FASERFIX KS 300	Level invert channel	Class F900	30
	G-TEC ductile iron & Longitudinal ductile iron gratings. Ductile iron gratings. GUGI ductile iron gratings.	Class D400 Class D400 Class E600	31
	Accessories - Trash box (also End caps)	Class F900	32
	Further accessories - connectors etc	N/A	33
	Metropolis grating application		34-35

FASERFIX®KS

Efficient drainage channels for commercial and public areas.

1 Requirements

Drainage channels for commercial and public areas:

- to withstand daily traffic by cars and trucks
- various grating designs available
- simple and safe installation in all surfaces
- correspond to EN 1433

2 Application areas

- public and commercial areas
- squares and parks
- railway stations
- parking lots and car ports

3 Solutions

FASERFIX KS channels offer solutions for most types of application in public and commercial areas:

- channels made from Fibre Reinforced Concrete (FRC)
- high stability
- bolt-less locking system SIDE-LOCK with additional bar and bolt fixing used in heavily trafficked areas
- corrosion-resistant galvanized or stainless steel
- 20mm deep angle housing

A selection of Hydraulic Performance tables for the most popular sizes of FASERFIX® and RECYFIX® channels including the RECYFIX® MONOTEC and RECYFIX® HICAP® ranges are available on request in an 8 page hard copy or PDF publication.

Hauraton channel drainage configurations are designed and sized using in-house **Hydraulic design software**. The accuracy of the software has been verified by physical testing of Hauraton systems within a hydraulic discharge test flume, replicating and evaluating hundreds of flow scenarios.

Hydraulic design software is also available free of charge to industry professionals. Intuitive and user friendly, **Hauraton Design Software** allows engineers to create drainage schemes for the company's range of civil engineering systems on tablets, desktop computers or through the internet (web-based application).

For smaller projects where a quick indication of the appropriate channel size and system is required for a given catchment area, Hauraton can provide their **Hydraulic Design App**.

For further details contact the Hauraton Technical Support Team

FASERFIX®KS channels

Features & Benefits

Galvanised or S/S angle housing

- 20 mm deep angle housing and grating
- angle housing permanently anchored into concrete during moulding process
- 8-point SIDE-LOCK (see below) plus additional bar & bolt fixing where necessary = 10 point locking system.
Bar bolt fixing needed for all heavy duty applications
- anti shunt feature

= Security / Cost reduction

SIDE-LOCK

- SIDE-LOCK boltless locking system plus optional bar & bolt fixing where necessary
- SIDE-LOCK provides 90% time savings when fixing the grating and allows easy replacement of grating components without any special tool.

= Security

KTL corrosion resistant finish

Where it is desirable to prevent oxidation on ductile iron gratings and maintain the original black appearance, then a KTL corrosion resistant barrier can be specified. Usually KTL is only needed when the gratings are occasionally trafficked or they are in a pedestrian area.

Test results for corrosion and wear resistance are available on request.

= Maintained appearance

High stability

- FASERFIX KS channels are ideal for public areas up to class F 900*
- maximum stability: side walls of 30 mm thickness
- high-grade angle housings

= Security

* where high lateral forces are expected then Hauraton recommend FASERFIX SUPER Channels

High-tech material

- centralised production = one quality control system
- Fibre Reinforced Concrete (FRC) gives optimum strength
- FRC adheres well to foundation concrete
- one channel for all loading class up to F900
- Fire resistance - A1 (non flammable according to DIN 4102)

= Security

FASERFIX®KS Applications

Efficient drainage channels for commercial and public sectors.

FASERFIX KS channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

Category A 15,
Load class 15 kN

Category B 125,
Load class 125 kN

Category C 250,
Load class 250 kN

Category D 400,
Load class 400 kN

Category E 600,
Load class 600 kN

Category F 900,
Load class 900 kN

- 1**
- Fibre-reinforced concrete channels to DIN V 19580/ EN 1433, CE-compliant, with safety joint, steel frame and SIDE-LOCK boltless locking mechanism as well as tongue and groove for exact installation

- 2**
- Numerous grating options

- 3**
- Trash box with drainage connection options on 3 sides

- 4**
- End caps with and without outlets

FASERFIX®KS 100

Channels

FASERFIX®KS 100 level invert channels up to load class F 900

FASERFIX®KS

Introducing the METROPOLIS grating

Ductile iron gratings on surface water drainage channels don't necessarily need to be utilitarian in appearance with geometric slots or meshes

Ductile iron gratings on surface water drainage channels don't necessarily need to be utilitarian in appearance with geometric slots or meshes

NEW METROPOLIS Ductile Iron Grating - see Pages 12 & 26

FASERFIX®KS

Inspired by the patterns made by water flowing down a stream, the surface design of the Hauraton METROPOLIS grating is reminiscent of the ART NOUVEAU style and later ART DECO period. Planners and landscape architects can now choose this grating to add a touch of class to their schemes in historic and pre-modern townscape or any surface drainage project where an aesthetic, more decorative look is desired.

500mm x 149mm wide METROPOLIS grating.

500mm x 249mm wide METROPOLIS grating.

The METROPOLIS grating is sold separately to fit FASERFIX® KS channels or factory fitted to RECYFIX® PRO channels. Gratings are available in nominal widths of 100mm and 200 mm

Sizing details for FASERFIX® KS 100 and FASERFIX® KS 200, with METROPOLIS gratings can be found in the Hauraton CIVILS catalogue. Sizing details for RECYFIX® PRO 100 and RECYFIX® PRO 200, with METROPOLIS gratings can be found in the Hauraton LANDSCAPE catalogue. The channels provide a loading capacity up to Class D400. All METROPOLIS grating are finished in anti-corrosion, Black KTL finish.

Tim Connolly, Managing Director of Hauraton Limited says, "The introduction of the METROPOLIS grating into the UK is another example of how Hauraton is keen to design new products in response to customer demand".
