

The TLJ Access Control Reader is a wall mounted unit that has been designed to work in conjunction with the range of TLJ Key Card Locks and Mifare Key Cards.

Used to secure external doors including glass panelled doors, steel doors and UPVC the TLJ Access Control Reader operates with the same system as the guest room key card locks. The key card issued to the guest for their room will also activate the access control reader; therefore only one card is needed to gain access through the entrance and the allocated guest room.

### Specification

- Power supply : DC12V
- Unlock record storage : 1000 pieces
- Working current : < 150mA
- Card type : Mifare
- Reading distance : 0-5cm
- Working temperature : -15°C ~+60°C
- Working humidity : 15~95%RH
- Net weight : 270g
- Dimension : 14.8cm\*8.6cm\*6.1cm
