

## **Technical Data**

### **Composition and manufacture**

Aluminium gutters and pipes are produced from extruded, pressed and cast aluminium from approved suppliers of quality raw materials only. Finished products conform to BS 2997:1958, and in most cases, exceed BS requirements.

### **Size and weight**

Both gutters and pipes are supplied in lengths up to 3m. Standard products range from 1.6mm thick for 63mm diameter pipe, 3mm thick for 150 x 100mm extruded moulded-ogee gutter, and approximately 7mm thick for cast products, such as collars and radius gutters.

### **Appearance**

GutterCrest products can be supplied in mill finish or polyester powder coated. Most BS and RAL colours can be obtained, with further options for a small range of metallic colours.

### **Sitework**

GutterCrest's technical services department can offer assistance with the style and design of a complete disposal system, whether standard or bespoke products are required.
