

TT SEALING UFO

A hydrophilic ring made from synthetic, water-swelling rubber that fits securely around the exterior of the formwork spacer and presents water infiltrating through cracks in the surrounding concrete.

TT Sealing UFO is designed to offer a more effective, quick and secure sealing solution than mastic or a length of water bar – both of which can be dislodged during the concrete pour.

A hydrophilic ring made from synthetic, water-swelling rubber that fits securely around the formwork spacer and prevents water infiltrating through cracks in the surrounding concrete. The water swellable sealing products are based on the unique Active Sealing technology. Our products expand on contact with water. This is how they create an active seal to combat moisture infiltration. The products are self-correcting and thus also sealing the unevenness and imperfections of the concrete.

The Sealing Connector is slid over the tie rod and anchored with the Sealing UFO or the Sealing Ring.

FUNCTIONING SEALING CONNECTOR WITH UFO

Position the Sealing Connector against the tie rod

Close the Sealing Connector

Slide the Sealing UFO over the tie rod

Anchor the Sealing Connector using the Sealing UFO

WITH SEALING RING

Or slide the Sealing Ring over the tie rod

Anchor the Sealing Connector using the Sealing Ring
