

Technical Data

Doorsets, security

Composition and manufacture

Manufactured in steel or multi-laminated birch ply. Doors hang from steel or hardwood frames as specified. All multi-ply doors can optionally be clad in galvanised steel and the frames are installed with over-specified fixing bolts to ensure protection against violent attacks.

Size and weight

All doors are bespoke and can be manufactured to individual requirements and specification. Both single- and double-leaf door options are available on overhead and side panels.

Appearance

Doors and frames are finished in standard BS undercoat or can be supplied fully paint-finished as required.

Sitework

System 2000 Group can supply-only ex-works or supply and install throughout the UK.
