## Steel Fencing Systems Torino Grating Fences

The **Torino** range represents a totally new concept; the exclusive and unusual arrangement of closely spaced transverse bars generates a uniquely horizontal emphasis within the grating fencing market.

The fence panels are made entirely from flat bars using a pressure-lock process which produces a grating with perfectly formed intersections. This delivers an exceptionally crisp, architectural aesthetic.

The Torino range includes standard apertures of 132x11, 132x22, 132x33, 132x44mm but can also be supplied in larger mesh sizes. It therefore can provide fencing with surprisingly different properties and characteristics: either for security with a strong, clearly defined structure or for boundary demarcation with an open, transparent appearance.

All fences are hot-dip galvanized before finishing with an optional polyester powder coating in any RAL colour.

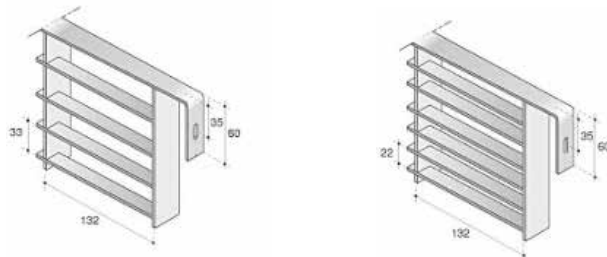

# Torino

- Torino-11: aperture 132x11mm
- Torino-22: aperture 132x22mm
- Torino-33: aperture 132x33mm
- Torino-44: aperture 132x44mm

Horizontal Bar: 10x2mm  
 Vertical Bar: 25x2 (optional 25x3)

PANEL			FLAT POST	RHS POST	GROUND FIXING	WALL FIXING	BOLTS
HEIGHT mm	WIDTH mm	WEIGHT kg/m <sup>2</sup>	SECTION mm	SECTION mm	LENGTH/ANCHORAGE mm	LENGTH/ANCHORAGE mm	NO per post
935	1992	9.5	60x8	50x30	1500/550	1210/200	2
1199	1992	9.1	60x8	50x30	1800/600	1494/200	2
1331	1992	8.9	60x8	50x30	2000/600	1625/200	2
1463	1992	8.8	60x8	50x30	2100/600	1758/200	2
1727	1992	8.6	60x8	60x40	2400/600	2015/200	2
1991	1992	8.4	80x8	80x40	2800/700	2336/250	2

STANDARD POST CENTRES (with flat bar post) 2000mm

**BESPOKE SIZES:** fence panels up to 2000mm and closing panels can also be made to custom heights and widths  
**HEIGHTS > 2000mm:** panels can be stacked to achieve extra high fences with posts of appropriate section
