**Access control • CCTV • Door automation • Intruder alarm systems**

@allgood trio

**The coming together of Allgood Secure and Trio Security Systems has created Allgood Trio, the new force in Access Control, CCTV, Door Automation and Intruder Alarms.**

For over 30 years, the Allgood Group has been supplying and installing access control and automation to all forms of buildings and property. During this same period, Trio Security Systems has specialised in access control, CCTV and intruder alarms. The formation of these two companies as Allgood Trio now means that a complete integrated security solution can be provided.

From the start of a project to its completion, Allgood Trio are able to provide sound advice, creating a tailored security system to your precise requirements. We ensure a prompt response, timely and efficient installation and an after sales service that you can depend on to ensure that your installation will provide years of service.

Our engineers are fully trained and accredited to the Security Systems and Alarms Inspection Board (SSAIB) and BS:7036 standards, providing the complete installation or maintenance service that is flexible to the building's requirements and budgets. Countless installations have been completed in existing buildings with an attention to detail that has provided complete satisfaction for our clients.

**At the forefront of our profession, we have been the specialists in our fields for many years. Allgood Trio now provides the complete integrated security package.**

- Complimentary on-site survey and quotation service.
- Technical advice on the best practice relating to the Equality Act 2010.
- Complete installation service from experienced SSAIB and BS:7036 accredited engineers.
- Proven experience of high quality, project installations.
- Flexible maintenance and service plans tailored to your requirements.
- The complete security package.

## alarm systems

From simple door and window sensors through to central station and online monitoring solutions, Allgood Trio can create and install fully customised alarm systems to meet your particular needs. Utilising a comprehensive range of electronic intruder alarm systems, Allgood Trio can ensure that your building is protected 24 hours a day.

Our competence as an installer of alarm systems is demonstrated by our third party certification by the SSAIB. In addition, Allgood Trio enjoy insurance approval and satisfy the requirements of the ACPO Policy 2004 enabling us to install Police Response monitored alarm systems.

## access control

On most buildings with a high number of users there will be a need for easy access for the right people, whilst retaining a high level of security. Access control systems provide a convenient solution for all users of a building whilst providing a level of security required by the client.

Allgood Trio is experienced in installing various forms of access control including:

- Proximity entry
- Code entry
- Biometric entry

In addition, Allgood Trio is SSAIB certified to install access control systems, ensuring that your installation will be completed by professional and fully trained engineers.

## audio visual entry

The majority of entrance doors for apartment and office buildings need to be secured at all times, but also remotely opened by tenants to allow access to visitors.

Allgood Trio are experts at utilising a wide range of entry panels and advancements in technology to provide the right remote-entry solution. Examples include:

- Entry panel cameras incorporated into CCTV systems.
- Entry requests linked to your PC, enabling you to give visitors access without moving from your desk.
- Entry requests sent to your mobile, so you can let visitors in whilst on the move.

## automatic doors

Whether it is less abled users or situations where equipment and deliveries need to pass through, doorways can be huge obstacles to negotiate.

Allgood Trio has the expertise in providing the following solutions:-

- Low energy to high usage automatic doors.
- Concealed operators for glazed doors.
- Automatic sliding, bi-folding or revolving doors.
- Systems controlling windows and doors to maintain temperature.

Our fully trained engineers provide an efficient service ensuring that your system is installed to the British Standard for powered doors (BS:7036).

**Above Right:** Automatic smoke ventilation operators

**Right:** Automatic sliding doors, Pioneer School

## barrier security

In some circumstances, the use of a door as a physical barrier is inappropriate to control a high number of authorised users in and out of a building.

Allgood Trio can supply and install a range of security barriers that can be interfaced with an access control system providing an aesthetically pleasing and effective way of managing users in and out of authorised areas.

In external areas, Allgood Trio can provide a variety of barrier systems such as turnstiles, car park barriers and automated gates to provide a completely integrated security system for a building and the surrounding external areas.

**Right & Far Right:** Automatic underfloor operators, Otford Church

## bespoke installations

At times, there is a need to solve a problem to a building's access or security issue that is not readily available on the market and seems like a lost cause.

Where others may try to steer you to a standard system, Allgood Trio takes a detailed approach to fabricate specialist equipment to resolve the issue rather than just cover up the problem with a quick fix.

We are specialists in our field having completed numerous bespoke installations including automated church doors and access controlled mail boxes.

## cctv surveillance

CCTV systems are provided to give the building user peace of mind that the property is being watched over in the event of attack, abuse or incident. It is the first line of defence that is used to identify the culprits or to justify any insurance claim against any damage or losses.

Allgood Trio can provide a versatile range of CCTV systems from one camera to an integrated, multi-camera system with monitoring stations.

Certified by the SSAIB to install CCTV systems, our installation service is second to none and will ensure your installation will be completed competently.

## installation & maintenance

Allgood Trio engineers have the expertise and experience of installing security systems to the highest standards and to the complete satisfaction of the client. Countless installations have been completed in existing buildings with a discreet service causing a minimum of disruption.

Our engineers are fully trained and accredited to BS:7036 and by the SSAIB, providing peace of mind that you will receive the most professional service.

In addition to our installation service, planned maintenance visits are a good way of uncovering small problems and avoiding costly repairs. Allgood Trio can provide impartial advice on maintaining your system, creating flexible service

agreements tailored to your precise requirements and budget. Maintenance contracts with a 24 hour emergency call-out service can also be provided.

Utilising our understanding of doors and hardware, Allgood Trio operatives can provide an MOT inspection for door sets and hardware, producing a report on the 'fitness' of the doors to perform their function. Maintenance can be provided to ensure the doors are kept in peak condition, with any required replacement and installation of doorsets provided through our Allgood Appart division.
