

GripSure 15 Year Warranty

Terms and conditions

A 15 year warranty is given against fungal decay and insect attack when GripSure decking is installed and fixed correctly.

If any cross cutting or notching takes place the exposed ends must be painted with Arch ENSELE® as per manufacturer's instructions. This maintains the integrity of the preservative treatment and the warranty.

The warranty will NOT apply if

- GripSure products are in contact with fresh or salt water contact
- GripSure products are installed outside of the UK
- An existing GripSure installation is dismantled and used elsewhere
- GripSure has been used in a situation that for which it has not been designed
- GripSure has not been suitably maintained

The warranty is limited to the supply only of new product and expressly excludes any other costs such as dismantling of decks and transportation costs, and excludes any consequential losses.

The warranty excludes any staining or mould fungi causing weathering of the timber. For the product to have failed the GripSure product will no longer be fit for its intended end use, due to damage caused by fungal decay or insect attack.
