In a global world, it is not enough for Junckers to improve itself continuously on a local level. We always try to ensure legal and sustainable forestry, and consequently, sustainable products, more effective energy utilisation and good working conditions. We do this through our subsidiaries, as well as by trying to influence our customers, suppliers and society on a broader scale.

In 1930 – long before it became trendy or politically correct – the young forester Flemming Juncker searched for ways to utilise and preserve one of our most valuable resources: the forests. At that time, there was very little focus on the environment and sustainable forestry. When Flemming Juncker implemented his ideas about care and sustainable utilisation of the forests, his company and the beautiful Junckers floors were born.

Junckers utilises 100% of the forested timber. Junckers is an energy-intensive industry using substantial volumes of energy for the drying and processing of wood. Junckers’ residual wood (sawdust, wood chips, saw-cut log ends and other residual wood from the production) is supplied to a wood-fired power plant, which in return supplies electricity to Junckers and the Danish national electricity network.

As wood is considered CO2-neutral material and because Junckers generates more energy than the business itself can consume, the energy surplus is used to produce CO2-neutral electricity, which benefits society. That makes Junckers a CO2-neutral company!

At Junckers, we believe in sustainability and we support initiatives that improve environmental awareness. Complying with environmental legislation and environmental regulations is paramount to us and in areas where we see further possibilities of improvement, we strive to do more. We co-operate with internationally recognised certification schemes, such as FSC®, PEFC™ and others.
All Junckers wood floors and selected wood-care products have received the Danish Indoor Climate Labelling. A product with this labelling has undergone extensive degassing and odour tests. This ensures that there are no chemical substances in the flooring which adversely affect the air quality in the room.

Junckers also complies with REACH (Registration, Evaluation, Authorisation and restriction of Chemicals). REACH is an EU legislation containing a uniform set of rules and shared registration of substances used. The objective of the REACH regulation is to implement a high level of protection for human health and the environment.
Dark ash is an extremely elegant wood in high demand for flooring as well as interior design in general. The white pigmented surface adds Nordic elegance while enhancing the lively structure of the wood.
the Plank Collection
Nordic Light Ash

Light ash has a very fine, light expression with a characteristic grain structure. Over time it attains a golden tone. Ash grows naturally in mixed wood forests.
Dark Ash is very characteristic due to the distinct graining created by the nut-brown heartwood and the light parts of the wood – reminiscent of zebrawood.
Nordic Oak Boulevard
AEROVILLE MALL, FRANCE
Oak is extremely tough, durable and forgiving, making the wood exceptionally well suited to flooring. The structure is distinct in golden nuances and ages gracefully to a deeper glow.
Black Oak was originally a natural product of the forest - yet it was no tree. In former days, black oak occurred when an oak trunk had rested a few hundred years in marshland. A natural process turned the wood black. Junckers has recreated the distinct, exclusive expression through a unique full thickness vacuum dyeing process.

Black Oak
AMPHITHEATER "SALLE 3000", FRANCE
Driftwood Grey, Oak Harmony
Pearl is achieved by adding a grey pearl wash with reflective qualities to the surface of European white oak.
Oak Silver Pearl
The extra wide planks 185 mm - bring an exclusive feel to any room.

Oak Boulevard Natural Pearl
Junckers unique brushed planks add texture to the floor, pleasing to look at and to touch. Via a special hard brushing technique, the soft wood is removed from the surface of the planks, leaving the grain more prominent. Textured oak can be combined with a number of striking surface treatments and colours from the design collection, to enhance the structure of the wood even more.

A solid wide board floor from Junckers is an investment that is likely to add permanent value to any building, but most importantly, it should enhance your space and everyday life. It adds pleasure yet be out of mind. To achieve a result that matches your dreams in terms of both design and functionality, you need to get a number of details right. Simply draw us into your project, the earlier the better. We will be happy to share from our extensive third-generation experience and technical knowledge and assist you closely through the phases of design, technical detailing, installation and maintenance. That way you can avoid costly pitfalls and enjoy all the benefits of an exceptional Junckers floor – year after year after year.
Select your style

No two trees are the same. No two cuts. No two planks. Each plays its own lyrical tune, composed by weather, seasons and forest wildlife for the best part of a century. That’s the very charm and challenge of working with wood. A Junckers floor will be just your floor. No copies.

JUNCKERS WOOD CHARACTER OPTIONS
Junckers can deliver most floors in a choice of three grades:

- **CLASSIC**
  - A very even colour and uniform appearance

- **HARMONY**
  - A natural appearance with more colour and grain variation

- **VARIATION**
  - A rustic look with lots of graining and colour variation

Prefinished from the factory
Junckers floors are normally delivered prefinished with oil or lacquer and are ready for immediate use. Or you can choose a raw surface if you prefer to treat your floor yourself after installation.

**Oil**
Junckers oiled floors enhance the natural glow of the wood and provide a naturally soft, authentic surface that is both durable and easy to maintain.

**Silk matt lacquer**
Junckers silk matt lacquered floors enhance the glow of the wood and provide a strong and highly durable, easy-to-clean surface, suitable for the busy family or high-traffic areas.

**Ultramatt lacquer**
Junckers ultramatt lacquered floors combine a very natural matt appearance with the highly durable, easy-to-clean surface.

**Untreated**
The raw surface of the wood requires treatment with one of Junckers professional oils or varnishes before use. Our products are water-based, easy to use and gentle on the environment.
A traditional radiator circulates the air so that the floor remains cold, while a “heat cushion” gathers under the ceiling.

Underfloor heating provides a warm floor and a pleasant temperature at head height with no “heat cushion” under the ceiling.

Design freedom without pipes and heaters

Underfloor heating is an economical, luxurious and very elegant solution without visible pipes and heaters. It works to perfection under Junckers floors because, unlike tiles and stone, solid wood is naturally warm and pleasant, whether or not the heating is on. The result is not only a treat under bare feet, but also a comfortable, even room temperature.

Water-based underfloor heating is generally suited for residential and commercial buildings, while electrical systems are ideal for minor renovations. The unique Junckers Clip System enables the Junckers floor to be floated over most modern underfloor heating systems, fitted within a screed subfloor. Alternatively, the underfloor heating system can be placed between battens or joists with the Junckers boards nailed over the top.
Wood is a living material that changes slightly with the seasons. During summer periods of high humidity, the floorboards will expand a little, just as they will contract during winter and dryer seasons, leaving small, natural gaps between them. This is the innate character of wood. However, applying Junckers Ship’s Decking System, neoprene strips between the boards will absorb the movements so that the floor will look the same all year round. More than that, the visible neoprene strips will enhance each board to create a spectacularly elegant floor that will appear equally harmonious and robust. Whatever the season, let your mind wander to warmer days at the beach.
All you need is free space

Junckers solid wooden floors are fast and easy to install. The laying method depends on the existing or planned conditions, the sub floor plus your wishes for height, underfloor heating, hidden cables and pipes, etc. Basically, if you have the free space, we have an easy way to lay your floor.

Clip System

» quick, easy and shallow in elevation
Junckers unique Clip System enables a floating floor to be fitted directly onto a screeded or wooden base, without the need for battens. This laying method works perfectly with underfloor heating and is excellent for reducing impact sound into rooms below.

Glued floor

» robust sound and feel
Junckers floors can be glued down to any base including screed, and wooden materials using the unique, environmentally friendly Junckers Parquet Glue. Based on silicone, the glue also serves as a moisture membrane. A glued floor provides a very robust, solid feel, reducing the sound underfoot within the room and gives you a free hand in making creative patterns in the floor.

Battens

» strong installation
Our 20.5 mm floors are structurally strong. They can be nailed to battens and joists to level out the floor and gives plenty of space for pipes, cables, insulation, underfloor heating and other technical requirements to be placed underneath the floorboards.
Junckers Woodcare System includes a complete range of products for treating and maintaining your wooden floors and over time, you can watch your floors grow more beautiful.

Junckers daily care
A Junckers floor is easy to clean thanks to the high quality and professional finish. Sweeping or vacuum cleaning your floor will get rid of most dust and dirt. To clean a stained floor, damp cleaning usually does the trick. To keep your floors looking stunning, use Junckers professional clean and care products, designed to nourish and maintain the wood while you clean.

Junckers oils and lacquers
If you have chosen a pre-finished Junckers floor, you can start using it straight after installation. With raw planks, you will need to treat the surface first. Using Junckers professional series of oils and lacquers you can create the exact look and surface quality you wish. Use a discreet finish to let the wood speak for itself or add a surprising effect or colour to achieve a distinct look. Junckers oils and lacquers are all easy to use and produce a professional and durable result. Should you ever have a change of heart, our thick, solid planks can be sanded again and again, allowing you to redesign the look of your floor whenever you want.
