

Technical Data

Nu-Heat UK - Heat pumps: ground source

Composition and manufacture

There are several GSHP models available through Nu-Heat with outputs ranging from 5kW to 50kW covering small domestic to large commercial uses.

Sitework

Nu-Heat designs, supplies and commissions all heat pump systems. The units are supplied with a complete package of ancillary parts and installation manuals; they carry full parts and labour warranties and require no scheduled maintenance. Nu-Heat provides ongoing, unlimited technical support for installers and end users.
