*"I never want to lose this
fresh feeling."*

WHY A GEBERIT AQUACLEAN? FOR YOUR WELL-BEING

Would you wash your hands with paper or use a dry form of cleaning instead of taking a shower? Hardly. Cleanliness is not possible without water. Thus, just as a daily shower has become the norm, Geberit is driving in a sustainable change in the bathroom hygiene, the AquaClean shower toilet. At the push of a button, you can feel as fresh after using the toilet as if you'd just taken a shower.

Individuals who value their well-being will be thrilled with the gentle and natural cleaning of the AquaClean shower toilet. Thanks to the perfect interaction of design and technology AquaClean does not require any more space than conventional toilets.

A CLEAN AFFAIR

At first glance, modern shower toilets are virtually indistinguishable from the traditional alternatives. The spray arm is found in a well-protected park position. The spray nozzle is flushed automatically before and after use with fresh water, which means that it always stays clean.

STARTING THE SHOWER WASH

The shower wash is started at the touch of a button. The spray arm moves forward from its park position at an oblique angle. A few seconds later, a pleasant pulsating shower spray at body temperature is felt on the skin.

REGULATING THE SHOWER SPRAY

The intensity of the pulsating shower spray is regulated according to personal preference. The shower procedure can of course be switched off at any time.

CLEANLINESS AT THE TOUCH OF A BUTTON

GENTLE PERSONAL HYGIENE

With an additional shower spray, the gentle lady shower ensures personal hygiene using pure water.

NO UNPLEASANT ODOURS

The odour extraction unit removes unpleasant odours as the system starts automatically upon sitting.

GENTLE DRYING

For soft, gentle drying, the warm air dryer is the perfect solution and features five individually adjustable temperature settings

COMPLETELY USER-ORIENTED

Thanks to the proximity sensor, functions such as water heating, toilet seat heating or orientation light start automatically upon approach.

PERSONAL WELL-BEING PROGRAMME

The intuitive remote provides hand-held control and the touch of a button is all it takes to call up personal settings.

PERFECT CLEANLINESS

The oscillation function gently moves the spray arm back and forth to ensure the feeling of exceptional cleanliness. Both the position of the spray arm and intensity of the spray can be personalised.

www.geberit-aquaclean.co.uk/comfort

PRIMARYLY TOUCHLESS

Thanks to the proximity sensor, the toilet lid opens and closes automatically.

SUPERIOR COMFORT

The ergonomically optimised toilet seat made of high-quality thermoset is fitted with integrated heating.

PERFECT CLEANLINESS

For the last 35 years, Geberit has been continuously perfecting the spray function.

SOFT NIGHT-TIME ILLUMINATION

Activated by the proximity sensor, a discreet LED light in seven light colours and five brightness levels assists orientation at night.

HYGIENE MADE EASY

When it comes to hygiene and cleanliness, Geberit accepts no compromise in the development of the AquaClean. The almost entirely self-cleaning AquaClean shower toilets are noteworthy for their high-quality product materials. Thanks to integrated technology, inaccessible areas are significantly reduced and hidden places where grime could collect are avoided. The scratch-resistant KeraTect® special glaze provides long-term protection for ceramic surfaces. The virtually pore-free, extremely smooth surface protects against bacteria and germs and can be kept clean, easily and efficiently. Furthermore, to prevent scaling, Geberit has developed an automatic descaling programme to ensure the long-term performance capability of the shower toilet, completely independently of the water hardness level.

www.geberit-aquaclean.co.uk/hygiene

RIMLESS CERAMIC PAN WITH TURBOFLUSH TECHNOLOGY

Turboflush technology ensures a flushing performance that is unrivaled rinsing cleaner and more economically than a normal flush – and is much quieter.

SIMPLE REMOVAL OF SEAT AND LID

The QuickRelease function makes it easy to remove the WC seat and lid in next to no time. This makes cleaning quick and easy. The fastenings also remain free of deposits.

DESCALING

A specially developed descaling programme removes deposits from all water-bearing parts, making descaling easy. Both the remote control and the control panel indicate when descaling is necessary.

CONSISTENTLY CLEAN

The automatic pre- and post-cleaning process ensures that the spray arm is truly clean. The spray arm is automatically rinsed with fresh water before and after each use.

RIMFREE® CERAMIC PAN

The Rimfree® ceramic pan ensures perfect hygiene. Thanks to its optimised water guide, the entire inner ceramic surface is completely rinsed with much easier cleaning. And since it is rimless, there are no hidden areas where deposits can build up.

KeraTect®

MEET THE DESIGNER

Geberit AquaClean shower toilets stand out with their eye-catching design, while at the same time leading with their many intelligent comfort functions. They offer little indication of this at first glance, giving practically no hint of the innovative, revolutionary technology hidden behind their beautifully designed bathroom ceramic.

"AquaClean shower toilets offer extensive user benefits; durability, superior quality, innovation and high technology."

This harmonious interaction between technology and design is the result of close cooperation between Geberit and the industrial designer Christoph Behling. The miniaturisation of the technology helped create the lean, simple design elegance of the AquaClean Mera and Tuma. All electrical and water supply connections have been cleverly concealed within the products themselves.

"The challenge to me as a designer is making sure that the AquaClean shower toilets do not look like technical devices, but rather fit harmoniously into the bathroom thanks to their design."

ABOUT THE DESIGNER

Christoph Behling studied Industrial Design at the Academy of Art and Design in Stuttgart in the mid-1990s. He founded the Christoph Behling Design Studio in 2004.

Behling works with numerous international companies, including the luxury watchmaker TAG Heuer, where he is the chief designer.

"AquaClean Mera is a technical masterpiece, and for me it's the best toilet in the world. We designed it using the smallest possible dimensions and detached it from the wall with a chromium cover. I wanted AquaClean Mera to appear to be "floating" in the room and to be lightweight in appearance."

"I do it with style."

GEBERIT AQUACLEAN MERA

EXCEPTIONALLY BRILLIANT

AquaClean Mera combines the timeless elegance of its floating design with the highest quality materials. This top of the line model is defined by high quality, soft lines and slowing transitions. At the same time the luxurious shower toilet pampers you with perfect comfort thanks to the unique WhirlSpray technology and many other innovative features.

www.geberit-aquaclean.co.uk/mera

1 WHIRLSPRAY SHOWER TECHNOLOGY

Thanks to the patented WhirlSpray technology, you can feel fresh and clean all day long. This is because the shower spray is enhanced with dynamic aeration for targeted and thorough cleaning with minimal water consumption.

1

2 TURBOFLUSH TECHNOLOGY

The innovative TurboFlush technology is based on a flow-optimised, rimless ceramic pan developed by Geberit, which enables extremely quiet and thorough flushing. And since the TurboFlush technology rinses the toilet cleaner than a normal flush, you almost never have to clean further after going to the toilet.

2

3

3 ODOUR EXTRACTION UNIT

Thanks to the automatic, low-noise odour extraction unit, unwanted odours are absorbed even before they leave the ceramic pan and are eliminated by a ceramic honeycomb filter. No additional ventilation is required since the system runs for two minutes.

REMOTE CONTROL / WALL-MOUNTED CONTROL PANEL

All functions of the shower toilet can be controlled with ease: The remote control and the wireless wall-mounted control panel, can be installed anywhere and both. Thanks to the intuitive design, all inputs can be made with one hand on both controls. Four user profiles can be stored on the elegant remote control. While the wall-mounted control panel is available in white and black.

←

4 DRYER

The touchless warm-air dryer arm automatically aligns itself with the most recent position of the spray arm to ensure optimal drying. The temperature can be adjusted to five different settings allowing soft and gentle drying.

5 SEAT HEATING

The ergonomically optimised toilet seat is equipped with an integrated heating element that warms automatically and is individually adjustable.

6 ORIENTATION LIGHT

The discreet orientation light is just bright enough to guide you in the night and allows you to get to back to sleep easier. Activated by the proximity sensor, you have a choice of seven colours and five brightness levels.

GEBERIT AQUACLEAN APP

The functions of the shower toilet can also be conveniently controlled from the Geberit AquaClean App. The smartphone becomes a remote control that allows you to save personal settings for shower spray intensity, position and temperature to use at home and take with you to other AquaClean equipped facilities. The app also offers additional functions such as instructions for maintenance and software updates.

GEBERIT AQUACLEAN TUMA WC ENHANCEMENT SOLUTION

The Tuma Classic models are available as WC enhancement solutions which are equipped with the same functions as the WC complete solution.

The WC enhancement solution offers installation on various pre-existing ceramic pans. This makes it an ideal and versatile solution for anyone who would like to upgrade their bathrooms while enjoying a feeling of freshness. →

CERAMIC CALCULATOR FOR WC ENHANCEMENT SOLUTIONS

Geberit AquaClean WC enhancement solutions fit on the majority of standard, round ceramic pans. Use the new ceramic calculator to quickly and easily find out which AquaClean WC enhancement solution fits on the desired ceramic pan.

- Query suitable ceramic pans
- Enter the dimensions of the ceramic pan and check them immediately
- Download and print the fitting template or have it sent to you

GEBERIT AQUACLEAN MAKES YOU HAPPY

We have made over a million customers happy with our shower toilets and we want it to stay that way. Day in, day out, we are researching and developing innovations for your comfort – and it's paying off: 94% of our customers are completely and entirely satisfied with Geberit AquaClean and would recommend it to others without hesitation.

To make an appointment for a personal consultation with a Geberit AquaClean partner, visit www.geberit-aquaclean.co.uk to locate your nearest retailer or call Geberit AquaClean directly on 0800 032 9629.

Komal Passi, West Yorkshire

"The Sela toilet has been a particular hit with our 11-year-old son. Now he loves using the toilet in the en-suite and I can be confident that he's always clean between showers!"

Fulvia Schiff-Gent, Manchester

"After suffering with Carpal Tunnel and noticing the mobility in my hands decreasing, I've realised it is easy to take everyday tasks for granted. However, since we had our Geberit AquaClean installed a couple of months ago it has been a revolution for both my husband and I."

Michael Leigh, Blackpool

"When you use it, there is nothing else like it – you feel clean and fresh, and using water to clean feels so much nicer on your skin than toilet paper."

John Flint, Stockport

"We'd never really considered having a shower toilet before, but now we've had it for a few months, it's wonderful and we've had no problem at all! Should we ever choose to move house in the future, we will take the AquaClean with us!"

*"One go washed away
any doubts."*

QUICK AND EASY STEPS TO **YOUR VERY OWN SPA**

BATHROOM MODERNISATION WITH GEBERIT MONOLITH

Where an exposed cistern is already present or when time, budget or basic structural considerations do not permit invisible integration of the flushing cistern behind the wall, the Geberit Monolith offers a stylish alternative. A slim flushing cistern and the required sanitary technology are housed under an elegant glass surface. The Monolith is designed in such a way that it can be mounted quickly and with little disruption.

THE SHINING LIGHT

The Geberit Monolith Plus offers state-of-the-art flush technology for toilets, exclusively packaged in a glass and brushed-aluminium shell. The flush is activated by gently touching the sensor buttons. A subtle orientation light discreetly guides the way to the toilet at night, with seven different colours available.

ODOUR EXTRACTION

An integrated odour extraction unit absorbs odours directly into the toilet ceramic to ensure nothing can spoil the fresh feeling in your bathroom.

SOFT TOUCH

A gentle touch is all it takes to flush the Geberit Monolith Plus.

QUALITY YOU CAN FEEL

Safety glass and elegant, brushed aluminium accentuate the sophisticated design.

*"Order a toilet and
we'll install a spa."*

SIMPLY UNCOMPLICATED

SOLUTIONS FOR ALL CONSTRUCTION SITUATIONS

There are very few bathroom designs in which a Geberit AquaClean shower toilet cannot be installed. All that is required is an electrical and a water supply connection.

GEBERIT TOILET INSTALLATION FRAMES

In new constructions or when undertaking extensive renovations, the Geberit toilet installation frames with concealed cistern provide a reliable solution. The connections for water and electricity are already pre-planned and make mounting very easy.

Example of a Geberit Duofix toilet installation frame with Geberit Sigma40 odour extraction unit or touchless with Geberit Sigma80 or Sigma10 flush plate.

Water supply connection position for Geberit AquaClean enhancement solution models

Water supply connection position, hidden, for Geberit AquaClean complete solutions

Electrical connection mains-side, hidden behind the ceramic pan, for Geberit WC complete solutions

Electrical connection via 10 amp fused spur for Geberit AquaClean models

A SUSTAINABLE QUALITY PRODUCT

Starting at the time of installation, Geberit offers as standard a two-year end user warranty and assumes responsibility during this period for free replacement of parts. If the product is registered within 90 working days of installation, Geberit will extend the warranty period by one year and will replace any parts in the event of product material or manufacturing faults.

It's even simpler to extend the warranty period by one year with the new Geberit AquaClean app via smartphone.

The Geberit AquaClean complete solutions are highly ecologically friendly from the collection of the raw materials, through to manufacture, and then in use, comparable to conventional toilets through the consumption of toilet paper.

ADDITIONAL FACTORS THAT ADD TO THE ENVIRONMENTAL SAVINGS

From an environmental perspective the additional water used has less impact than the consumption of paper. Moreover, the environmental footprint of paper manufacture in comparison to the electrical consumption for heating the water, is another factor.

GEBERIT AQUACLEAN SHOWER TOILETS IN COMPARISON WITH CONVENTIONAL TOILETS WITH TOILET PAPER AND BIDET

The graphic shows the environmental impact in accordance with the IMPACT World+ method.
