LAMI DOORS REACH FURTHER

AMI DOORS group has been manufacturing high quality specialist Glass Reinforced Polyester (GRP) doors since 1966. During the years we have successfully delivered hundreds of thousands of LAMI door sets worldwide. This places LAMI DOORS group as one of the largest and most experienced manufacturers of GRP doors in Europe. The range of LAMI doors can be seen in Laboratories, Cleanrooms, Hospitals, Food Factories, Pharmaceutical and Electronic Manufacturing Facilities, Leisure Centres, Swimming Halls, Schools and Supermarkets. About 50% of our production is exported and LAMI doors have been supplied to projects in Great Britain, Ireland, Sweden, Norway, Denmark, Russia, Spain, Portugal and other countries.

We have been in the front line of developing and testing our specialist GRP doors for decades. We continually strive to improve our comprehensive products in quality, service and safety for our clients for an even better future sustainability.

LAMI doors are all manufactured to the exacting standards of quality and design in our modern purpose built factory. Our manufacturing methods take into consideration future production needs and environmental issues. LAMI products are made from the highest quality raw materials and our in-house product development constantly follows the latest information on raw materials and production methods to adopt the latest technology.

LAMI DOORS group values are Customer Satisfaction, Flexibility, Fast Response, Positivity, Openness and Profitability.

Our in-house testing and commitment to product development ensures the doors remain at the leading edge of their class. Correct Specification, High Standard of Product and On-Time Deliveries are some of the key features to a successful project that we can achieve.

We hope this comprehensive product catalogue will help you in specifying the right LAMI product for each application.

LAMI DOORS BENEFITS OF LAMI DOORS

WATERPROOF

The pressure moulded encapsulated sandwichstructure of LAMI doors is built to be completely waterproof. LAMI doors will not rot, rust, swell or warp. LAMI doors will stay unaffected by continuous water and moisture even after decades of use. LAMI doors are free of timber or other organic materials that promote bacterial growth. Extended 25-Year Guarantee against water and moisture in normal usage.

CHEMICAL RESISTANCE – HYGIENIC

The non-porous smooth surfaces of LAMI doors make them extremely easy to clean. LAMI doors have excellent resistance to most detergents, solvents and other strong chemicals.

CORROSION FREE

LAMI doors will not rust. The excellent surface material of glass reinforced polyester will tolerate tough operational conditions.

LONG LIFE EXPECTANCY

LAMI doors are extremely strong and durable. They can withstand impact and heavy usage without denting. The results from the Hard Body Impact test have shown that LAMI doors belong to the best impact resistance test class.

LIGHT WEIGHT AND SAFE TO USE

LAMI doors weighs ca. 9 kg/m2 - this is less than half compared to a conventional door. The light weight nature makes LAMI doors safe and easy to use – even with larger sizes.

FIRE SAFETY

Fire rated LAMI doors are tested according to the newest European fire door standard BS EN 1634-1:2008 or according to the British Standard BS 476: Part 22. LAMI fire doors also have approvals and certificates in various other countries.

EASY INSTALLATION WITH CHOICE OF FRAME SYSTEMS

A wide range of frame systems are available to suit various wall constructions and jamb conditions. All frames compliment the features and benefits of the door in terms of hygiene, durability and aesthetics. Choices include our unique aluminium wrap around frame (which eliminates the need for sealant and architrave's), pressure moulded GRP frames and a range of stainless steel frames to suit the wall thickness.

CO-ORDINATED LOOK

LAMI doors are available in a wide range of colours and accessories. All doors have the same visual characteristics providing a co-ordinated look for building design.

SUSTAINABILITY AND USER SAFETY

LAMI doors have been classified in the best surface material emission class M1. LAMI doors are the First CE marked hygienic doors in Europe. Read more about certification on page 0.11.

LAMI DOORS

COMPREHENSIVE CARE

COMPREHENSIVE CARE

LAMI DOORS group offers its clients comprehensive care, from product advice and specification writing, right through to on-site installation and after-sales support. We are continually developing installation, maintenance, guarantees and recycling.

INSTALLATION

Every delivery of LAMI GRP doors includes comprehensive fitting instructions to assist installers in their correct installation. However, we recommend that installation of our doors should be carried out by our own fully trained installers who have long-term experience and are familiar with varying on site conditions. Further assistance can always be gained by calling your LAMI representative.

MAINTENANCE

Even in severe conditions, LAMI GRP doors will provide decades of trouble-free operation under normal use. LAMI GRP door leaves are practically maintenance free, however regular care and attention will ensure that the life of the door is extended to its optimum by predominately concentrating on fittings, locking arrangement and accessories. The correct tightness of fixing screws and the general condition of accessories should be inspected annually. In heavy use it is recommended to make more regular inspections.

Download Maintenance, Installation and Cleaning Instructions on our website:

http://www.lamidoors.com/en/products/maintenance

25 YEAR GUARANTEE AGAINST WATER

LAMI DOORS group guarantees the quality of their products and this guarantee is extended for a period of 2 years from the date of delivery for all their products under normal usage. In respect of water and moisture resistance, starting from 1st January 2012 we extended the guarantee for a period of 25 years from the date of delivery for LAMI GRP door leaves and frames excluding any accessories under normal usage. Details available on request.

OUR DOOR SPECIALISTS WILL HELP YOU TO FIND THE RIGHT KIND OF LAMI DOOR IN ALL APPLICATIONS

lamidoors@lamidoors.com
www.lamidoors.com

LAMI DOORS PRODUCT RANGE

Each LAMI doorset is manufactured to order. Door sizes, colours, ironmongery and other accessories are determined by client specification and manufacturer's recommendations.

LAMI product range includes Single Action Doors, Double Action Doors and Sliding Doors with performance options of Fire resistance, Acoustic insulation and Radiation protection. Our range compliments the features and benefits of the standard LAMI doors in terms of hygiene, durability and aesthetics.

The product codes of LAMI doors are defined by frame material, special properties required and by the door type. For example the product code 'F60/KMS Fire Doors, GRP Fire Frame' indicates that the door is 60 minutes fire rated, 'KMS' indicates the door to be a traditional single action door and 'GRP fire frame' indicates that the frame is made of glass reinforced polyester including fire rated core material.

MATERIAL OPTIONS FOR FRAMES

LAMI STEEL FRAMES

- · Powder Coated Steel in RAL Colours S/S Stainless Steel (AISI 304)
- S/S Acid Proof Steel (AISI 316)
- The high quality materials and finishing of LAMI steel frames – welded and polished corner joints - make the frames ideal and extremely hygienic for demanding

LAMI GRP FRAMES

- Standard Colour RAL 9016
- Over 1600 colour options from RAL-, NCS-. BS- ia Monicolor Colour Charts

Durable and extremely hygienic for materials and finishing.

LAMI ALUMINIUM FRAMES

Natural Anodised Aluminium

Adjustable aluminium frame for wall thickness from 68 to 256 mm, integral adjustable packers at fixing points to ease the installation. Integral white clip-on trim fully concealing the frame fixings.

LAMI ALUMINIUM FRAMES

- Powder Coated RAL 9016
- Over 1600 colour options from RAL-, NCS-, BS- ja Monicolor Colour Charts

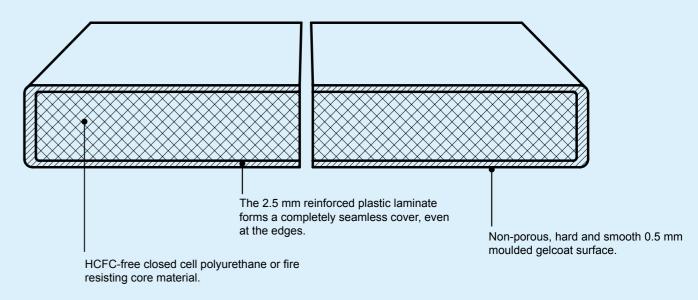

Adjustable aluminium frame for wall thickness from 68 to 256 mm, integral adjustable packers at fixing points to ease the installation. Integral white clip-on trim fully concealing the frame fixings.

LAMI DOORS STRUCTURE OF A LAMI DOOR

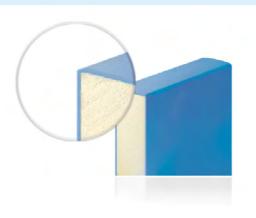

THE CROSS SECTION OF PRESSURE MOULDED LAMI GLASS REINFORCED POLYESTER DOOR

LAMI doors are manufactured using a pressure moulding process. This process produces a door leaf that is completely seamless and has no joints or lippings.

The smooth and easy to clean surfaces of LAMI doors will not harbour dirt or bacteria which are transmitted by touch or by airborne particles. The non-porous smooth gelcoat surfaces of LAMI doors can also withstand the strongest disinfectants and cleaning agents.

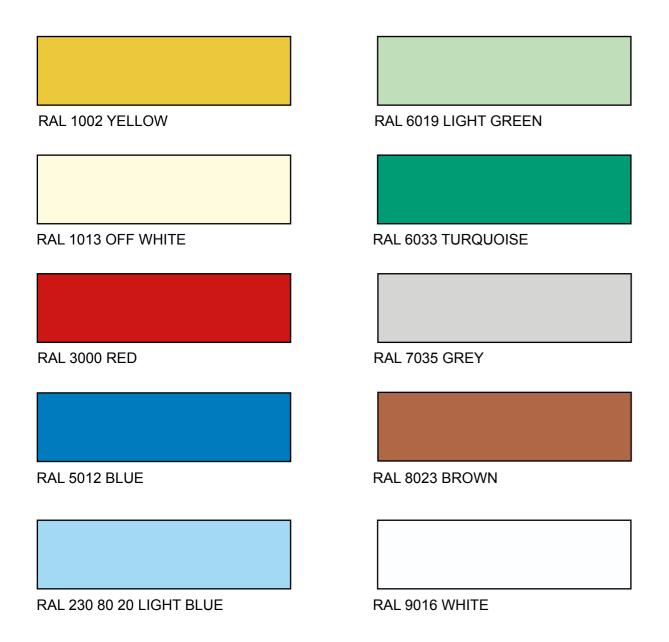

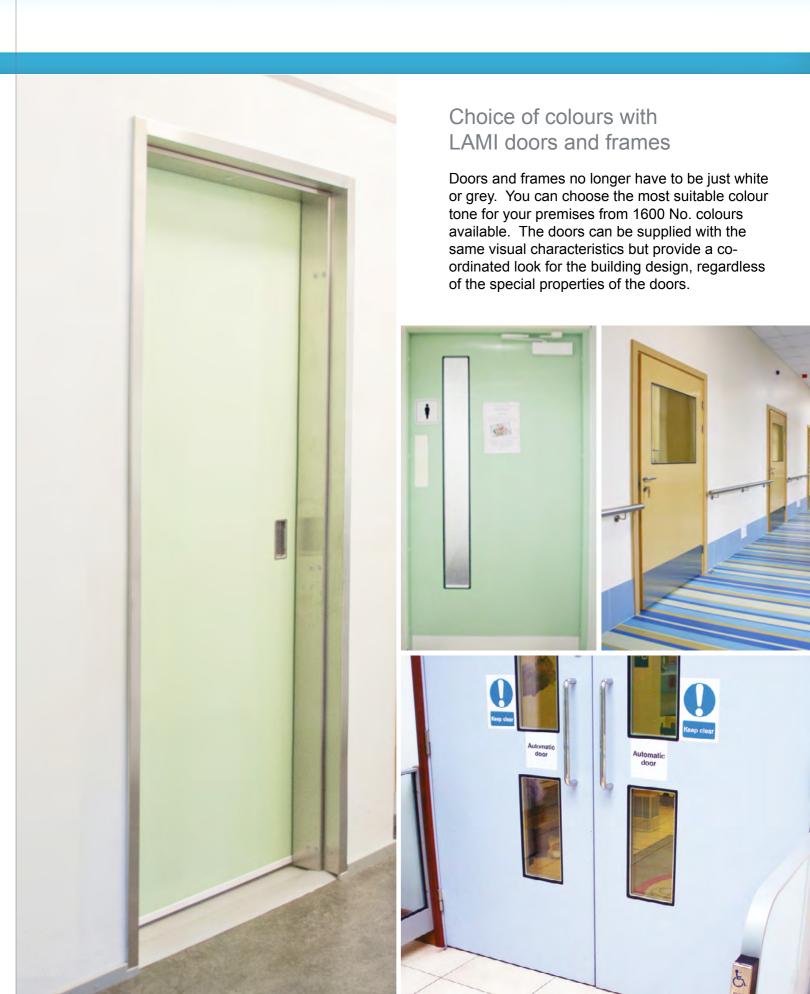

LAMI DOORS LAMI DOOR AND FRAME COLOURS

0.05 04/15

In addition to this colour chart there are 1600 No. colours available according to RAL, BS and NCS colour charts. Standard colours for LAMI GRP doors are according to RAL colour chart below:

The colour tones seen below may differ from actual RAL colours due to printing / screen quality. LAMI products will have accurate RAL colour finish.

LAMI DOORS CERTIFICATIONS

0.11

LAMI DOORS CE MARKING

Emergence Address

For a part of the part

LAMI doors have the European Technical Approval, ETA-13/0625, issued by EOTA and VTT Expert Services Ltd.

LAMI doors are the first CE marked internal doors and internal fire doors for hygienic and clean rooms.

Further Information: Tel. +358 20 728 1828 lamidoors@lamidoors.com We are continually testing LAMI doors and frames to be able to provide even better quality, safety and comprehensive products for our clients. We only use testing laboratories approved by the EU Directives.

Standards and Certificates

During the years LAMI doors and their accessories have been developed and tested constantly (VTT Building Technology Certificate). It is of the utmost importance to us to provide high quality and maintenance-free products to our clients.

LAMI F30/F60/F120/F240 fire rated door systems have been tested to BS EN 1634-1:2008 or BS 476:Part 22. In addition all LAMI GRP doors are certified by VTT Building Technology.

LAMI doors' Product Certificates

LAMI GRP doors VTT-C-7149-11

The best surface material emission class M1

LAMI doors have been classified in the best surface material emission class M1. Finnish Building Control has granted LAMI doors the best M1 Emission Classification of Building Materials. M1 stands for low emissions. The aim of the classification is to enhance the development and use of low-emitting building materials.

Chemical Resistance/Cleanability and Influence of Moisture Tests

VTT Building Technology has tested LAMI doors according to 'Chemical Resistance/cleanability' (DIN 68861-1/EN 14688) and 'Influence of moisture' (EN 317).

LAMI DOORS group continues to research and test properties such as sound reduction, fire rating, x-ray protection, hygiene as well as resistance to chemicals for even better sustainability.

The CE marking indicates a product's compliance with EU legislation and so enables the free movement of products within the European market. By marking the product, manufacturer declares, on his sole responsibility, that the product meets all the legal requirements for the CE marking.

External pedestrian doorsets must have been CE marked since 01.07.2013 at the latest. However, the CE marking is based on harmonized product standard (hEN) and not all products must bear the CE marking if the harmonized product standard is still missing. The CE marking is required for product categories mentioned in specific EU directives on the CE marking.

If a product does not fall within the scope of a harmonised product standard (hEN), it is not required to have a CE marking. The manufacturer may still acquire a CE marking for the product through the European Technical Approval (ETA) like LAMI doors has done.

The Declaration of Performance (DoP) is a requirement for obtaining a CE marking for a product. The manufacturer draws up the Declaration of Performance according to an European Technical Approval (ETA). The Declaration of Performance lists all values regarding product properties that are required to meet the official regulations.

Download DoP documents and ETA-13/0625:

LAMI doors are the first CE marked internal doors and internal fire doors for hygienic and clean rooms

LAMI DOORS

COMPANY VALUES AND ENVIRONMENTAL POLICY

LAMI

0.12

LAMI DOORS **GOOD MANUFACTURING PRACTICE**

The operations of LAMI DOORS group are based on company values and vision as well as on quality. For maintaining and creating longterm client relationships, we will provide and develop the quality of our products and services at all levels of the organisation. We offer comprehensive, high quality and flexible solutions for our clients.

COMPANY VALUES ARE:

- Customer Satisfaction
- Positivity
- Flexibility
- Profitability

- Job Satisfaction
- Openness
- Fast Response

ENVIRONMENTAL POLICY

LAMI DOORS group contributes to protect the environment by developing and producing innovative and sustainable door solutions. Even in severe conditions, LAMI GRP doors will provide decades of trouble-free operation under normal use. All the products manufactured by LAMI DOORS group are packaged in eco-friendly and recyclable materials.

LAMI DOORS group is committed to enhance awareness of European environmental legislation, regulations, British Standards and Good Manufacturing Practice. We are proud to acknowledge that the VERY FIRST LAMI door manufactured in 1966 is still in use today.

RESPONSIBLE CARE- PROGRAM

LAMI DOORS group are participating in a voluntary 'Responsible Care' program of the chemical industry – global initiative in health, safety and environmental issues. The aim of this program is to ensure that operations comply with the guidelines of sustainable development in terms of the environment, health and safety. LAMI DOORS group and other companies participating in this program are committed to improving their operations on a continuous basis so that issues relating to the environment, safety and health receive due attention. The companies are also committed to developing their products and processes in a way that enhances the well-being of the whole society. The basis of Responsible Care program lies in stakeholder-level cooperation and openness.

Further information on Responsible Care program is available on our website lamidoors.com and http://www.chemind.fi

LAMI DOORS group follows various legislations and regulations as well as Good Manufacturing Practise requirements having approvals and certificates in a variety of Countries.

During the years LAMI doors and their accessories have been developed and tested constantly (VTT Building Technology Certificate). It is of the utmost importance to us to provide high quality and maintenance-free products to our clients.

Good Manufacturing Practice (GMP) requirements

LAMI DOORS group follows the Good Manufacturing Practice (GMP) requirements on all products as detailed in EudraLex - Volume 4 Good Manufacturing Practice (GMP) Guidelines and in its Annex 1 chapter 46 of Manufacture of Sterile Medicinal Products.

LAMI doors are free of timber or other organic materials that promote the bacterial growth. The encapsulated door structure and smooth surfaces of LAMI doors make them extremely easy to clean and will not harbor dirt or bacteria. The surfaces can also withstand the strongest disinfectants and cleaning agents.

The best surface material emission class M1

LAMI doors have been classified in the best surface material emission class M1. Finnish Building Control has granted LAMI doors the best M1 Emission Classification of Building Materials. M1 stands for low emissions. The aim of the classification is to enhance the development and use of low-emitting building materials.

Further information on Emission Classification is available on website https://www.rakennustieto.fi/index/english/emissionclassificationofbuildingmaterials.html

LAMI F30/F60/F120/F240 fire rated door systems have been tested to BS EN 1634-1:2008 or BS 476:Part 22. In addition all LAMI GRP doors are certified by VTT Building Technology.

For more information about standards and certificates, please do not hesitate to contact us.

The F30/F60/KRS single action hinged fire rated doorsets consist of a pressure moulded Glass Reinforced Polyester (GRP) doorleaf with a fire resisting core material, hung on a highly durable stainless steel frame. Designed for use in harsh environmental and operational conditions demanding strength combined with hygienic properties. Tested for fire rated applications up to 60 minutes fire resistance. Suitable for fitting to brick or block openings. Can also be fitted to insulated panels, partitioning systems and plasterboard walls.

Typical Applications:

- Hospitals and Animal Clinics
- Pharmaceuticals, Laboratories and Cleanrooms
- University Research Facilities
- Schools, Nurseries and Care Homes
- Spas, Swimming Pools and Leisure Centres
- · Hotels, Restaurants and all Commercial Kitchens
- Supermarkets and all Food Preparation Areas
- Chemical and Electrical Industry and Warehouses
- Water Treatment and Agricultural Buildings

YOUR OWN DESIGN

The RTG/KMS single action hinged X-Ray protective doorset consists of a pressure moulded Glass Reinforced Polyester (GRP) doorleaf with a X-Ray resistant lining to the user defined lead rate, hung on a GRP frame with an equal lead rate. Suitable for fitting to brick or block openings. Can also be fitted to insulated panels, partitioning systems and plasterboard walls.

Key Features

- Radiation protection to the user defined lead rate (up to 4 mm)
- Non-porous, waterproof, seamless structure, even at the doorleaf edges
- Void of all organic material and steel eliminating the risk of rot, rust or
- Exceptionally lightweight and strong, making the door safe and easy to use

Typical Applications

- Designed for use in areas primarily requiring the containment of radiation emissions
- Medical: Radiation Departments, X-Ray Rooms, Dental Surgeries, Laboratories
- Research-Industrial: Laboratories, Production Areas, Cleanrooms
- Educational: University Laboratories and Research Facilities

YOUR OWN DESIGN

The KSR stainless steel covered and framed doorsets are suitable for applications where the doors have to be water and moisture proof, durable, hygiene, lightweight and serviceable. There is a traditional pressure moulded, seamless LAMI GRP door leaf inside the steel cover. The 304/316 grade steel covered LAMI door is an excellent choice in applications where you want to have the appearance of steel.

Typical Applications:

- Hospitals and Animal Clinics
- Pharmaceuticals, Laboratories and Cleanrooms
- University Research Facilities
- Schools, Nurseries and Care Homes
- Spas, Swimming Pools and Leisure Centres
- Hotels, Restaurants and all Commercial Kitchens
- Supermarkets and all Food Preparation Areas
- Chemical and Electrical Industry and Warehouses
- Water Treatment and Agricultural Buildings

YOUR OWN DESIGN

The KH double action hinged personnel doorset consists of a polyurethane foam filled pressure moulded Glass Reinforced Polyester (GRP) doorleaf hung on an aluminium wrap around frame system. Designed especially for fitting to insulated panel wall systems used in cold rooms. Can also be fitted to partitioning systems and plasterboard walls. Does not require any subframe.

Typical Applications:

- Cold Rooms in Food Industry, Supermarkets, Restaurants and Commercial Kitchens
- Meat Preparation Premises
- Fish Preparation Premises
- · Dairies and Bakeries
- Other Applications

YOUR OWN DESIGN

The SV double action hinged goods traffic doorset consists of a noninsulated 7 mm thick pressure moulded Glass Reinforced Polyester (GRP) doorleaf hung on a fully adjustable aluminium wrap around frame system. The door is lightweight, impact resistant, durable and flexible. Designed to resist impacts from heavy duty trolley traffic. Can be fitted to brick or block openings and most other wall materials.

Key Features

- Exceptionally lightweight but highly durable for ease of use especially in high traffic areas.
- Double swing hinges with optional self closing facility eliminating the need for closers.
- · Void of all organic material and steel eliminating the risk of rot, rust or distortion.

Typical Applications

- Supermarkets Food Industry
- Meat Preparation Premises
- Fish Preparation Premises
- Industry and Warehouses
- · Other Premises with heavy duty trolley traffic

YOUR OWN DESIGN

The automatic KLA sliding doorset consists of a polyurethane foam filled pressure moulded Glass Reinforced Polyester (GRP) doorleaf hung on a proprietary, automatic sliding gear. The automatic sliding gear can be tailored to the customer specification in terms of operation and actuation. Designed for non-fire rated applications.

Typical Applications:

- Hospitals and Animal Clinics
- Pharmaceuticals, Laboratories and Cleanrooms
- University Research Facilities
- · Schools, Nurseries and Care Homes
- Spas, Swimming Pools and Leisure Centres
- · Hotels, Restaurants and all Commercial Kitchens
- Supermarkets and all Food Preparation Areas
- Chemical and Electrical Industry and Warehouses
- Water Treatment and Agricultural Buildings

Automatic KLA Fire Rated Sliding Doors to be approved by local fire authorities. CE marking, certifications and approvals of LAMI doors, read more on page 0.11 or contact us!

TECHNICAL DETAILS

DOORLEAF

- 40 mm thick pressure moulded Glass Reinforced Polyester doorblade. Seamless with no lippings or laminations. Waterproof and lightweight.
- · HCFC-free PU rigid foam core material. Free of timber or other organic materials.

FRAME

 Adjustable aluminium frame for wall thickness from 68 to 256 mm. Integral adjustable packers at fixing points to ease the installation.

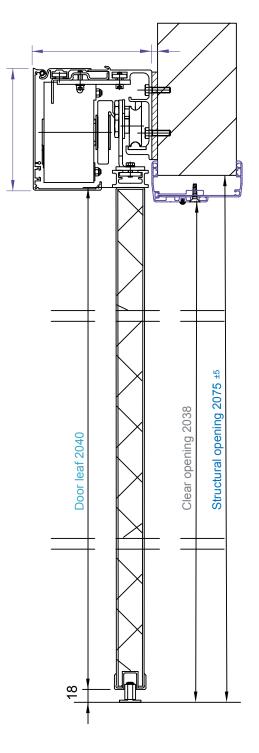

AUTOMATIC SYSTEMS

LAMI doors can be delivered with client specified automatic systems

Optional automatic systems for example:

- Abloy
- Besam
- Dorma

Automatic KLA sliding doors can be delivered/installed on site. Terms of delivery to be agreed.

LAMI GRP door set is a 'design' product; please add & specify your choice of vision panels, threshold, ironmongery etc. Hermetically sealing sliding door also available. See guidance in "ACCESSORIES & MORE".

YOUR OWN DESIGN

The manual RTG/KL x-ray sliding doorset consists of a polyurethane foam filled pressure moulded Glass Reinforced Polyester (GRP) doorleaf hung on an aluminium sliding track. The opening is lined with a fully adjustable aluminium wrap around frame system. The option of x-ray protection to the user defined lead rate (up to 4 mm) is provided with this door system. Designed for non-fire rated applications. Can be fitted to brick or block openings and most other wall materials.

Typical Applications

- Designed for use in areas primarily requiring the containment of radiation emissions
- Medical: Radiation Departments, X-Ray Rooms, Dental Surgeries, Laboratories
- Research-Industrial: Laboratories, Production Areas, Cleanrooms
- Educational: University Laboratories and Research Facilities

LAMI GRP door set is a 'design' product; please add & specify your choice of vision panels, threshold, ironmongery etc. Hermetically sealing sliding door also available. See guidance in "ACCESSORIES & MORE".

LAMI Strip Curtains

LAMI strip curtains are for use in door openings where due to high levels of traffic, including trolleys and forklift trucks, conventional doors would be inappropriate. LAMI strip curtains allow the free flow of traffic but at the same time protect the building against cold, wind and rain. They can also help to control noise and dust transmission. Strip curtains are custom made to the required door opening size. Manufactured from transparent PVC plastic, the material is suitable for use at temperatures down to -50° C on internal or external applications.

Key Features:

- Waterproof, shock resistant, flexible door construction
- Transparent, safe and easy to use, self-closing
- Good durability even at low temperatures
- Custom made to the required door opening size

Typical Applications:

Manufacturing: Industrial Production, Stock Premises, Non-heated and Chill Room Areas.

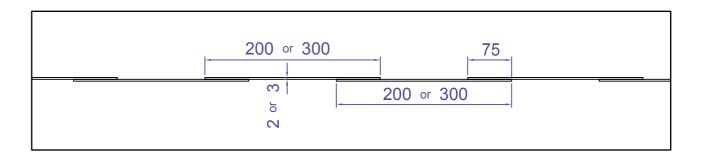

Stores and Markets: Chill Rooms and Stock Areas.

Agricultural Production: Stock Areas, Agricultural Buildings and Garages.

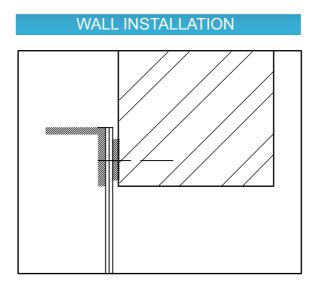

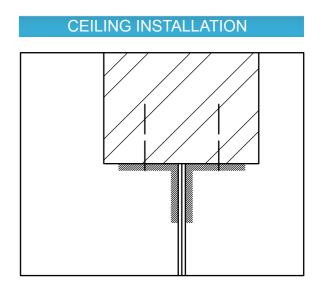

LAMI Strip Curtains

LAMI strip curtains comprise 2 or 3 mm thick transparent PVC strips (CF-50C) 200 or 300 mm in width. The strips overlap by 75 mm on to each other. The length of the strips will be matched to the customer's requirements and dependent on the door opening size.

LAMI strip curtains are hung on an aluminium profile carrier. Installation is by wall or ceiling fixing.

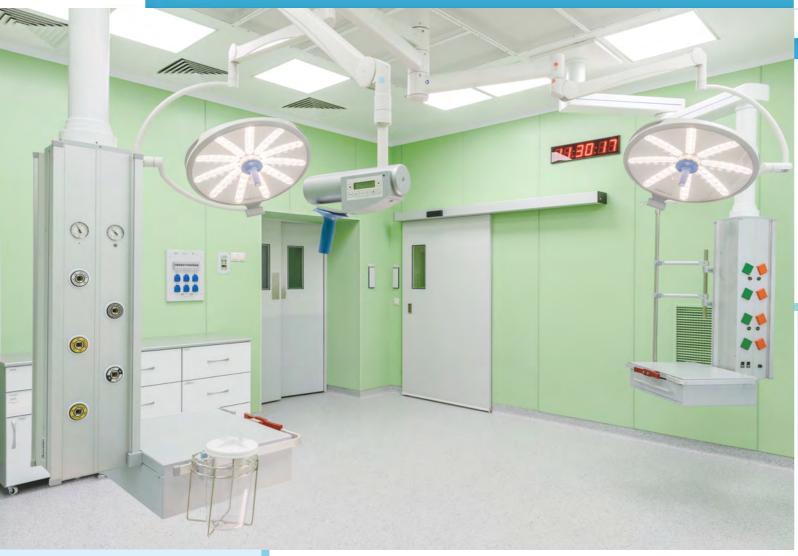

The cold crack of LAMI strip curtains is down to -50°C.

For applications where the strip curtains are exposed to exceptionally hard mechanical wear, heavier duty reinforced fabric PVC strips are also available.

Antimicrobial LAMI Doors

EXCELLENT BACTERIOSTATIC EFFECT

ANTIMICROBIAL DOOR SURFACE

SEAMLESS STRUCTURE

CHEMICAL RESISTANCE

HYGIENIC

WATERPROOF

CORROSION PROOF

LIGHT WEIGHT

SAFE TO USE

LONG LIFE **EXPECTANCY**

YOUR OWN DESIGN

The Antimicrobial LAMI doors have been designed for environments requiring the highest standards of hygiene, water and moisture resistance and wear resistance. Typical environments for the antimicrobial doors are public premises such as hospitals, schools and offices with a lot of pedestrian traffic.

The antimicrobial ingredient is built directly into the door leaf's surface material which inhibits the growth of a broad range of bacteria, mould and mildew and protects the door from damaging effects.

The antimicrobial feature is optional. On request all LAMI GRP door types, single action doors, fire rated doors, double action doors (except PK doors) and sliding doors can be specified with the antimicrobial feature.

Typical Applications:

- · Hospitals and Care Centres, Animal Clinics
- Pharmaceuticals, Food Industry, Laboratories and Cleanrooms
- Facilities with a lot of pedestrian traffic
- · Facilities requiring the highest standards of hygiene

BENEFITS OF ANTIMICROBIAL DOORS

The bacteriostatic effect of antimicrobial products has been tested according to the testing standard ISO/FDIS 20645.

The test results have proved, that the surface material of the Antimicrobial LAMI doors has an excellent bacteriostatic effect, specially against microbes like Staphylococcus aureus, Escherichia coli and Aspergillus niger.

- The antimicrobial protection is built into the Gelcoat surface of the door leaf. It is not water soluble and the protection will not wash or wear off.
- The antimicrobial ingredient inhibits the growth of bacteria, mould and mildew on the surface of the door and it provides further protection against contamination between the cleaning

LAMI Electric Cable Consoles

LAMI electric cable consoles enable both functionality and coordinated look for the building design. The LAMI product range includes the traditional electric cable consoles as well as fire rated F15 and F30 electric cable consoles tested according to European Standard EN 1634-1:2008.

Traditional electric cable consoles

- KAS SP
- KMS SP

Fire rated electric cable consoles:

- F15 KAS SP
- F30 KMS SP

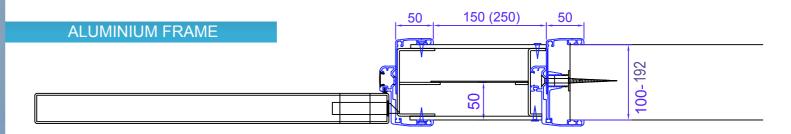

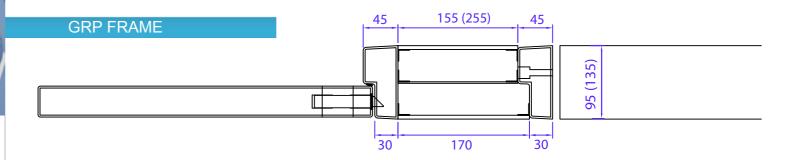

Tel: +44 161 924 2217 lamidoors@lamidoors.com www.lamidoors.com

Side panels can accommodate switches, controls etc – items which are normally wall fixed

When required a new panel can be easily placed to answer changing requirements

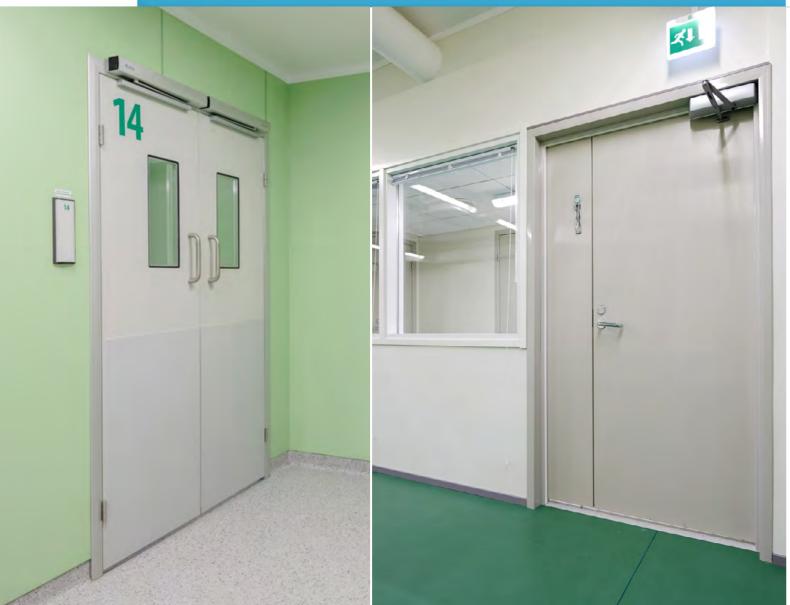

Traditional electric cable consoles available for aluminium frames and GRP frames.

Fire rated F15 and F30 electric cable consoles tested according to European Standard EN 1634-1:2008.

Door Closers and Automatic Opening Devices

LAMI doors can be equipped with various closer types and automatic operators. All to client specification.

There is a reinforcement inside the door leaf and frame for fixing of closers or devices with bolt through fixing.

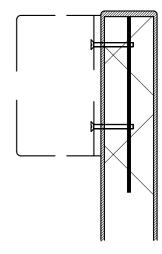

We wish to offer comprehensive solutions for our clients. Therefore we are pleased to supply them according to client specification.

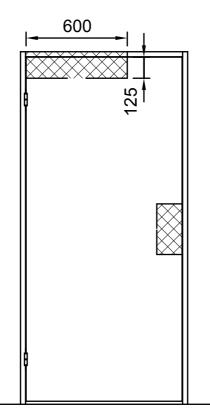

Options available for automatic opening devices for example:

- Abloy
- Besam
- Dorma

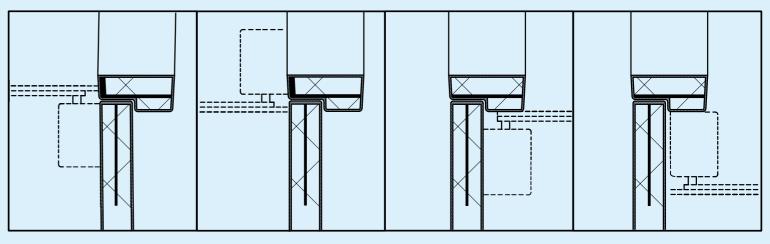

The fastening of the closer and opening device is carried out using 3 mm thick steel plate in the middle of the door leaf. The width and height are in accordance with the type of chosen

It is possible to include a reinforcement for a pull handle or door automation device or other ironmongery within the door leaf in order to enable a proper installation. The reinforcements are placed accordint to customer's choice/design.

The closer and opening devices can be fastened on the pull or the push side of the door leaf or the frame. Depending on the installation option reinforcements are included in the door leaf or frame for the screw fixing.

Fastening on the door leaf on the pull side

Fastening on the frame on the pull side

Fastening on the door leaf on the push side

Fastening the frame on the push side

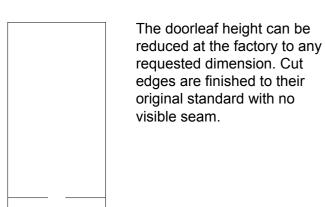

Non-Standard LAMI Doors

The standard doorleaf sizes of pressure moulded LAMI GRP doors are detailed in the table shown on the individual data sheets for each door type. Non-standard sizes can be provided by reducing or increasing doorleaf height and width or joining doorleaves together.

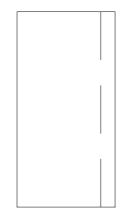

The doorleaf can be reduced either in height or in width without noticeable loss of the strength. However it is not recommended to reduce both height and width of the same doorleaf as it may affect its integrity.

Increasing doorleaf height and width or joining doorleaves together is best applied to the doorleaves with a polyurethane core. A minimal seam is visible on the face of the door, which is fully sealed with matching colour and material. The joints of the fire rated doors or sound insulation doors may require additional reinforcement visible to the perimeter of the doorleaf.

REDUCED DOORLEAF HEIGHT

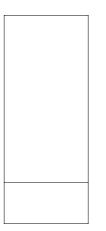

REDUCED DOORLEAF WIDTH

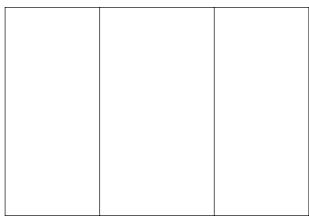

The doorleaf width can be reduced at the factory to any requested dimension. Cut edges are finished to their original standard with no visible seam.

INCREASED DOORLEAF HEIGHT AND WIDTH AND ADJOINED DOORLEAVES

The doorleaf height can be increased at the factory to any requested dimension using combinations of the standard and cut doorleaf sizes.

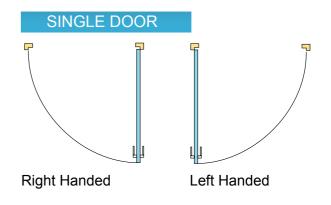

The doorleaf width can be increased at the factory to any requested dimension using combinations of the standard and cut doorleaf sizes. Because the doorleaves are lightweight by nature, whole doorleaves can be joined together to produce exceptionally wide sliding doors.

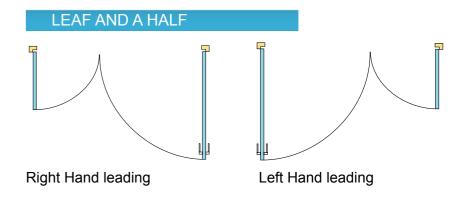

Handing

Handing states which direction a door opens. Handing references are shown below. Consider sliding doors for narrow and small spaces where hinged swing doors are not suitable.

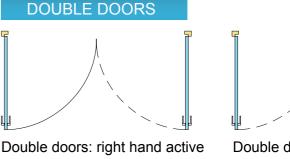

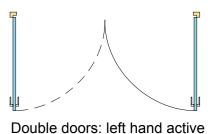

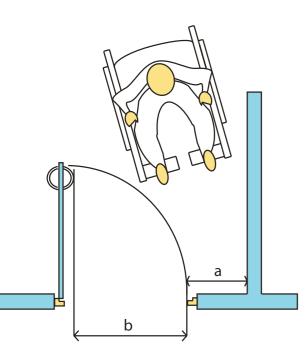

Tel: +44 161 924 2217 lamidoors@lamidoors.com www.lamidoors.com

LAMI symbol is a registered. The right to change reserved

Accessability

Light weight of GRP doors allow ease of operation with wider door panels. They can also accommodate a wide range of accessories to assist with operation. The extension of handles etc to the 'free' opening width should be considered.

Generally it is recommended and required that effective clear opening (b) should be at least 850 mm

according to UK DDA regulations.

Side clearance (a) to be at least 300 mm (may be reduced if door is opened by remote automatic control.

GRP - DOORS

Other Accessories

LAMI GRP door set is a 'design product'; majority of available door furniture is suitable. Door sets are fully factory fitted / prepared to accommodate specified accessories.

Installation, Maintenance and Recycling

LAMI DOORS have been designed for use in conditions where conventional door constructions and materials are unsuitable. Even in severe conditions, LAMI GRP doors will provide decades of trouble-free operation under normal use. Regular care and attention will ensure that the life of the door is extended to its optimum.

INSTALLATION

LAMI GRP doors are no more difficult to install than conventional doors, however it is vital that each door is fitted correctly to ensure optimum performance. Every delivery of LAMI GRP doors includes comprehensive fitting instructions to assist installers in their correct installation. Further assistance can always be gained by calling your LAMI representative. The fitting instructions can also be provided to assist architects at the design stage of a project.

MAINTENANCE

LAMI GRP doorleaves are practically maintenance free. They only require cleaning using any common cleaning agents and spirit based solvents. When pressure washed, take care to prevent the penetration of water through the fixing screws and between the frame and wall construction. Care and attention is predominately concentrated on fittings, locking arrangement and accessories. The correct tightness of fixing screws and the general condition of accessories should be inspected annually. In heavy use it is recommended to make more regular inspections. You can find specific maintenance instructions relevant to each LAMI door type on opposite page of this leaflet.

Every delivery of LAMI GRP doors includes comprehensive Cleaning Instructions. The document can also be downloaded from our Website: www.lamidoors.com

RECYCLING

Doors, frames and metallic parts can be recycled. Please contact the manufacturer for instructions. All the products manufactured by LAMI DOORS group are packaged in eco-friendly and recyclable materials.

Maintenance Instructions

The general condition of LAMI GRP doors should be inspected once a year. In heavy use it is recommended to make more regular inspections. A summary of general inspections as follows:.

SINGLE ACTION DOORS

- general condition of hinges, locks and accessories including tightness of screws
- vision panels and their fitting
- function and fixing screws of the closers
- frame fitting screws
- frame seals, condition and fixing
- condition and fixing of protection plates
- mechanical threshold seals, function and adjustment

DOUBLE ACTION DOORS

- general condition of hinges, locks and accessories including tightness of screws
- vision panels and their fitting
- condition and fixing of protection plates
- frame fitting screws
- frame seals, condition and fixing

The double swing door hinges do not require lubrication.

SLIDING DOORS

- functionality and fixing of the sliding gear, sliding track and stoppers
- condition of the sliding track cover including fixing screws
- functionality and fixing of the floor guide
- screw fixing of the accessories

The sliding gear does not require lubrication.
