

Discover Classroom Chair

The DISCOVER chair blends modern design with superior durability and a comfortable, ergonomic design. The contoured polypropylene shell with anti-static additive, incorporates structural support ribs under the seat to support the bulk, transferring the load evenly to the tubular steel frame.

The special contoured design of the chair provides support to the lumbar area of the back when sitting in the upright position but flexes to allow the body to recline back to a comfortable position.

DISCOVER'S smart features include ergonomic contoured hand holds for easy lifting and repositioning - along with a unique interlocking back design for improved stacking.

Frame:

The frames legs are formed from 18- gauge tubular steel and are joined to two 14-gauge steel support braces with a continuous weld at all four connection areas.

Plastic Chair Shell:

The chair shell is a one piece, injection-moulded polypropylene plastic with an anti-static additive featuring an enhanced waterfall front edge to promote good circulation in the user's knees, lower back and feet. A biometrically designed and flexible thoracic surface area provides superior mid back support and comfort for users of many sizes and shapes.

The ergonomically designed lumbar support swell supports proper reverse curvature of the spine and ensure comfort for a wide range of users. A relieved area at the lower back of the shell helps relieve uncomfortable pressure on the tailbone while promoting good posture.

The shell has nesting / stacking scallops on both sides, located in the mid-back area, to provide solid seating of the stack allowing the shells to nest while stacked. The colour is dispersed evenly throughout the plastic for an even and pleasing appearance. The shell has an ergonomically correct, attractive handhold in the upper portion of the back with smooth edges for ease of carrying.

The seat has 15 contoured wrap-around flexible ribs, which are dynamically tuned to allow greater flexibility in the upper back area while ensuring the lower back remains fully supported...result: comfort and support. The seat is permanently attached to the frame with six non-load bearing steel rivets beneath the seat.

Building Quality, Delivering Excellence and Exceeding Customer Expectation

Discover Classroom Chair

Metal Finish:

The chair's frame is available with a fully nickel chrome plated or powder coated finish. Chrome plating followed by welding and spray painting is not acceptable, and as such is welded prior to chroming.

Glides:

The chair's have four internal-gripping swivel glides. Each of the glides have no cuff or collar to eliminate dirt build up.

Warranty:

The Discover chair has a 16 year warrantee against manufacturer's defects.

Maintenance:

To clean polypropylene; wipe clean with a damp cloth. For stubborn stains use mild detergent diluted in warm water. Do not use abrasive cloths, cleaning liquids or powders. To Clean steelframe; wipe clean with a damp cloth and buff dry. For stubborn stains use mild detergent diluted in warm water. Do not use abrasive cloths.

Safety:

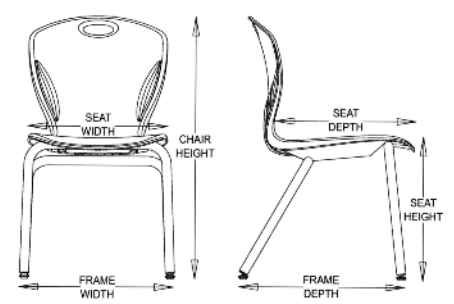

All products are manufactured in an ISO 9001 Quality Assured environment. Conform to BS EN 1729-1 and BS EN 1729-2 (suitable for severe contract and educational use)

Recommended Uses:

Schools, Colleges, TAFE's, Universities, Preschools, Councils, Government Departments, Hospitals, Religious Organisations, Canteens.
