

PREMIUM CYCLE RACKS RANGE

British-Engineered Solutions. Built for Efficiency & Longevity.

Our Premium Cycle Racks deliver exceptional space efficiency, robust construction, and architectural quality across a comprehensive range of storage solutions. From ground-mounted stands to high-capacity two-tier systems, each product is designed and manufactured in Britain to meet the demands of modern developments, where maximising capacity, user experience, and long-term durability are essential. Engineered by our in-house specialists, every rack combines precision manufacturing with thoughtful design, ensuring smooth operation, secure parking, and minimal maintenance. Whether specifying for residential, commercial, educational, or public sector projects, our design-first approach delivers reliable, space-saving solutions that integrate seamlessly into any environment while supporting active travel and sustainability targets.

- › **Bespoke British Manufacturing:** Designed, fabricated, and finished in-house for total quality control.
- › **Space-Efficient Design:** High-capacity solutions engineered to maximise bike storage without compromising accessibility.
- › **Modular & Scalable:** Flexible configurations to fit capacity requirements and site constraints.
- › **Architectural Design Support:** CAD drawings, technical specifications, layout plans, and site surveys provided to architects and specifiers.
- › **BREEAM-Aligned:** Manufactured using recyclable materials and responsible production methods.
- › **Engineered for Durability:** Heavy-duty construction designed to withstand demanding environments.
- › **Made in Britain:** Backed by a 10-year warranty.

PROJECT

Queens Quay, Bristol

At Queens Quay in Bristol, a £5.6m refurbishment led by Aberdeen Standard Investments and AWW Architects transformed a tired four-storey office block into a bright, modern workplace with best-in-class sustainability credentials, including BREEAM Excellent and WiredScore Platinum. As part of a full M&E and sustainability consultancy package, Method supported the creation of high-quality End Of Trip facilities complete with showers, changing rooms, and a dedicated cycle storage area in the basement.

As part of this high-spec facility, we supplied and installed 27 Premium Vertical Bike Racks, British-made, BREEAM-compliant, and finished in a custom RAL powdercoat. The racks were chosen for their space efficiency and ability to secure both wheel and frame, making them ideal for a compact, high-use cycle hub. We also provided Westminster Lockers with integrated bench seating built from moisture-resistant materials and finished in high-pressure laminate for durability and style to complement the bike storage. Together, these products deliver a functional, attractive, and future-ready cycle amenity that enhances the building's tenant experience and sustainability goals.

PROJECT

Citypoint, City of London

Built in 1967, Citypoint is a 36-storey building in the City of London that has served various roles throughout its history, including as the headquarters of British Petroleum. The first building in London to surpass the height of St. Paul's Cathedral, this once ground-breaking building holds iconic status amongst the city's skyline. Following extensive reconstruction work in the early 2000s, Citypoint is a holistic space with a 7,000 sq. ft. terrace, a 60,000 sq. ft. retail area, the city's largest health club, and excellent BREEAM status certification.

With thousands of people occupying the building daily, our team was called upon to provide them with highly specified bike storage solutions. After consulting with the architect and client team at length, it was determined that we would need to provide 250 cycle spaces for the project, utilising a selection of our Premium Freestanding Vertical Racks, Solo Vertical Racks, Equilibrium Stands and Folding Bike Lockers. With a sizeable open-plan interior available to work with, our designers were able to deliver a well-considered arrangement for the racks and lockers that would suitably complement the space's modern industrial look. A range of cycle pumps and repair stations were also installed throughout the property to facilitate safe cycling for the site's users and ensure a rounded end-of-journey facility.

PREMIUM SOLO VERTICAL CYCLE RACK

Engineered for premium spaces, the Premium Solo Vertical Bike Rack combines modern design with efficient bike storage. Its upright free-standing format eliminates the need for walls while offering secure, space-maximising layouts. Custom finishes and architectural styling make this rack the perfect fit for high-spec internal cycle stores.

Customisation that Works for You

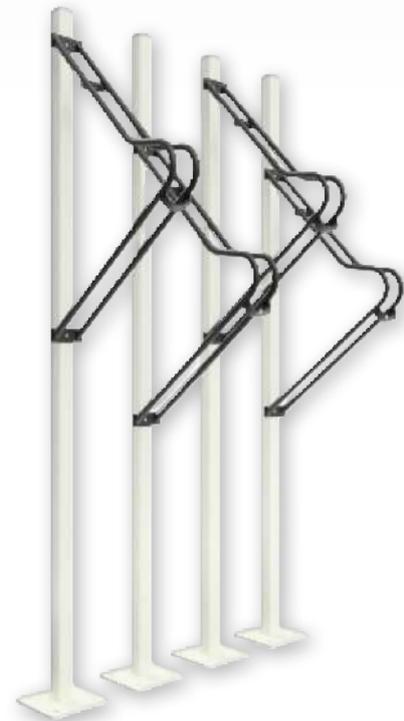

Every site is different which is why this rack is built to adapt:

- › Hot Dipped Galvanised to BS EN ISO 1461:2022 as standard
- › Polyester Powder Coated (RAL options available)
- › Frame and wheel locking points for BREEAM compliance
- › Freestanding fixing type with welded baseplate
- › 10-year warranty & Made in Britain
- › Constructed using welded CHS mild steel

PROJECT

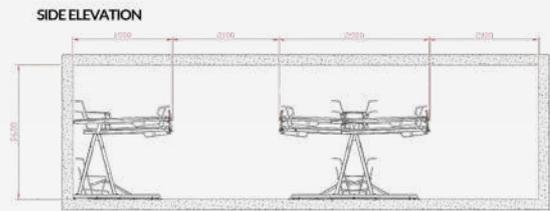

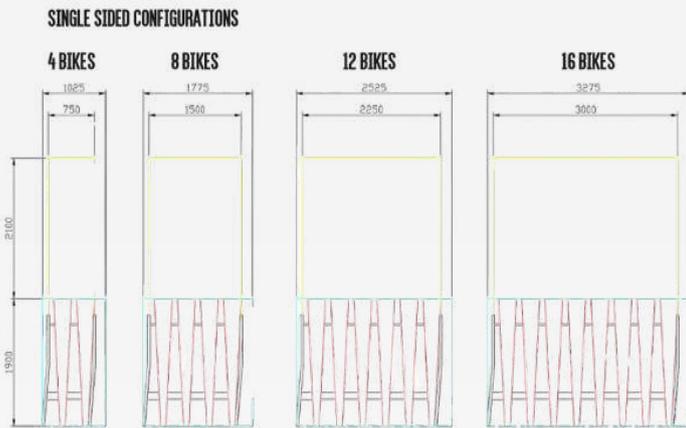

20 Gracechurch Street

20 Gracechurch Street is a contemporary postmodern commercial building in the City of London that previously served as the Barclays headquarters. Built-in 1992, the 17-storey property is now home to extensive office space alongside a retail area occupied by New Look and Itsu. A new internal cycle storage area was recently commissioned for the site to encourage uptake in cycling, and our team was entrusted with the installation's design, build and delivery.

With 20 Gracechurch Street being a beautifully fitted property, our team had to find a solution suitable for this prestigious location. After surveying the site and consulting with the client, we discovered that our premium bike rack range was best suited to the project. To this end, 70 Premium Solo Vertical Bike Racks and 20 Premium Vertical Bike Racks were manufactured, shipped, and installed by our team.

All powder-coated to a charming sapphire blue, this combination has not only delivered a premium feel to the cycle store but also enhanced the overall aesthetic of the property. Clothing lockers and square-frame oak timber benches were also installed to provide high-quality end-of-journey solutions for the client.

Bespoke centres to fit your exact specifications

PREMIUM TWO TIER CYCLE RACK

The Premium Two-Tier Cycle Rack is the ultimate for achieving excellent space saving bike storage whilst ensuring a usable system for your users. Offering superb usability and exceptional build quality, it has become the bike rack of choice for any area requiring high quality and high-density cycle storage such as stations, universities, shopping centres, car parks

Customisation that Works for You

Every site is different which is why this rack is built to adapt:

EQUILIBRIUM CYCLE STAND

Engineered for premium cycle storage, the Equilibrium Cycle Stand combines modern design with frame-friendly bike support. Its innovative saddle-rest system eliminates frame contact while accommodating any tyre width or mudguard configuration, making it ideal for high-value bikes and e-bikes in high-specification internal cycle stores.

Customisation that Works for You

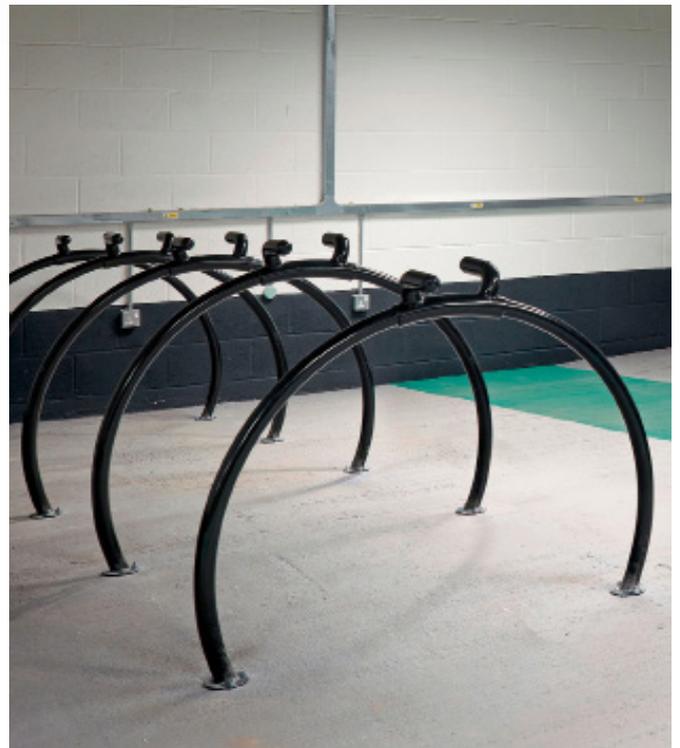

Every site is different which is why this stand is built to adapt:

- › Hot Dipped Galvanised to BS EN ISO 1461:2022 as standard
- › Polyester Powder Coated in any RAL colour available
- › Rubberised saddle-rest spigots for secure, frame-free bike support
- › Bespoke manufacturing tailored to your site requirements and dimensions
- › Full design consultation provided
- › 10-year warranty & Made in Britain
