

RIBA CPD CORE CURRICULUM

ALSO AVAILABLE AS A VIRTUAL SEMINAR

RIBA Approved CPD Seminar

The Specification & Design Considerations of Wall, Corner & Door Protection Systems

Gradus is one of the original members of the RIBA CPD Providers Network offering a full range of RIBA assessed and approved CPD seminars.

The key learning points from this Wall Protection seminar are:

Learning Aims:

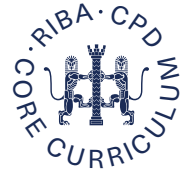

1. Why specify a Wall Protection system?
2. Standards and guidance
3. Design considerations for different applications
4. Wall Protection options
5. Protection zones for different environments

For further information or to book a CPD contact Technical Support on 01625 428922 or email cpd@gradus.com

GRADUS

Did you know, we also offer...

RIBA Approved CPD Seminars covering the Specification and Design Considerations for the following product areas:

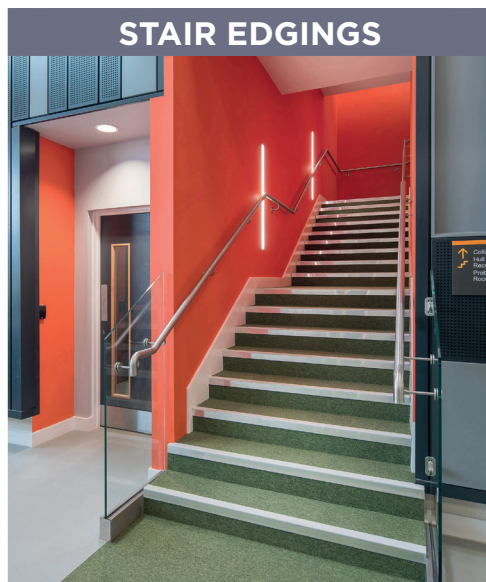

The Specification & Design Considerations of Barrier Matting Systems

Architects will gain information that will help them to specify entrance matting systems effectively, where and how to use it, ideas on how to use it, and types of product available.

Forming part of your RIBA Core Curriculum:

- Design, construction and technology
- Health, safety and wellbeing
- Legal, regulatory and statutory compliance

The Specification & Design Considerations of Stair Edgings

In this CPD we'll help you understand how stair edgings can be incorporated successfully into your designs while creating safe and compliant stairs.

Forming part of your RIBA Core Curriculum:

- Design, construction and technology
- Health, safety and wellbeing
- Legal, regulatory and statutory compliance
