Hamilton[®]

MADE IN THE
UK

SAVILE ROW

in the domestic or commercial environment...

Tailor made to your requirements - exclusively made-to-measure...

Savile Row is synonymous with tailor made items of the highest standards. In offering a bespoke service in the design and production of custom-built electrical accessories, Hamilton maintains the tenets of this philosophy.

As pioneers in the manufacture of decorative plates for switches, sockets and lighting controls, Hamilton has over 40 years experience in meeting the specifications of the architect, the installer and their clients. Tell us what function the item is to fulfill, what style and finish, and let us interpret your client's wishes.

The Hamilton design team are able to offer 3D CAD drawings. This facility enables customers to view product designs from different angles and perspectives, thereby shortening the lead time from design to product sampling.

Our production facility includes complete CNC and Laser Cutting capability.

- In addition to our standard selection of finishes, we can provide bespoke premium finishes including PVD, in a choice of finishes such as Nickel or Antique Gold.
- If required we can print text or graphics on plates, by Laser Etch, Pad Printing or Engraving.
- Custom made back box assemblies to specific measurements and designs can be manufactured to suit non-standard plate configurations.

Whether contemporary or classic, Hamilton has a wide selection of plate designs and large plate sizes including 150 x 150 mm, 150 x 210 mm and 210 x 210 mm. Plain flat plates can be produced in unique, project-specific sizes.
