

INTRODUCING SuperSport®

SuperSport® is a range of asphalt products designed to meet job-specific requirements and offer a range of benefits for tennis courts and multi-use games areas (MUGAS). It's also great for SuDS pedestrian pavements.

WHY SUPERSPORT®?

ENHANCED SAFETY

SuperSport® is free-draining, ensuring no standing water remains on the surface, allowing play shortly after heavy rainfall.

SUSTAINABLE

SuperSport® can be used as part of a SuDS system. Its high permeability and drainage capacity reduces the risk of standing water, making it ideal for projects with a high proportion of hard standing.

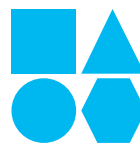

QUALITY ASSURED

Fully compliant with requirements of Lawn Tennis Association and SAPCA.

LONG-LASTING

SuperSport® Plus is designed utilising bitumen modifiers, which offer increased resistance to scuffing reducing the potential for softening in extreme temperatures - ensuring a tough and durable playing surface.

VERSATILE

The finished surface can be coloured and playing areas marked up in a range of colourways.

ECO-FRIENDLY

Create sustainable projects – all mixes can be supplied as SuperLow warm mix asphalt.
