CORBELS

## Arches

Arches are used to span an open space to allow for additional natural lighting. As well as creating a pleasing feature, they are also effective ways to disguise extensions, beams and room dividers.

All our arches are individually manufactured and designed to fit any size, shape or style, and to grace pilasters, columns or corbels. So whether you require a semi-circular Roman arch, a narrow pointed Gothic arch or any other design, your every need can be accommodated.

ARCHES
