

HABITAT PANEL CYCLE SHELTER

Bespoke Bin, Plant & Cycle Storage

The Habitat Panel Shelter is a fully bespoke, architect-focused solution that accommodates bike storage, bin storage, and plant equipment needs with ease. Ideal for high-spec developments across London and the UK, this unit is fabricated to order, ensuring seamless integration with your existing project design. Built from hot-dipped galvanised mild steel and available with a RAL powder-coated finish, the shelter is designed to perform under the toughest environmental conditions. It's also BREEAM-compliant and compatible with sedum green roofing, allowing you to meet sustainability targets while enhancing the look and biodiversity of your site. Whether you're looking for a covered cycle shelter with galvanised Sheffield stands or a secure lockable unit for refuse and plant equipment, the Habitat Panel Shelter offers a range of flexible configurations.

- › **Fully Bespoke Design:** Tailored to your project's requirements, with a wide choice of cladding, access, and finish options
- › **Multi-Purpose Functionality:** Ideal for cycle storage, bin stores, or plant/equipment enclosures
- › **Secure & Accessible:** Double-gate or open-fronted, with various locking systems
- › **Modular Compatibility:** Can include Sheffield Stands, Two Tier Racks or Vertical Bike Storage
- › **Sustainable Roofing:** Compatible with sedum green roofing to enhance biodiversity and meet BREEAM goals
- › **Architectural Cladding Options:** Perforated steel, 358 mesh, twin wire mesh, hardwood or gabion baskets
- › **Robust Construction:** Hot-dipped galvanised steel to BS EN ISO 1461:2022, with powder-coated RAL finishes

PROJECT

Valour Business Park

Valor Park Commercial Estate, located in Beckton, Greater London, is a prime multi-urban logistics hub comprising 16 modern warehouse units. As part of their commitment to sustainable transport and tenant well-being, the estate required a secure, high-capacity cycle storage solution that would: support the growing demand for active travel, enhance site ESG performance, complement the park's modern industrial design and provide long-term durability with minimal maintenance.

We worked in close partnership with Glencar and Valor Park to design, manufacture and install a custom suite of cycle shelters, now branded as our Habitat Panel Shelters, across multiple points of the estate. Each unit was tailored in size, capacity, and specifications to meet the needs of individual locations while maintaining a consistent, high-quality finish and sustainability standards.

For this project, we installed multiple bespoke shelter configurations to optimise capacity, all constructed with hot-dipped galvanised frames to BS EN ISO 1461:2022 for maximum corrosion protection. Each shelter was finished with heavy-duty profile roofs and powder-coated fascia for a modern and durable appearance.
