RonaGrip Instant Nosing

(Formerly Ronadeck Instant Nosing)

Slip resistant stair nosing

Description

RonaGrip Instant Nosing is a preformed fibreglass profile constructed of combining polyester resins with fibre reinforcement.

Two types of grit surface are available. Type 'I' with its smaller grit size, offers good slip resistance whilst allowing the surface that is reasonably easy to clean. Type 'E' with a much heavier grit profile is ideal for the rigors of the external environment.

RonaGrip Instant Nosing has been developed as a cost effective, long term solution to the obligations under the Disability Discrimination Act Part III and in particular, the sections relevant to the partially sighted.

In order that the obligations are satisfied, in essence, all stairs accessed by members of the public should have a contrasting coloured nosing fitted to the step edges in addition, such nosings should provide a slip resistant top surface.

With its patented feathered edge, RonaGrip Instant Nosing can be fitted to almost any step without creating a trip hazard. Even when fitted to landings and extra deep steps, its unique design provides the most secure solution.

Uses

- Internal and external use
- Suitable for industrial, commercial and retail use
- Emergency slip resistant solution

Doc Ref: RONC 140.1 20th May 2010

Benefits

- Highly slip resistant
- Easy to apply
- Can be trafficked instantly
- Hard wearing and durable
- Installed in virtually any environment
- Corrosion resistant

Key Performance Indicators

- Extremely hard wearing and durable
- Can be opened to traffic immediately after installation

Project references include:

Football Stadia
Industrial warehouses
Office buildings
Railway Stations

Specification Clause

The slip resistant nosing shall be RonaGrip Instant Nosing or RonaGrip Instant Nosing Glow by Ronacrete Ltd, tel. +44 (0) 1279 638700. The adhesive shall be RonaGrip Instant Adhesive MP10. Apply in accordance with manufacturers instructions.

Application

Preparation

Prepare the surface and ensure that it is clean and free of any loose or friable material that can effect the adhesion.

Installation

Carefully place the RonaGrip Instant Nosing onto the edge of the stair. Once in place mechanically fix with 30mm Self Tapping Screws.

Packaging

RonaGrip Instant Nosing and Nosing Glow are available in two different sizes. The 70mm x 30mm profile would normally be used on existing structures. The 55mm x 55mm version should be used on new structures which are subject to current UK Building Regulations as applicable from May 2004.

RonaGrip Instant Nosing and Nosing Glow are supplied in 4 lengths. The standard sizes are 750mm, 1000mm, 1500mm and 3020mm.

A free cutting service is available to meet project requirements.

Health And Safety

Non-hazardous. Protective clothing such as goggles, overalls and gloves is recommended to prevent any effect from prolonged skin contact, inhalation or ingestion of RonaGrip Instant Adhesive MP10. Refer to Health and Safety Data Sheet.

Site Attendance

When on site Ronacrete representatives are able, if asked, to give a general indication of the correct method of installing a Ronacrete product. It is important to bear in mind that Ronacrete Ltd is a manufacturer and not an application contractor and it is therefore the responsibility of the contractor and his employer to ensure he is aware of and implements the correct practices and procedures to ensure the correct installation of the product and that liability for its correct installation lies with the contractor and not with Ronacrete Ltd.

RonaGrip Instant Nosing Glow

(Formerly Ronadeck Instant Nosing Glow)

Glow in the dark slip resistant stair nosing

Description

RonaGrip Instant Nosing Glow is a preformed fibreglass profile constructed of combining photoluminescent resins with fibre reinforcement.

Two types of grit surface are available. Type 'I' with its smaller grit size, offers good slip resistance whilst allowing the surface that is reasonably easy to clean. Type 'E' with a much heavier grit profile is ideal for the rigors of the external environment.

These surfaces are charged by normal illumination e.g. daylight or fluorescent light and omit a glow as soon as the natural light source is interrupted i.e. power failure, smoke obstruction or similar, providing excellent stair safety in emergency situations.

RonaGrip Instant Nosing Glow has been developed as a cost effective, long term solution to the obligations under the Disability Discrimination Act Part III and in particular, the sections relevant to the partially sighted.

During daylight hours RonaGrip Instant Nosing Glow still provides the normal contrasting coloured nosing.

Uses

- Internal and external use
- Suitable for industrial, commercial and retail use
- Emergency slip resistant solution

Benefits

- Highly slip resistant
- Easy to apply
- Can be trafficked instantly
- Hard wearing and durable
- Installed in virtually any environment
- In the event of power failure, smoke obstruction or similar, will continue to provide a clear route

Key Performance Indicators

- Extremely hard wearing and durable
- Can be opened to traffic immediately after installation

Project references include:

Football Stadia
Industrial warehouses
Office buildings
Railway Stations

Specification Clause

The slip resistant nosing shall be RonaGrip Instant Nosing or RonaGrip Instant Nosing Glow by Ronacrete Ltd, tel. +44 (0) 1279 638700. The adhesive shall be RonaGrip Instant Adhesive MP10. Apply in accordance with manufacturers instructions.

RonaGrip Instant Stair Tread

(Formerly Ronadeck Instant Stair Tread)

Slip resistant stair tread

Description

RonaGrip Instant Stair Tread is a high quality composite of glass woven matting impregnated with polyester resin. The energy absorption and flexibility of RonaGrip Instant Stair Tread ensures its long life, even in the busiest of environments.

A compound of carbon and silicon grit is added in the final layer of the laminate providing a superb slip resistant and hard wearing surface.

RonaGrip Instant Stair Tread is resistant to a wide range of chemicals and is perfectly suited for use even in the harshest of environments.

The versatility of RonaGrip Instant Stair Tread allows it to be applied to almost any surface such as concrete, steel or wood. The fact that it is supplied as a finished product means that it can be walked on straight away thus keeping disruption to a minimum.

Uses

- Internal and external use
- Suitable for industrial, commercial and retail use
- Emergency slip resistant solution

Doc Ref: RONC 143.2 10 August 2010

Benefits

- Highly slip resistant
- Easy to apply
- Can be trafficked instantly
- Hard wearing and durable
- Installed in virtually any environment
- Corrosion resistant

Key Performance Indicators

- Extremely hard wearing and durable
- Can be opened to traffic immediately after installation

Railway Stations

Specification Clause

The slip resistant stair tread shall be RonaGrip Instant Nosing or RonaGrip Instant Stair Tread by Ronacrete Ltd, tel. +44 (0) 1279 638700. The adhesive shall be RonaGrip Instant Adhesive MP10. Apply in accordance with manufacturers instructions.

Application

Preparation

Prepare the surface and ensure that it is clean and free of any loose or friable material that can effect the adhesion.

Installation

Carefully place the RonaGrip Instant Stair Tread onto the edge of the stair. Once in place mechanically fix with 30mm Self Tapping Screws.

Packaging

RonaGrip Instant Stair Tread are available in a maximum 3000mm wide x 345mm deep with a 55mm yellow nosing incorporated into the tread and 55mm down the riser.

The product is nominally 4mm thick with the nosing set at 85°.

A cutting service is available to cut the RonaGrip Instant Stair Tread to your desired size on both the length and the depth.

RonaGrip Instant Nosing and Nosing Glow are supplied in 4 lengths. The standard sizes are 750mm, 1000mm, 1500mm and 3020mm.

A free cutting service is available to meet project requirements.

Health And Safety

Non-hazardous. Protective clothing such as goggles, overalls and gloves is recommended to prevent any effect from prolonged skin contact, inhalation or ingestion of RonaGrip Instant Adhesive MP10. Refer to Health and Safety Data Sheet.

RonaGrip Instant Safety Sheet

(Formerly Ronadeck Instant Flat Sheet)

Slip resistant flat safety sheet

Description

RonaGrip Instant Safety Sheet is a high quality composite of glass woven matting impregnated with polyester resin. The energy absorption and flexibility of the product, ensures its long life, even in the busiest of environments.

A compound of a special formula of grit is added in the final layer of laminate providing an excellent slip resistant and hard wearing surface.

RonaGrip Instant Safety Sheet is resistant to a wide range of chemicals and are perfectly suited for use even in the harshest of environments. Chemical resistance guides are available upon request.

The versatility of RonaGrip Instant Safety Sheet allows it to be applied to almost any surface such as concrete, steel or wood. The fact that it is supplied as a finished product means that it can be walked on straight away thus keeping disruption to a minimum.

Uses

- Internal and external use
- Suitable for industrial, commercial and retail use
- Emergency slip resistant solution

Doc Ref: RONC 144.2 10 August 2010

Benefits

- Highly slip resistant
- Easy to apply
- Can be trafficked instantly
- Hard wearing and durable
- Installed in virtually any environment
- Corrosion resistant
- Choice of size and colour
- DDA and Building Regulations compliant

Key Performance Indicators

- Extremely hard wearing and durable
- Can be opened to traffic immediately after installation

Project references include:

Walkways in airports
Food industry
Walkways in train stations

Specification Clause

The slip resistant flooring system shall be RonaGrip Instant Safety Sheet by Ronacrete Ltd, tel. +44 (0) 1279 638700. The adhesive shall be RonaGrip Instant Adhesive MP10. Apply in accordance with manufacturers instructions.

Application

Preparation

Prepare the surface and ensure that it is clean and free of any loose or friable material that can effect the adhesion.

Installation

Carefully place the sheet onto the adhesive. Once in place, mechanically fix into position using 30mm Self Tapping Screws

Packaging

Standard panel size is 2440mm x 1200mm x 4mm thick. A free cutting service is available to meet project requirements. The standard stock colours are black, yellow and stone. However, subject to minimum order quantities and extended delivery periods, any BS or RAL colour is available.

Health And Safety

Non-hazardous. Protective clothing such as goggles, overalls and gloves is recommended to prevent any effect from prolonged skin contact, inhalation or ingestion of RonaGrip Instant Adhesive MP10. Refer to Health and Safety Data Sheet.

RonaGrip Instant Ladder Rung

(Formerly Ronadeck Instant Ladder Rung)

Pre-formed GRP instant ladder rung cover

Description

RonaGrip Instant Ladder Rung is designed specifically to fit over traditional steel ladder rungs.

RonaGrip Instant Ladder Rung enhances ladder safety by enlarging the surface area for foot contact and friction coefficient with its integral grit surface.

Constructed from durable chemical resistant fibreglass, RonaGrip Instant Ladder Rung is capable of withstanding the busiest of environments and will resist chemical attack from corrosive fluids transferred from the sole of the boot.

Uses

- Internal and external use
- Suitable for industrial, commercial and retail use
- Emergency slip resistant solution

Doc Ref: RONC 145.1 20th May 2010

Benefits

- Highly slip resistant
- Easy to apply
- Can be trafficked instantly
- Hard wearing and durable
- Installed in virtually any environment
- Corrosion resistant
- Choice of sizes
- Suitable for industrial, commercial and retail use
- Cost efficient solution to ladder safety

Key Performance Indicators

- Extremely hard wearing and durable
- Can be opened to traffic immediately after installation

Project references include:

Fire escapes
Food manufacturing industry
Industrial warehouses

Specification Clause

The slip resistant ladder rung cover shall be RonaGrip Instant Ladder Rung by Ronacrete Ltd, tel. +44 (0) 1279 638700. The adhesive shall be RonaGrip Instant Adhesive MP10. Apply in accordance with manufacturers instructions.

Application

Preparation

Prepare the surface and ensure that it is clean and free of any grease that can effect the adhesion.

Installation

Carefully place the RonaGrip Instant Ladder Rung onto the rung of the ladder.

Packaging

RonaGrip Instant Ladder Run is available in 2 standard sizes. It is supplied in either 25mm x 25mm x 25mm or 38mm x 38mm x 38mm. The maximum length available is 1200mm. A free cutting service is available to meet project requirements. The standard stock colour is yellow.

Health And Safety

Non-hazardous. Protective clothing such as goggles, overalls and gloves is recommended to prevent any effect from prolonged skin contact, inhalation or ingestion of RonaGrip Instant Adhesive MP10. Refer to Health and Safety Data Sheet.

Site Attendance

When on site Ronacrete representatives are able, if asked, to give a general indication of the correct method of installing a Ronacrete product. It is important to bear in mind that Ronacrete Ltd is a manufacturer and not an application contractor and it is therefore the responsibility of the contractor and his employer to ensure he is aware of and implements the correct practices and procedures to ensure the correct installation of the product and that liability for its correct installation lies with the contractor and not with Ronacrete Ltd.
