Roof tiles: Heritage Service

Working in close partnership with organisations such as English Heritage and the National Trust, in addition to independent conservation bodies, Sandtoft's Heritage Service complements Sandtoft's extensive product range in cases where tiles and accessories are no longer available, and allows bespoke, hand-made roofing products to be designed and produced to order.

Manufacturing takes place under strict regulatory criteria, using skills and resources built up over many years. Examples include ornamental ridge, under-and-over, tegula and imbrex, Double Roman, Bambino, V-pantile, triple roll, vault tiles, peg tiles, oasthouse tiles and mathematical tiles.
