Extra Coarse Safety-Grip™

Also available in **H3402VUC** Green

Coefficient of Friction	Dry Surface	102 PTV
	Wet Surface	80 PTV
Roll sizes	19mm - 1168mm	
	10mm - 18mm wide on special request	

- Suitable for areas exposed to snow and ice
- Copes with harsh conditions and heavy use
- Extra strength adhesive

H3402NUC
Black

Thick Safety-Grip™

H3404N
Black

2mm thick grip tape has many uses, particularly for application into recesses which not only removes trip hazards but increases the non-slip properties of walkways or steps.

Also available in **H3404Y** Yellow

Conformable Safety-Grip™

For application on uneven surfaces such as durbar tread and chequer plate.

- Aluminium foil backing has no memory so conforms to surfaces
- Reduces risk of lifting from uneven surfaces

A foil base gives Conformable Safety-Grip™ high flame retardancy levels. The product has been tested and certified to CAA FAA specification 8 for use within aircraft cockpit areas. Conformable Safety-Grip™ also has R118 certification for the burning behaviour of materials used in the construction of commercial vehicles. (see website to download the certificate)

Mild Abrasive Safety-Grip™

H3432N
Black

Small granules give a low peak to valley profile resulting in a gentle feel and adequate slip prevention in the right environments.

- Lightest, thinnest abrasive anti-slip tape
- Internal and external application
- Water resistant

PeakGrip

H3456N
Black

Provide a permanent grip surface to areas frequently exposed to mud and water. Liquids flow away due to the tape's ingenious large, well-spaced grit structure.

- Surface consists of big chunky granules

RigiGrip

H3481N
Black

RigiGrip is standard Safety-Grip™ with a thicker backing liner giving it more rigidity and making it easier to apply in large sheets.

- Backing liner 50% thicker than standard Safety-Grip™
- More rigid for large sheet application
- 60 grit anti-slip surface

Glow-In-The-Dark Safety-Grip™

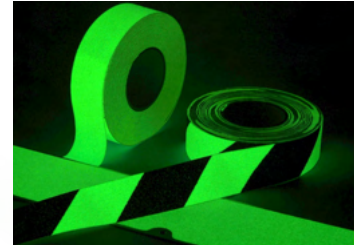

During the daytime Glow-In-The-Dark Safety-Grip™ appears to be a mild green shade, in darkness or any lights out scenario it emits a bright white light. Photoluminescent Safety-Grip™ can be charged by either natural or artificial light sources.

- Photoluminescent base
- Guides personnel during blackouts
- Anti-slip surface

Glow green in low light conditions

Heskins Grip & Specialist Tapes

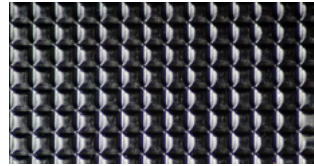

TackyGrip

H3475 TackyGrip
Non-Removable Adhesive

H3470 TackyGrip
Lower Tack Adhesive

Creates an anti-slip surface suitable for standing and walking upon. TackyGrip can also be used on handles, hand holds and other surfaces where a more positive grip is required. The same material is available with either non-removable or lower tack adhesive.

H3475N
Black

H3475T
Clear

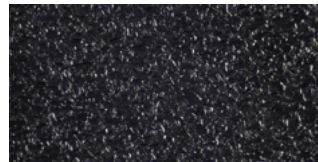

H3474

iGrips

Suitable for applying to handheld devices. The 'bobbly' surface is comfortable to the touch while offering exceptionally high levels of grip.

- Prevents damage from drops
- Allows greater dexterity and control during use

H3455

FlowGrip

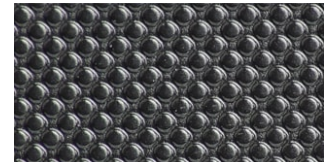

- Thinnest non-slip material available
- Malleable enough to be applied around extreme angles
- Can be used as impact protection in fast-paced environments such as hospitals

H3468

Flexi-Grip

Very thin, non-abrasive tape that is extremely flexible, lending itself to application onto angular surfaces, particularly handheld devices.

H3418

Handrail Grip Tape

Non abrasive tape with a dimpled patterned surface offers slip-resistant grip on handrails. The plastic film works as a fantastic insulator meaning the handrail is not cold to the touch.

UHB Heavy-Duty Bonding Tape

H9912X – 1.2mm
H9915X – 1.5mm
H9920X – 2mm

- Waterproof
- Noise Reduction
- Draught proof
- Faster application
- Improves aesthetics
- Dampens vibration

Anti-Corrosion Tape

H3453
Black

Also available in
Beige
Grey
Clear
White

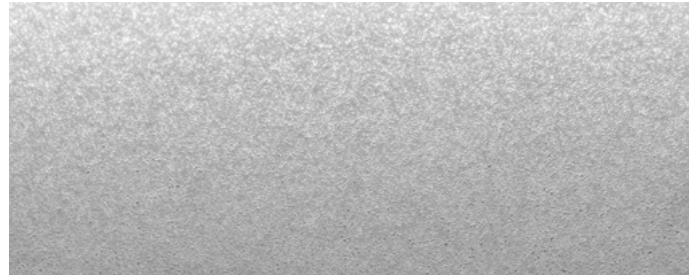

Prevents galvanic corrosion by breaking the electrical connection between two dissimilar metals.
