

ProFin[®] V22/55

Drainage profiles, corner units and connectors for AquaDrain[®] surface drainage systems.

DESCRIPTION

Aluminium powder-coated drip/drain end profile and corner unit for use with Gutjahr external tiling systems from BAL. Available in heights of 22 mm and 55 mm, these edge profiles cover the AquaDrain[®] assembly to create a clean, neat and functional finish to the balcony surround. The projecting profile directs surface water away and keeps drainage channels free. For full installation advice and technical drawings please refer to Part A Technical Design Guide or contact the BAL TECHNICAL ADVISORY AND SPECIFICATION SERVICE.

Product Properties and Benefits

- Surface and seepage water is drained away without leaving dirt trails on balconies and facades and without danger of blocking.
- Decorative edging and screed support in one. Raised edge profile provides a facing for unglazed edge of tiles.
- Protects screed from water damage.
- Rapid and simple installation. Profiles can be linked with profile connectors supplied.
- Prefabricated with seal-tight welded corners for easy assembly.
- Use ProFin[®] V22 in combination with direct point adhesion fixing method on AquaDrain[®] T+ surface drainage mats for covering thickness from 22 mm.
- Use ProFin[®] V55 in combination with AquaDrain[®] EK drainage roll or sheets.
- Ideal to be used for Roof Terraces with existing membranes already present on-site.
- For upstand heights of 22 mm or 55 mm.

PRODUCT INFORMATION

Composition: ProFin[®] V22/55 profiles and Corner 90° unites are constructed from power coated aluminium.

Colour: Alumetallic. Other colours available on request.

Size: 1 length = 3 m 1 corner unit = 185 mm x 185 mm

Additional Information:

- Height of structure depends on the type of construction and covering. (See chart on page 2)
