

To complement our Hotel Lock System and Energy Saving Devices, TLJ has launched a luxurious range of intelligent room control switches that allow you to control the mood and ambiance of the room at the touch of a button.

Using the latest in energy saving and energy efficient technology we can provide 'Digital Matrix' touch screen controls which include:

Privacy Switch

Our state of the art Privacy Switches eradicate the need for the traditional do not disturb sign/hangers. They display the status of the room on an easy to read digital display in the corridor which is controlled from inside of the room or from the comfort of the bed.

There are various options available, including;

- Intelligent Guest Room Doorbell System (DB20 Series)
- Intelligent Control System (TS-SW20 Series)
- Intelligent Network Control System (TN-SW20 Series)
- Electric Thermostat Control Panel (TS-AC20T)
- Under floor Heating Thermostat (TS-HV20)
- Intelligent Remote Controls
- Frame Colours & Finishes
