

Technical Data

Stairs, balustrades and handrails

Composition and manufacture

M & G Olympic's in-house CAD design team is happy to work with specifiers during the design stage of any project to produce initial designs and fabrication drawings, and will undertake site surveys and offer the benefit of its experience throughout a project.

Size and weight

All products are designed and manufactured to comply with current Building Regulations or to clients' specifications and designs.

Sitework

Experienced installation teams will undertake sitework and advise of the most effective methods of fixing to suit site and construction conditions. The company works closely with other trades to provide customers with complete turnkey solutions. Site surveys undertaken, full design and development using up-to-date CAD facilities.
