

Kee® Klamp

KEE KLAMP components offer the most flexible solution for the construction of safety barrier systems. The principle is simple yet highly effective, proven over the last 70 years in thousands of completed projects across the globe. The **KEE KLAMP** system securely joins standard sizes of structural steel tube into almost any configuration imaginable, utilising the widest range of fittings available on the market today.

When purchasing **KEE KLAMP** fittings from **Kee Safety Ltd**, you can be assured of unrivalled technical support. Our technical team can offer practical assistance either over the phone or by fax or if required check your designs or drawings for compliance with safety standards. If you have a major project requirement we can offer a full design and installation service through our **KEE PROJECTS** division, assuring you of a safe installation fully compliant with all major standards and statutory requirements.

Features of the KEE KLAMP system

Benefits of the KEE KLAMP system

- **Made of galvanised cast iron to BS EN ISO 1461**
- **Fitted with KEE KOAT corrosion protected grub screws and Thread Koat® recess protection**
- **TUV certified for strength, manufacturing quality and consistency**
- **Meets specified loadings up to 1500 N/m**
- **No welding, so no hot work permits required**
- **No threading or bolting so no special tools required**
- **A flexible system that can accommodate on site variations**
- **Cost effective to install as only low skilled workforce required**
- **Optional colour coating available**
