

The Sigaro bollard is a handsome bollard designed to provide traffic or pedestrian control. With its mitred top and its dome-style sleeve provides a contemporary addition to any street scene.

Manufactured from polyester powder coated cast aluminium, a hard yet flexible finish that resists rusting, chipping, peeling and fading.

Ground fixing is either by concreting the galvanised steel tube insert into the ground or with bolts (not included).

Specification:

Height: 850mm

Diameter: 95mm

Base plate diameter: 150mm
