

SureCell

Designed to be faster, easier and cheaper to install than tarmac and concrete, SureCell is an interlocking honeycomb structure that provides the ideal base for small areas whilst being durable and eco-friendly.

Perfect for **driveway extensions and around trees**, it perfectly complements a top layer of SureSet and gives you double the permeability with a **beautiful finish**.

Complete with a 15-Year Guarantee

We can install SureCell and SureSet on the same day using our expert installation team.

Our **SureCell** base system is ideal for areas that require base preparations which are faster, cheaper and easier than laying tarmac or concrete. Laid directly onto compacted stone and then in-filled with gravel, it provides an incredibly strong and stable surface which is ideal for heavy vehicular traffic and footfall.

The benefits of a SureCell base systems are:

- Faster, cheaper and easier to install than most traditional systems.
- Installed by hand by our expert team.
- Little to no noise pollution or need for heavy machinery during installation.
- Super-strong and high load bearing.
- Fully permeable, filtering clean water back into the natural water-table.
- Durable – covered by our 15 year guarantee.
