# MARMAX RECYCLED PRODUCTS

## EDUCATION BROCHURE

### PRICELIST

*New products now available!*

**HEAVY DUTY  
PICNIC BENCH**

**MANUFACTURING  
RECYCLED PLASTIC  
FURNITURE SINCE 1998**

**Marmax Products are an award winning UK manufacturer of outdoor furniture, play equipment, planters, fencing and Special Educational Needs equipment made from 100% recycled plastic, which was once milk containers. We have a recognised reputation in the UK and abroad for manufacturing high quality products to the care industry.**

Being outdoors is beneficial to everyone; it keeps us fit and healthy, it gets us exploring and gets us socialising and relaxing. It is especially beneficial, not just for patients, but for staff as well. Bringing patients outdoors can help their quality of life, it can help them socialise with other residents and enjoy the view. It can also be a place where families come together to enjoy the outdoors and take time out to share memories. Staff can also benefit from being outdoors; getting fresh air, taking a break or just to watch the patients have fun.

Not only can being outdoors be beneficial to adults, it is also beneficial to children, especially children who have to stay in hospital. Play is a way that children make sense of the world around them; by making up stories, games and even making new friends. It also helps them to express their feelings and worries, to help them understand what is happening to them, to cope with any treatment they may be receiving and being able to continue to have the aspect of a normal life.

Here at Marmax Products, we have the perfect outdoor products to make this a reality. So if you have a garden area in your care home, hospice or hospital, or a breakout area for staff, our maintenance free, 100% recycled plastic outdoor products are suitable for all. Our products are maintenance free, do not rot, corrode or splinter and come with a 25 year construction guarantee. What's more, the products do not require any staining or varnishing; just wiping down with a cloth or jet wash and they will look brand new.

Marmax are proud to be part of reducing plastic waste in the ocean, which is becoming a huge problem. The average person drinks approximately 144 pints of milk per year and each milk container can be recycled, but unfortunately ends up being dumped in either landfill sites or in our ocean, which harms sea life. Each milk container takes approximately 450 years to decompose, but then it does not disappear altogether. It breaks down into smaller and smaller pieces, called microplastics, which is potentially more harmful than the full product as sea life end up eating the microplastics. This can then have a drastic impact to us as we will then end up on our plates. By manufacturing our maintenance free outdoor products, we are helping to save the planet, the sea life and our oceans while providing customers with robust, award winning products that people can appreciate for generations to come.

*M. Grant*

Matthew Grant, Director, Marmax Products.
