Weight / Size (mm) / Inches

30g / 42mm x 46mm

0.06 lbs / 1.65 x 1.81

Backflow

DC (Category 5 protection)

For Cold Water use.

Connections

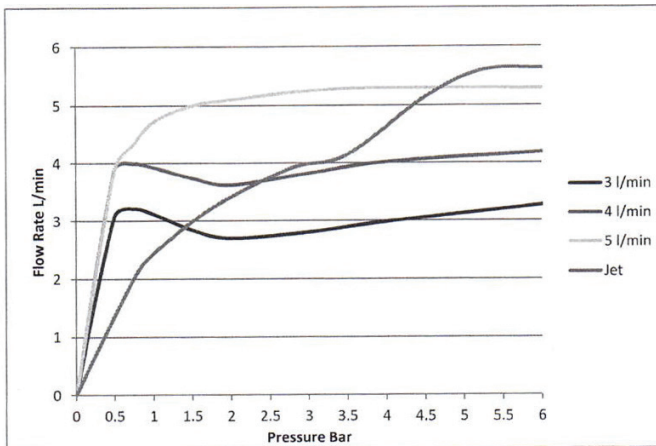

G3/4 Female Inlet Connection

G3/4 Male Outlet Connection

Certifications

WRAS approved

Flow Rate Chart

Frequent Applications

Residential • Municipal • Education • Healthcare • Offices

Associated Products

WuduMate Turkish Toilet

Usage and recommendations

The Backflow Prevention Device is required to comply with building regulations to prevent any possibility of bacteria within a Turkish Toilet travelling up the douche nozzle into the mains water supply. The Back Flow Prevention Device creates a vacuum within the pipework which bacteria cannot cross.

For backflow prevention category 5 back-siphonage only.

The Back Flow Preventer should be the last item to be installed before the bidet exit pipe without any restriction downstream of the device as this product features an air gap and leaks may result if installed incorrectly.
