

Specification Sheet

Nation screen

The clear crime barrier

Transparent security screen available with a perforated steel gauze. Nationscreen is a near-invisible protective barrier for vulnerable windows, particularly suitable where an unobtrusive solution is a priority.

SIZE RANGE:

Minimum width: 250mm
Minimum height: 250mm

Maximum width x Maximum height
2300mm x 1295mm or
1295mm x 2300mm

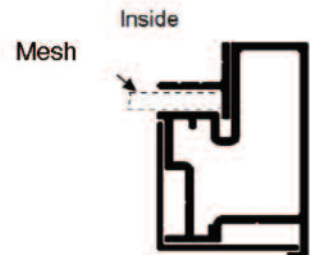

CONSTRUCTION:

FRAME

Description: Assembled from three aluminum extrusions the frame neatly and securely holds the screen in place

Dimensions: 35mm wide x 50mm deep

Standard colours: As standard the frame is powder coated white (RAL 9010) but can be powder coated any RAL or BS colour for a surcharge

SCREEN - MESH

Description: 2mm thick galvanized steel sheet with a matrix of perforations which provides 60% vision
Standard colours: Powder coated black (RAL 9005)

INSTALLATION OPTIONS:

Extremely versatile Nationscreen can be reveal or face fitted onto many different surfaces both internally and externally.

LPS 1175 compliant

The installation will only comply with LPS 1175 if the product is fitted to steel, brick, concrete or hardwood timber.

Non compliant

The Nationscreen can be fitted to softwood, aluminum or plastic windows and doors but the installation will not comply with LPS 1175.
