESSES RECLAIM WASTE PVC-U

Continuous recycling eliminates waste

Eurocell has its own post-consumer PVC-U recycling plant in Derbyshire which recycles 22,000+ tonnes of reclaimed PVC-U each year, enabling us to create an endless closed-loop of recycling and re-use for windows and doors. We use recycled material in the manufacture of many of our finished products. In fact, our PVC-U Thermal Inserts and Cavalok cavity closer systems are manufactured entirely from recycled post-consumer PVC-U.

Eurocell also re-uses virtually 100% of its production waste. This amounts to around 3,000 tonnes of recycled PVC-U each year. The result is virtually zero Eurocell manufacturing waste product going to landfill.

Accredited environmental systems and policies

At Eurocell, we continuously strive to improve our own environmental performance and reduce our carbon footprint. Our environmental management systems have achieved the widely recognised ISO14001 accreditation.

Furthermore, our environmental policy commits us to ongoing improvements that will help to reduce carbon emissions from transport and energy use, improve energy efficiency within our business and offer more energy-efficient products to our customers, as well as further reducing waste and promoting recycling in all areas of our business.

Did you know?

PVC-U can be recycled up to 10 times without any degradation in quality. This means that a piece of PVC-U can be used for up to 350 years!
