johnlord.com

“Be attentive to the finer details, because it is in them that your strength lies”

John L. Lord

John Lord is the UK's leading manufacturer and installer of specialist resin floors. Established for over 100 years, the family run business has developed an enviable reputation for its high-quality flooring products and unrivalled customer service.

From the company's specialist manufacturing facility in Bury, the full range of **John Lord high-performance resin flooring** is installed for UK customers and exported overseas: throughout Europe and worldwide.

John Lord has three ranges of commercial and industrial resin flooring which are **renowned for innovation and quality**, having been developed by the company's experienced team of chemists to the BS EN ISO 9000 standard.

The standard resin floor formulations lead the industry, providing complete flooring solutions for a wide range of **demanding environments**. The capability also exists for **bespoke resin flooring** to be formulated in-house.

All products in each range are exclusive formulations and exclusively available from John Lord:

Uragard

A robust range of polyurethane resin flooring for very demanding environments.

Epigard

Innovative developments with epoxy resin results in a range of high-performance, multi-purpose and hard wearing flooring.

Acrigard

Combining fast cure times with decorative finishes in a range of methylmethacrylate resin flooring.

DURABLE

Ideal for busy or industrial environments, the high abrasion resistance properties of John Lord floors provides a hard-wearing, durable surface.

HYGIENIC

A seamless John Lord floor prevents bacteria build up and ensures the floor is easy to clean; maintaining the ultimate hygienic environment.

SLIP RESISTANT

John Lord has several independently tested slip-resistant resin flooring systems that can help keep your workplace safe.

CHEMICAL

A number of John Lord specialist flooring products offer chemical resistance; ideal for industries that work with harsh chemicals or require an intense cleaning regime.

TEMPERATURE

A selection of John Lord specialist flooring products are temperature resistant; protecting floors from the spillage of hot liquids and capable of withstanding a hot cleaning regime.

ANTI-STATIC

The anti-static option within a John Lord resin floor prevents the build up and discharge of electrostatic charge.

DECORATIVE

John Lord decorative and designer resin flooring is not only aesthetically pleasing but still has all the attributes for a safe and hygienic working environment.

FOOD & DRINK

“Making a company successful lies in the quality of people and the quality of the products”

Jonathan Warburton

Food Processing

John Lord has a long track record of providing safe, hygienic and long-lasting flooring systems to the food and drink industry, stretching back over 40 years.

Resin flooring systems, ceramic tiles and industrial stainless steel from John Lord provide a **Total Solution**, for which John Lord take **Total Responsibility**, that meets the stringent demands of food and drink processing and manufacturing environments.

FOOD & DRINK

From bakeries to meat processing and slaughterhouses to convenience foods and canning, John Lord has a long and successful history of supplying specialist floors.

Snack Food Processing & Packaging using Uragard HT62W

Food Processing

A John Lord resin floor can be found in the plants of many leading food manufacturers throughout the UK and beyond, including the likes of Premier Foods, Tulip Meats and Samworth Brothers.

FOOD & DRINK

Food Processing

A seamless resin floor from John Lord provides the perfect foundation from which to create the hygienic environment required for food and drink processing.

With no joints or crevasses, there is nowhere for bacteria or debris to harbor. A seamless resin floor creates a wall-to-wall surface that is easy to maintain and clean.

Bakery Plant using Uragard HTAS

FOOD & DRINK

“Let me tell you the secret that has led me to my goal. My strength lies solely in my tenacity”

Louis Pasteur

Drinks Processing

John Lord is a trusted supplier to the drinks processing industry, delivering complete solutions for flooring, cladding and drainage in these demanding environments.

FOOD & DRINK

Drinks Processing

The ability to withstand traffic, machinery and equipment whilst **complying with health and safety** directives, makes a John Lord resin floor ideal for dairies, breweries, bottling and beverage facilities.

Bottling & Distribution Plant using Uragard HTIF

Industrial Stainless Steel Kerbing

RETAIL & COMMERCIAL

“High expectations are the key to everything”

Sam Walton

Retail

Busy retail environments demand a resin floor that is **durable and low maintenance**, yet **highly attractive** to create a positive shopping experience.

John Lord offers a range of decorative resin floors that incorporate an infinite variety of coloured 'flakes' or quartz aggregates to **create unique design opportunities**.

Along with the wide-range of benefits of resin based systems, a gloss finish creates a vibrant speckled effect that is easy to clean and always looks its best, even in the busiest of stores.

RETAIL & COMMERCIAL

Specialist resin floor products from John Lord have been used throughout supermarkets in:

- Shopping and cashier areas
- Cold and ambient storage
- In-store bakeries and kitchens
- Staff and customer dining areas

Supermarkets

The high footfall in supermarkets demands a flooring system that is **hard-wearing** that can **ensure the safety** of shoppers and staff.

What's more, long opening times makes it vital for new flooring systems to be **installed quickly and efficiently**, with guaranteed reliability to prevent any loss of trading time.

John Lord takes **Total Responsibility** for the installation of resin floors in supermarkets. From floor design, resin floor formulation and substrate preparation, through to cleaning up and cleaning advice, John Lord is committed to meeting the unique requirements of supermarkets.

RETAIL & COMMERCIAL

Offices

In busy office environments, where flooring is subject to the high footfall that comes with many day-to-day comings and goings, it is important that the floor creates an **inspiring,**

professional aesthetic.

A John Lord **decorative designer resin floor** is ideal for creating an aspirational office environment that inspires staff, impresses visitors and reflects the company's brand.

TRANSPORT

Automotive

Epigard and Uragard are ideal for use in the automotive industry, providing **hard-wearing flooring solutions** for assembling, body shop, paint shop, parts storage and staff communal areas.

Quick installation in a **single step application** means that these specialist resin flooring systems minimise downtime – vital during busy periods and in round the clock work areas.

Performance Garage using Epigard SL

“Coming together is a beginning; keeping together is progress; working together is success”

Henry Ford

TRANSPORT

Transport Terminals

Transport terminals are subject to high footfall on a daily basis, making it vital to ensure the flooring is **hard-wearing and safe**.

The choice of a **John Lord** resin floor product combines **slip resistance and durability** with a stylish, designer finish to create the vibrant appearance that transport terminals deserve.

“We shape our buildings thereafter they shape us”

Sir Winston Churchill

Rochdale Bus Station using Acrigard QB

The **unlimited design opportunities** possible with a John Lord resin floor can be used to complement surrounding features and the layout of the building.

This unique combination of **aesthetics and functionality** has made

a **John Lord** resin floor the number one choice for many departure lounges, waiting areas, receptions, storage and maintenance rooms.

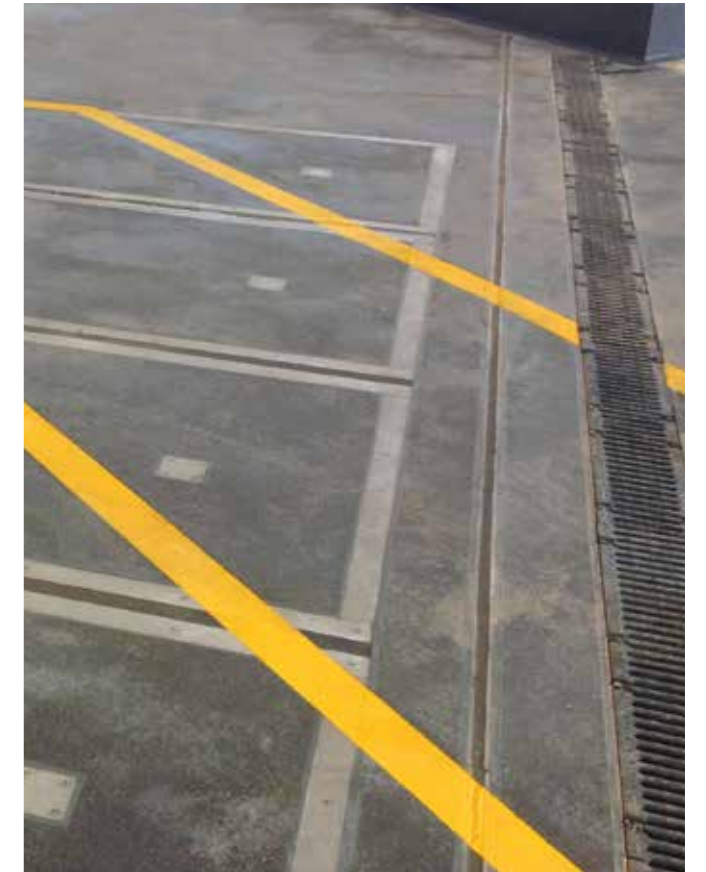

TRANSPORT

Transport Depots

The heavy automobile traffic that passes through any transport depot on a daily basis demands a **hard-wearing flooring system**. The right John Lord resin floor offers exactly that; providing **durable and functional flooring** for the busiest of depots.

Resin flooring is ideal for bus stations, distribution centres and other transport depots where demarcation is vitally important. A **John Lord** resin formulation acts as a good base for different finishes, such as paint markings. Drains and manhole covers can also be in-filled with resin to create a **consistent uniform finish** throughout.

Distribution & Intake Depot using Uragard HT110W

TRANSPORT

Plane Hangers & Storage using Uragard HT62W

Aviation

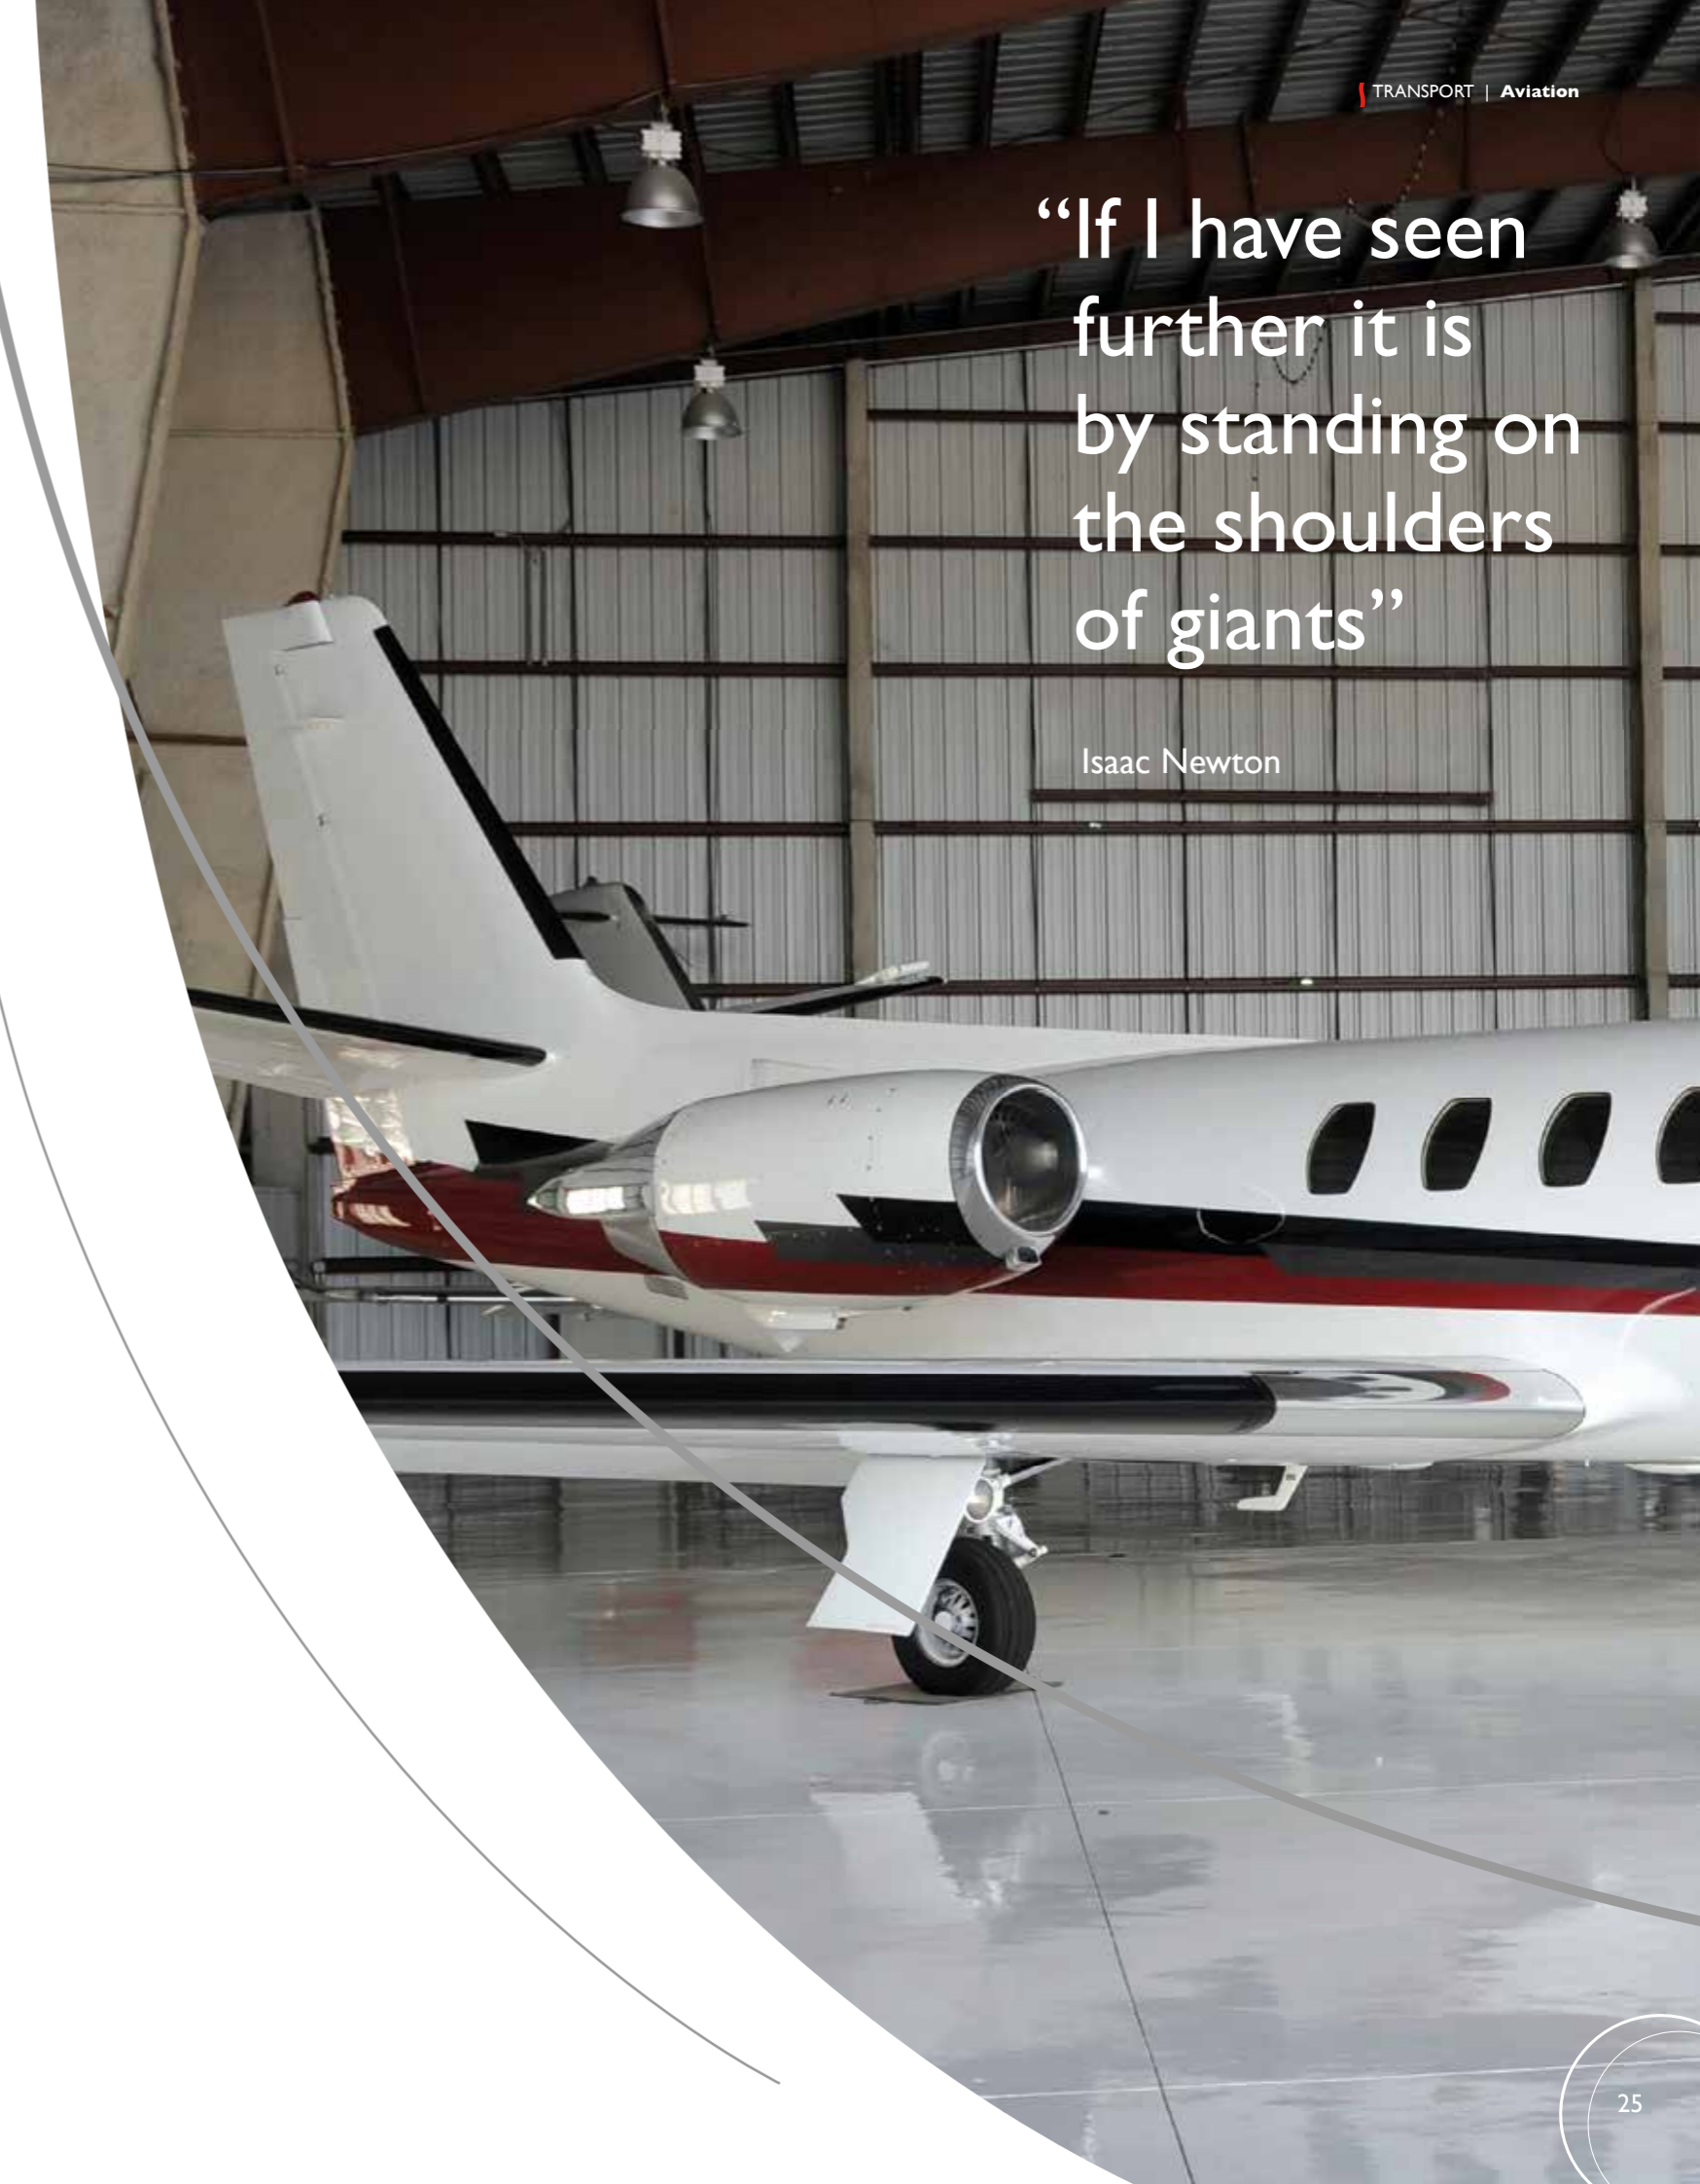

John Lord has developed a range of resin floor formulations specifically suited to the aviation industry.

Both **practical and safe**, these John Lord resins are **chemical resistant, hard-wearing** and easy to clean; making them ideal for heavy trafficked areas that may be subject to spillages.

John Lord resin floors also ensure **safety underfoot** for operatives working in hangars, assembly workshops, paint shops and storage areas.

“If I have seen further it is by standing on the shoulders of giants”

Isaac Newton

TECHNOLOGY

Engineering & Electronics

John Lord provides a range of resin floors for advanced engineering and electronics environments which help **maintain clean working conditions** and offer resistance against aggressive chemicals, including oil spillage.

A **seamless, high gloss or matt finished**, surface is a popular choice for workshops, store areas, assembly areas and amenities. An **anti-slip profile** is also available for additional safety.

Anti-static flooring is ideal for electronics environments where it prevents the build up and discharge of electrostatic charge that can be damaging to sensitive equipment. John Lord produces a **conductive floor** that has a resistance of below one mega-ohm providing the **highest grade** of anti-static flooring.

John Lord is the trusted partner for British Aerospace, British Rail, MOD and GEC Alstom, demonstrating the **quality and resilience** of its products.

“Intelligence is the ability to adapt to change”

Stephen Hawking

“Be less curious about people and more curious about ideas”

Marie Curie

CHEMICALS & PHARMACEUTICAL

Pharmaceutical

In pharmaceutical plants **safety and hygiene** is paramount; it is also vital for the flooring to be capable of withstanding aggressive chemicals.

A John Lord durable resin floor ticks all these boxes, providing **specialist solutions** that are tried and tested by major pharmaceutical companies such as Proctor and Gamble, GlaxoSmithKline, Novartis and Oxoid.

The **seamless finish** created by a John Lord resin system is ideal for pharmaceutical plants as it provides a hygienic floor that prevents the build up of bacteria and ensures easy cleaning.

A high gloss or matt finish is suitable for all **sterile environments** and is widely used for dry and liquid processing, clean rooms, storage, laboratories and distribution areas.

PUBLIC SECTOR

Prisons

The John Lord Total Responsibility Package is highly valued in the public sector: **Trust and reliability** coming as standard.

Resin floors are used widely in prisons where floors need to be easy clean, **highly durable** yet aesthetic.

John Lord resin floors can be found in production and process areas, wash areas, packaging areas, chill stores, dispatch areas, amenities and workshops.

HMP Grampian using Uragard HT62W and Uragard HT120W

PUBLIC SECTOR

Education

Schools, colleges and universities demand a resin floor that is **hard-wearing** yet **safe, hygienic** and engaging.

A John Lord resin floor rises to the challenge; providing **slip resistant flooring** that is easy to clean and maintain, ideal for entrances, receptions and corridors, which are regularly subject to lots of people in a short space of time.

“The goal of education is the advancement of knowledge and the dissemination of truth”

John F. Kennedy

Resin flooring is also ideal for classrooms and laboratories, where it offers **slip and chemical resistance**.

including food preparation and dining areas; that demand an additional level of hygiene.

In fact, **John Lord** resin floors can be used throughout entire educational establishments,

School Kitchen and Dining using Acrigard FK Natural Slate

HOTELS & LEISURE

“All businesses face hurdles and obstacles. It is how we tackle them that shapes our success”

Duncan Bannatyne

Restroom and Changing Facilities using Acrigard FK Natural Slate

Leisure

Hygiene and safety of both staff and guests are of utmost importance in the leisure industry.

From wet rooms to showers, bathroom facilities to store rooms and changing areas, it is vital to ensure that flooring is slip resistant to prevent trips,

slips and falls when these environments often have wet conditions.

A John Lord resin floor offers a proven product for the leisure industry; providing anti-slip resin flooring that is both safe and hygienic.

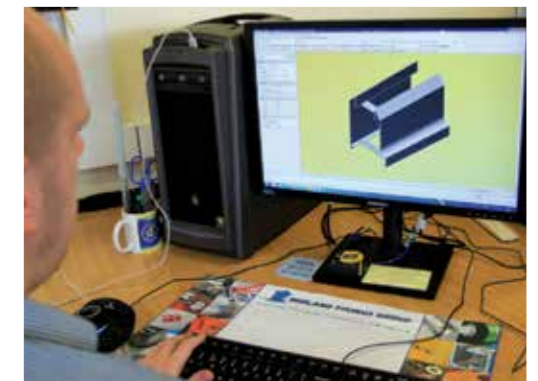

MADE IN BRITAIN

INDUSTRIAL STAINLESS STEEL

ASPEN Stainless by Canal Engineering

Any John Lord industrial resin floor can be complemented by high-quality stainless steel industrial drainage, wall cladding, kerbing and protection products manufactured in the UK, under the ASPEN brand, by its sister company Canal Engineering.

All ASPEN Stainless steel products, whether standard or bespoke, have been developed specifically for industrial environments that require hygienic plant and equipment to be maintained.

ASPEN Stainless installed by John Lord in combination with a hygienic resin floor is included in the **John Lord Total Responsibility Package.**

CERAMIC TILING SYSTEM

Available in both smooth and anti-slip finishes, **Vibrogard** has a completely sealed surface to prevent bacteria build up and allows easy cleaning to maintain a hygienic environment.

Vibrogard Industrial Tiling

In some environments a ceramic floor may be more suitable than resin, in these circumstances John Lord recommends its **Vibrogard** system.

The Vibrogard ceramic floor tiling system, **exclusively available** from John Lord, offers **proven reliability** and unrivalled performance, making it ideal for a variety

of applications including: food and drink processing, heavy manufacturing, pharmaceutical and chemical processing environments.

Vibrogard uses a unique hexagonal design and vitrified ceramic tile to create an exceptionally **strong and resistant** flooring surface: The durability of the ceramic tiles is further enhanced by its **chemical resistance**.

CONTRACTING & INSTALLATION

The **Total Responsibility Package** is a product of the unique approach of John Lord.

John Lord is committed to delivering every customer a complete finished floor, covered by a product and installation guarantee.

Working across many industrial sectors, for John Lord a floor project doesn't end with supplying the right resin product. Responsibility for the complete flooring project starts and finishes with John Lord, from substrate preparation, to installing the finished floor through to after care service; **John Lord Total Responsibility** means you have total peace of mind.

Flooring Advice

The **technical sales team** at John Lord is available in the early stages of every project to offer practical advice and CAD design services, with consideration for the latest hygiene standards and **project efficiency**. In effect, a **bespoke solution** is produced for every client, tailored to their specific requirements.

Project Management

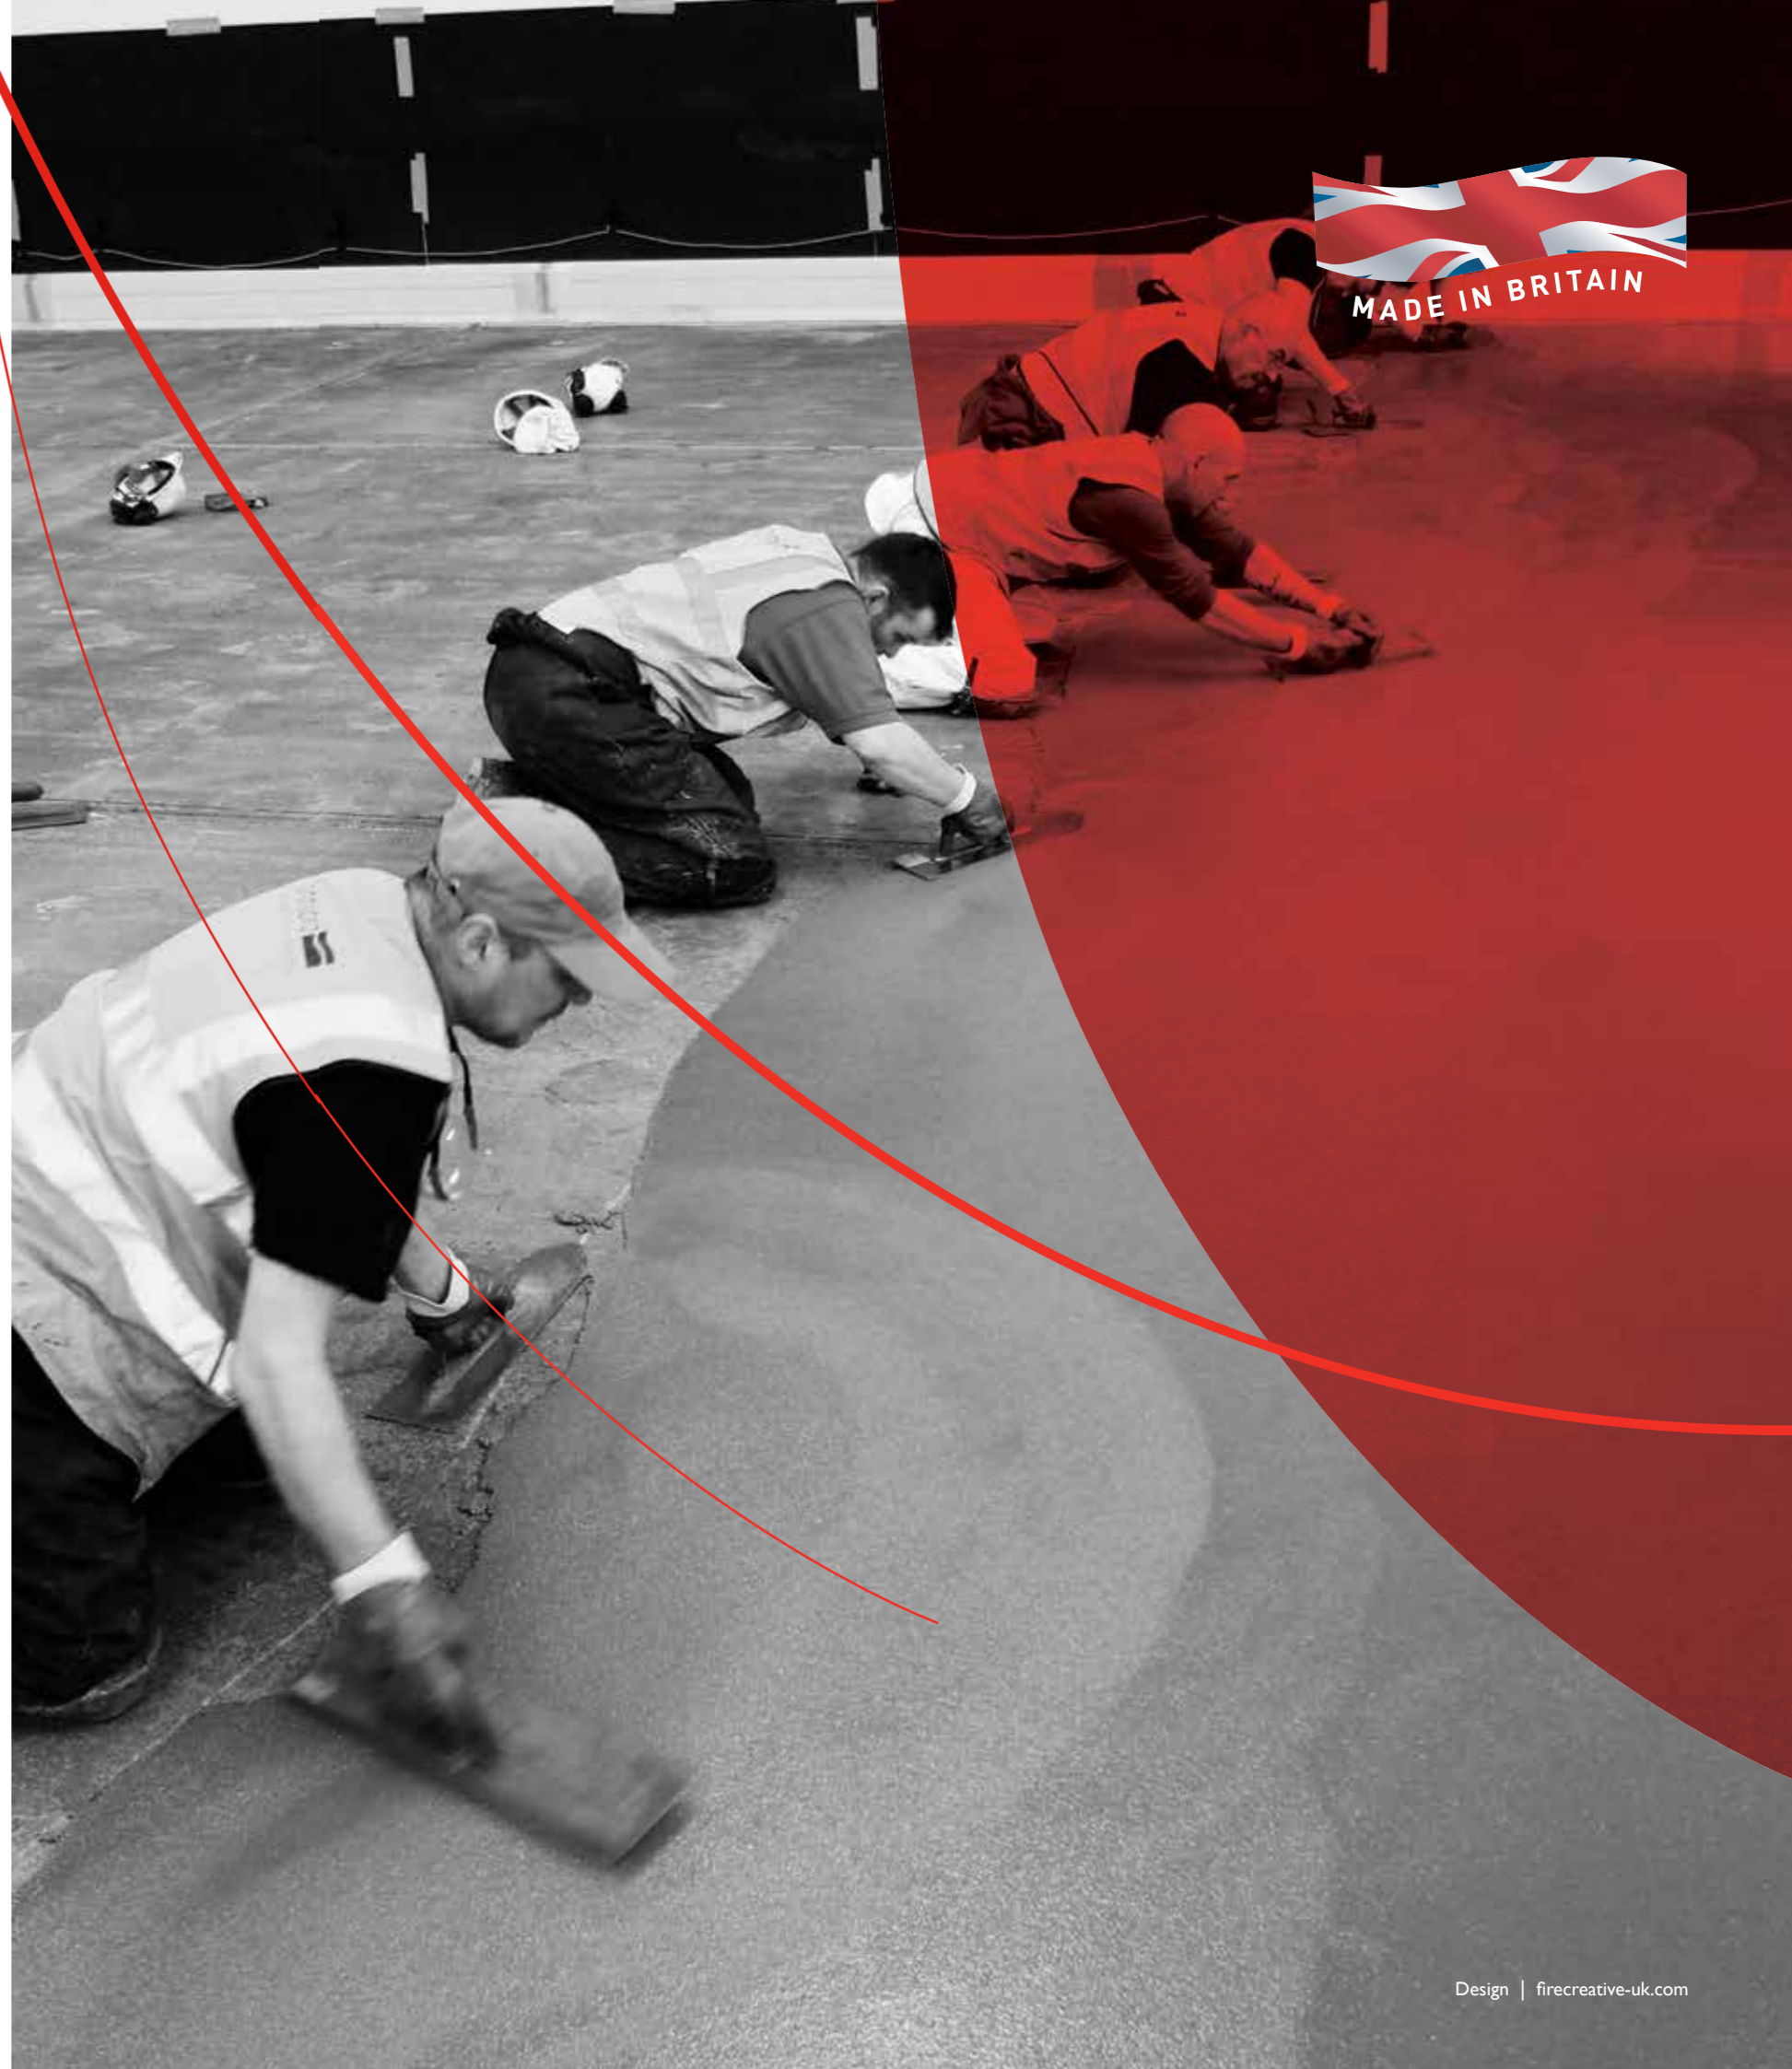

Every flooring project is managed by an **experienced and qualified** project manager. From initial drawings through to completion of the works, they are involved from start to finish, ensuring that the project is completed to the highest standards.

Expert Installation

With one of the largest trained installation teams in the UK, John Lord installs its resin floors for customers throughout the UK, Europe and beyond. Each team is led by a **fully qualified** Senior Foreman whose **wealth of knowledge** and experience guarantees every installation meets the **high standards** John Lord is renowned for.

Support & Service

Project managers, sales and technical staff are supported by the **dedicated health, safety and quality department** at John Lord; this is led by a senior PHD qualified manager. The work of this department also ensures that John Lord does all that it can to care for the environment.
