

# SCUDO

*A freestanding and portable partition system for separating welding areas.*

**LEE**  
MODULAR STEEL WALLS

Scudo is a completely portable partition system designed for separating welding areas and shielding other areas in a factory environment.

Both all steel and vision panel options are supplied in black as standard. Vision panels are available as laminated glass, toughened glass or polycarbonate. All vision panels can be fitted with a UV filter to significantly reduce the amount of harmful light transferred through the glass. These filters are available in over 100 colours.

## Panel Sections

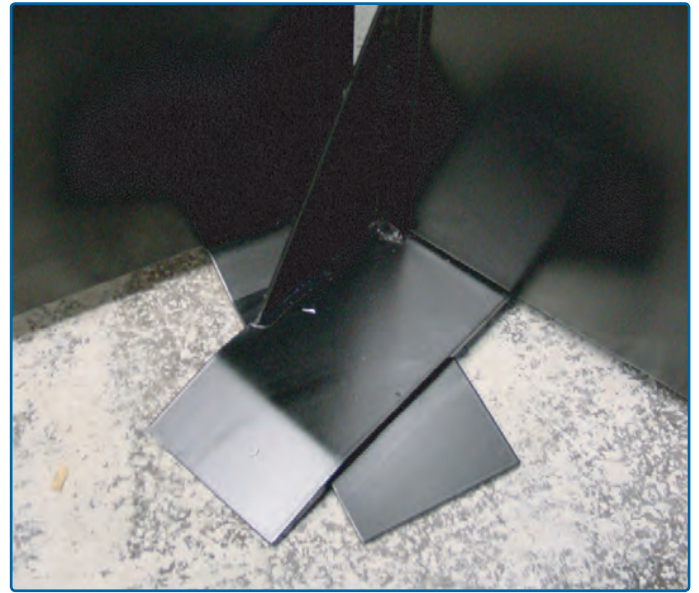

Available in: full steel and steel with a vision panel

## Dimensions (mm)

Scudo panels are normally 1510mm wide by 2022mm high

Vision Panel is normally 1050mm wide by 600mm high

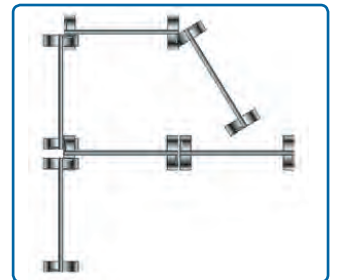

Scudo is a free standing, moveable partition ideal for separating welding areas.

## Finish

TGIC free, and lead free polyester powder coating: Available as standard in the distinctive RAL 9005 matt black, with an average coat thickness of 70 microns. Non-standard and corporate colours are also available upon request.

A wide range of layouts can be achieved to create separate areas in large spaces.

Vision panels are held with a strong rubber gasket. This means that replacing glass in the event of an accident is very straight forward.

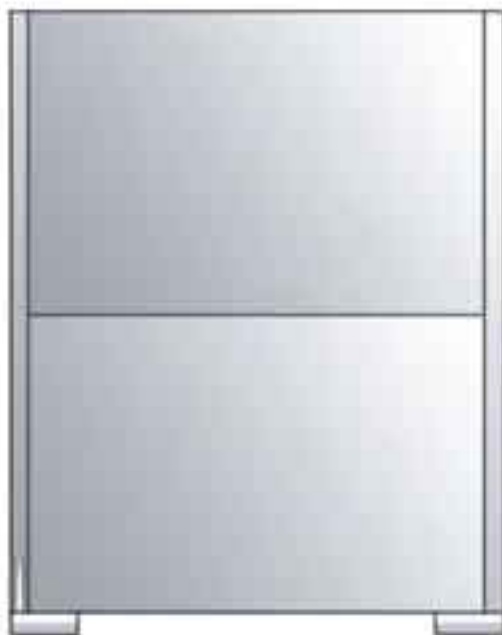

Scudo panels are supplied in four easily attached parts for ease of transport. Each panel comes complete with all the necessary fixings and detailed instructions.

# SCUDO WELDING PARTITION

## Panel Options

- 1 - All steel
- 2 - Steel with a vision panel
