

# INTRODUCING SuperThin®

SuperThin® is a Highway Authorities Product Approval Scheme (HAPAS) approved asphalt. Thin surface course material is available in 6mm and 10mm. Designed to fulfil the requirements and deliver the performance of a modern thin surfacing used in high and low speed heavily trafficked roads.

## WHY SUPERTHIN®?

### QUALITY ASSURED

HAPAS approved as a Clause 942 material for use on Highways England network.

### SUSTAINABLE

Thin construction maximises the conservation of natural resources.

### ENHANCED SAFETY

Exceptional noise reduction properties and spray reduction, providing a safer driving environment on heavily trafficked urban roads and high speed urban highways.

### ULTRA-LOW NOISE

Reduces excessive noise pollution to those residing in built-up areas.

### LOW MAINTENANCE

High levels of rut resistance, delivering a long lasting surface course with improved rideability. Manufactured using selected polymer modified bitumen for increased durability.

### ECO-FRIENDLY

Create sustainable projects – all mixes can be supplied as SuperLow warm mix asphalt.
