Canopies, walkways & sustainable buildings

Garden Centres

Our Service to you

At Fordingbridge we are committed to helping you maximise your sites' potential by creating inspiring environments with a range of canopies, walkways and sustainable buildings.

Timber Canopies

As a construction material, timber radiates warmth and a feeling of comfort. This material has the ability to seamlessly nestle into your natural environment.

Fordingbridge utilise the modern timber product of glulamated timber (glulam). Sustainably sourced, glulam is an exciting material for structural tasks that allows for highly innovative designs.

Steel Canopies

Our steel structures are manufactured at our factory in West Sussex. We have an extensive range of steel canopy styles including our popular trellis canopies, see right, perfect for covering large spaces at your garden centre on a budget.

Our steel frames come in a no-maintenance hot dip galvanised finish. Alternatively they can be polyester powder coated in a RAL colour of your choice.

3

Sustainable Buildings

At Fordingbridge we believe that all buildings should be intrinsically sustainable no matter what their size, use or budget.

We specialise in creating innovative, energy efficient and cost effective permanent building solutions tailored to your exact requirements. All of our buildings achieve an A rated Energy Performance Certificate through the use of a tried and tested fabric first approach to construction.

We have a talented team that offer a complete design and build service taking your project from design, to build, to handover on site.

Client:

Walkers Garden Centre

Location:

Yorkshire

“ Our new retail building that incorporates a food hall, bookshop and cafe/delicatessen has greatly enhanced our garden centre environment and looks tremendous aesthetically.

Fordingbridge catered for the whole design and build process and acted in a very professional, flexible and thorough manner throughout. I „ would recommend working with them entirely.

*Graham Bodle,
Owner*

5

Entrance Canopies

Entrance canopies are designed to offer shelter whilst enhancing the look of an existing building. With predesigned or bespoke options available these can be tailored to reflect your garden centre's identity with a range of colours and finishes

Hard Roof Conversion

Fordingbridge offer a unique solution through the conversion of your existing canopies into enhanced retail spaces. A canopy conversion has the ability to increase revenue with higher value products, create new cafe spaces or expand existing ones or improve your customers overall garden centre experience.

Cycle Shelters and Trolley Stores

Fordingbridge offer a range of standard and bespoke cycle shelters and trolley stores. Our cost effective solutions are customisable in colour and design and will ensure your garden centre is always looking tidy and at its best.
