

Technical Data

Reflex-Rol - Internal blinds: roller

Composition and manufacture

Hardware in anodised aluminium, facilitates powder coating to almost any RAL colour required. Shading materials: translucent in aluminium, copper or bronze, blackout in Silver/White or Silver/Black.

Size and weight

Shading material thickness of just over 0.18mm and weight of 105g/m² permit the smallest possible headboxes:

40 x 47mm, maximum drop 2,200mm;

40 x 60mm, maximum drop 3,200mm;

67 x 70mm, maximum drop 5,800mm.

Operation and control

Units motorised with Reflex-Rol's own 24V Romo-Eeprom system are controlled by a micro-processor chip that allows for some of the industry's most advanced wiring configurations and options.
