

10 Space Chelsea Cycle Shelter Information Sheet

10 Space Chelsea Cycle Shelter

The 10 Space Chelsea Cycle Shelter is a brilliant bike shelter for offering a convenient and clearly identifiable place for secure bike storage.

The integrated canopy also offers excellent weather protection, as well as having an anti-climb design.

Available at various heights and lengths, this cantilevered canopy can be modified to accommodate a range of cycle racks, making it a popular choice for bespoke orders.

Popular customisation options include an increase in upright steel section sizes, 16mm multiwall polycarbonate or glass roof panelling. We can also install lighting solutions as an additional security feature.
