

2 CHANNEL BATH FILL CONTROL BOX

Low Voltage

SH07-021

The bath filling control system (SH07-021) can be used with wave-on or tactile switches. The half fill level is half that of the full fill which is adjustable. There are a number of kits available to suit a wide range of requirements. Benefits of the bath filling control system are similar to the shower control system except that it operates a single valve post thermostatic mixer, with the option of hot and cold if required. – Control box only – Complete with 6 x AA Batteries

PRODUCT NUMBER

SH07-021	2 Channel Bath Fill Control Box
----------	---------------------------------

TECHNICAL DATA

Weight	1.1 kg
Material	Polycarbonate
Run Times	Please see instructions
Power source	6x AA Batteries
IP rating	54
Voltage	6/9V DC
