

RIBA CPD CORE CURRICULUM

ALSO AVAILABLE AS A VIRTUAL SEMINAR

## RIBA Approved CPD Seminar

### The Specification & Design Considerations of Stair Edgings

Gradus is one of the original members of the RIBA CPD Providers Network offering a full range of RIBA assessed and approved CPD seminars.

The key learning points from this Stair Edging seminar are:

#### Learning Aims:

1. Background to why stair edgings have become an important part of specification
2. How to create safe stairs: *slip resistance, visual contrast*
3. How Stair Edgings can be incorporated successfully into your designs
4. True or False - a chance to test your learning from this seminar

For further information or to book a CPD contact Technical Support on 01625 428922 or email [cpd@gradus.com](mailto:cpd@gradus.com)

# GRADUS

*Did you know, we also offer...*

RIBA Approved CPD Seminars covering the Specification and Design Considerations for the following product areas:

### **BARRIER MATTING**

#### **The Specification & Design Considerations of Barrier Matting Systems**

Architects will gain information that will help them to specify entrance matting systems effectively, where and how to use it, ideas on how to use it, and types of product available.

Forming part of your RIBA Core Curriculum:

- Design, construction and technology
- Health, safety and wellbeing
- Legal, regulatory and statutory compliance

### **WALL PROTECTION**

#### **The Specification & Design Considerations of Wall, Corner & Door Protection Systems**

This seminar will give the specifier all they need to know to make the most effective decisions when specifying interior protection.

Forming part of your RIBA Core Curriculum:

- Design, construction and technology
- Health, safety and wellbeing
- Legal, regulatory and statutory compliance
