

2 CHANNEL SHOWER CONTROL BOX

Low Voltage

SH07-002

The shower control system can be used for 1 or 2 showerheads. The control system will effectively give any standard showerhead automatic wave-on control. The shower control system also features a built-in purge control option to avoid stagnation. When a user waves their hand past the sensor (or pushes the tactile switch) the control system activates the solenoid valve and will run for a pre-set time before automatically closing the valve and stopping the shower.

PRODUCT NUMBER

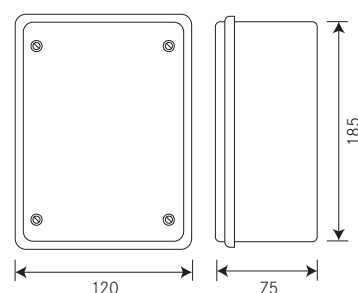

SH07-002	2 Channel Shower Control Box
----------	------------------------------

TECHNICAL DATA

Weight	1.1 kg
Material	Polycarbonate
Run Times	Please see instructions
Power source	6x AA Batteries
IP rating	54
Voltage	6/9V DC

For settings please refer to SH07-002 - 2 Channel Shower Control Box Instructions
