

RICHMOND CYCLE SHELTER

Premium Architectural Cycle Storage

The Richmond Cycle Shelter is a premium bike storage solution developed for high-quality urban environments. Designed to complement modern developments, the shelter combines robust construction with refined detailing to deliver secure, weather-protected cycle parking without compromising architectural intent. Fully customisable and manufactured in the UK, the Richmond is suitable for commercial, residential, education and public-realm schemes requiring a specification-ready, long-term solution. Designed for flexibility, the shelter can be configured with either Sheffield stands or two-tier cycle racks to meet varying capacity and accessibility requirements. A choice of roofing materials and side panel options allows the shelter to be tailored to both functional needs and visual context. The Richmond Cycle Shelter delivers dependable performance, sustainability, and premium finish at scale.

- › **Fully Customisable Design:** Bespoke length, width, and height to suit site constraints and project requirements
- › **Open, Accessible Canopy Design:** Provides clear sightlines and easy user access while delivering effective weather protection
- › **Urban-Ready Aesthetic:** Clean structural detailing designed to complement contemporary developments and sensitive public-realm settings
- › **Flexible Racking Options:** Compatible with Sheffield stands or two-tier cycle racks for scalable capacity
- › **Premium Roofing Options:** Choice of steel, polycarbonate, or glass roofing panels
- › **BREEAM-Aligned Solution:** Supports sustainable transport and building performance targets
- › **British Manufactured:** Designed and fabricated in-house for quality control and reliability

RICHMOND CYCLE SHELTER

The Richmond Cycle Shelter is a premium, British-manufactured bike storage solution designed for high-quality commercial, residential, and public-realm environments. Featuring a refined structural form and open-access canopy, the shelter supports flexible rack configurations, including Sheffield stands and two tier cycle racks - this shelter balances robust performance with a clean, architectural aesthetic.

Customisation that Works for You

Every site is different which is why this shelter is built to adapt:

- › Mild steel construction, hot dip galvanised to BS EN ISO 1461:2022
- › Powder-coated finish available in any RAL colour
- › Heavy-duty structural steel framework
- › Modular, infinitely extendable design
- › Optional access control and locking solutions
- › Designed for seamless integration with surrounding architecture
