

MEAEASY

Domestic Drainage | general Information

MEA[®]EASY 100

THE DRAINAGE SOLUTION FOR YOUR HOME

Your home and yard are your sanctuary from the world and the place you need to be able to relax and enjoy. Therefore proper drainage is important as standing water on the patio or lawn can make those areas unusable but it can also cause plant diseases.

The MEAEASY will help you to move water away from your house and yard and it will also stop the water entering your basement.

With MEA you are always on dry ground!

Planning

In order to enjoy your garden for a while some planning is required. It takes a proper subsoil for plants, bushes and flowers to flourish. And the same is true for your terrace or garden-path; a stable subsoil avoids annoying subsidence in which proper drainage plays an important role.

Climate

Due to our changing climate we are more frequently confronted with intense rainfalls. Excess water needs to be drained quicker today to avoid flooding.

Solution

MEA drainage systems are integrated easily in your garden plan. MEAEASY is a complete drainage system ideal for around the house. It is made from glassfibre reinforced polyester, which is a fully recycleble material. It is your choice to have a black or grey channel body

MEAEASY

offers many advantages:

- Non-toxic
- Extremely light
- Simple to transport in your own car
- Easy handling
- Practically unbreakable
- Resistant to acids, salts, oil, fuel and hot asphalt
- Wear resistant
- Frost, rust and heat resistant
- Excellent anchorage
- Removal of grate provides an unobstructed channel cross section for simple cleaning

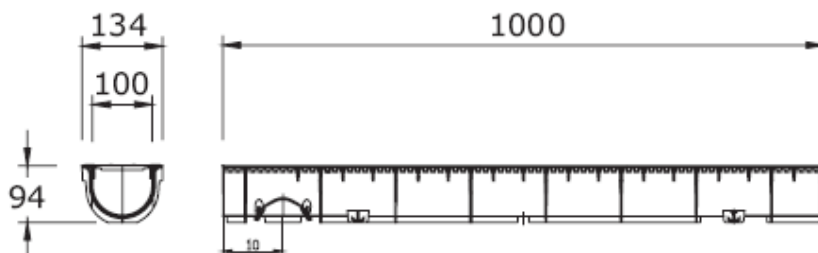

System

The drainage system has either a galvanized steel or ductile iron slotted grating and can withstand carloads*.

Accessories include :

- end cap for channel start or end including a preformed knockout for an outlet Ø50
- outlet connector for an Ø110 opening with 4 bolts mounted to the channel
- odour seal and dirt trap

** Installation in accordance with installation instructions*
