# Architectural Glazing

**kuraray**

**Trosifol® SentryGlas®**

## Introduction

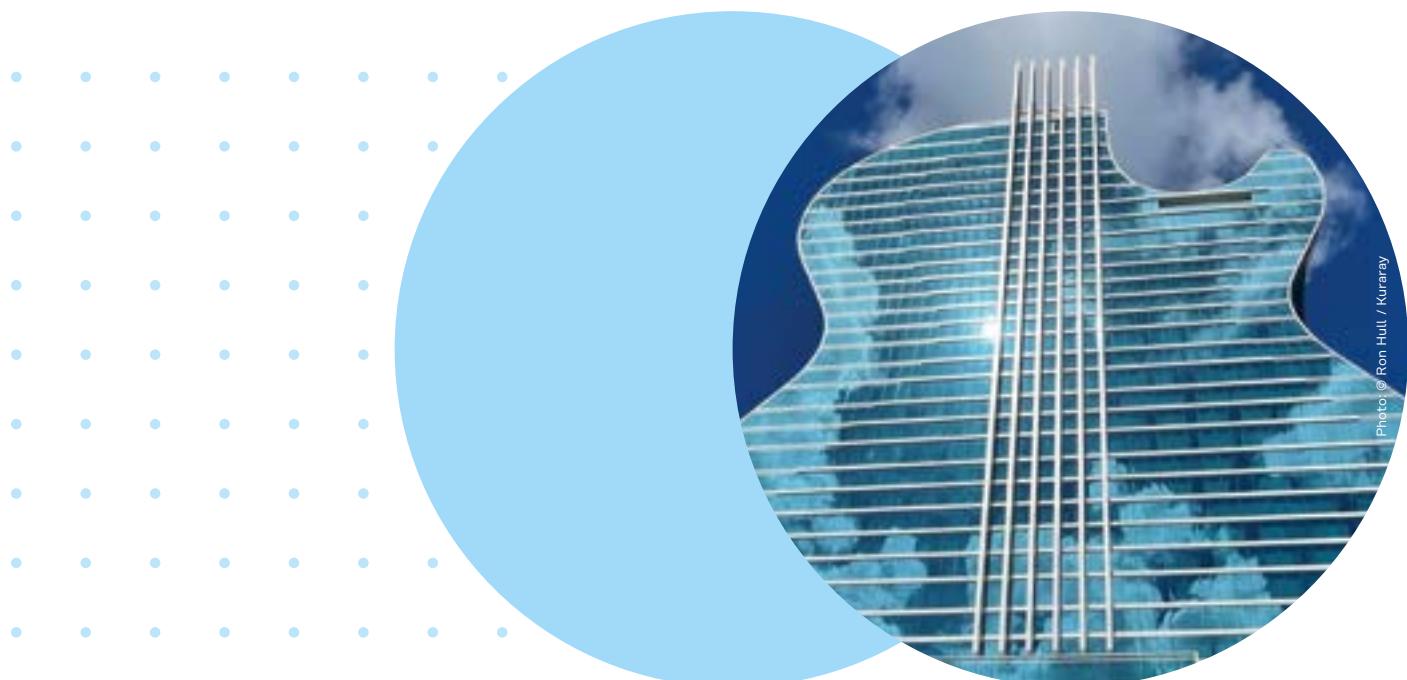

# Interlayer strength, depth and capabilities

Delivering your window into the world of advanced interlayers for laminated safety glass, Kuraray's Advanced Interlayer Solutions Division (AIS) is underpinned by decades of innovation, application knowledge, domain experience and market success.

**OUR ADVANCED INTERLAYER PORTFOLIO –** comprising Trosifol® PVB and SentryGlas® ionoplast interlayers – has continually revolutionized aesthetic, structural and functional design, fabrication and installation in the architectural and automotive/transportation segments.

Designed to benefit consumers, society and industry, our products are advancing the functionality of glass, while our engineers and consultants are setting new application benchmarks by collaborating on solutions that both sustain and inspire.

We are committed to helping you transform your mindset and take your applications to the next level – aesthetically, functionally and structurally. Enjoy greater design freedom and give your glazing strength, clarity, character and purpose with solutions that cover safety, security, sound insulation, UV/solar/energy management, color and print.

**OUR DIVERSE PRODUCT RANGE,** the broadest on the global market and our domain expertise create strength; and we channel this strength into helping you succeed. We strive to be your strongest ally and supporter and will help you navigate and conquer the ever-changing demands of the global glass industry. Worldwide production, R&D and support, means we are always by your side... no matter where you are.

## Safety Glazing

# Transparency and safety

## SAFETY HIGHLIGHTS

- **High adhesion:** Specially designed for laminated safety glass, made with heat strengthened or tempered glass. *It reduces the risk of edge delamination.*
- **Highest light transmittance and lowest Yellowness Index:** the thicker the interlayer and the clearer the glass, the more you benefit from the *Ultra-Clear performance*.
  - **Trosifol® UltraClear interlayer highlights the benefits of low iron glass**
  - **Trosifol® UltraClear ensures best color fastness (e.g. white screen-printing)**
- **Open edge performance:** Salt spray test demonstrates the outstanding open edge performance with Trosifol® UltraClear (in this test as good as SentryGlas®).

## Structural and Security Glazing

# Exceptional strength up to 330 cm (130 in)

## STRUCTURAL AND SECURITY HIGHLIGHTS

- Extraordinary post-breakage strength
- High film shear modulus
- Excellent edge stability
- Outstanding clarity
- Open edge design thanks to SentryGlas®

## APPLICATIONS & RECOMMENDATIONS

- SentryGlas® is the best choice, with over 20 years of outdoor exposure, for open edge applications that require the very best edge durability and optics.
- SentryGlas® is recommended for applications that require the highest structural performance over a broad range of temperatures and loads.
- SentryGlas® Translucent White provides full structural performance along with a translucent white effect for privacy.
- For moderate design temperature we recommend Trosifol® Extra Stiff.
- For elevated design temperature we recommend SentryGlas®.
- SentryGlas® Xtra™ interlayers have the best optical performance in very thick laminates.
- We recommend SentryGlas® Xtra™ for multi-ply laminate assemblies as an adhesion promoter is no longer required.
- Trosifol® Spallshield® CPET hard-coated PET film helps to stop the showering of small glass particles.
- Trosifol® PET adds strength to the PVB improving both safety and security of the glass laminate.

## Structural and Security Glazing – severe weather

# Interlayers for extreme security needs

## HURRICANE

- Hurricane impact windows provide protection from wind borne debris
- The use of hurricane impact windows greatly reduces building damage
- First 9 meters (30 feet) of building elevation requires glazing system to pass large missile impact testing
- SentryGlas®, SentryGlas® Xtra™ and Trosifol® PVB pass large missile impact test and have obtained Miami Dade County Product Control Notice of Acceptance (NOA)
- SentryGlas® is best for Level E (essential facility) protection
- SentryGlas® recommended for large glass, high wind loads, or dry glaze systems

## TYPHOON

- Typhoons are synonymous with hurricanes, capable of the same damaging wind borne debris, the only difference is location
- Currently the building codes for window systems in typhoon regions are not very strong or enforced
- Our cooperation with the CTBUH to investigate how to expand hurricane window solutions to this region

## TORNADO

- Tornadoes are capable of wind speeds in excess of 250 mph (425 kph)
- Tornadoes strike with little warning
- Window systems using SentryGlas® and Trosifol® Spallshield® CPET are capable of passing FEMA 361 EF5 tornado test

• Miami Courthouse, USA

## Structural and Security Glazing – man made

### ANTI-INTRUSION GLAZING

- Security and protection against attacks, vandalism and property theft
- No need to use unsightly bars or roll down gates. Clear transparent protection
- SentryGlas®, Trosifol® PVB and Trosifol® Spallshield® CPET interlayer comply with global security glazing standards

Photo: © futuristman / shutterstock.com

### BALLISTIC RESISTANCE

- Protection from a wide range of ballistic threats
- Trosifol® Spallshield® CPET provides a durable spall protection layer
- SentryGlas® certified by the US Department of State for FE (forced entry) BR (bullet resistance)
- Construction using SentryGlas®, Trosifol® PVB, and Trosifol® Spallshield® CPET can meet ballistics-resistance test standards that are thinner, light-weight, and more durable than alternative solutions

### BOMB-BLAST GLAZING

- Trosifol® PVB, Trosifol® Spallshield® CPET and SentryGlas® are used in systems for bomb blast protection, both low and high level protection
- SentryGlas® is specified by the US State Department for higher bomb blast requirements of US Embassies
- Embassies, government buildings and high risk buildings

Photo: © Dabarti CGI / shutterstock.com

## Sound Control Glazing

# Customized sound insulation

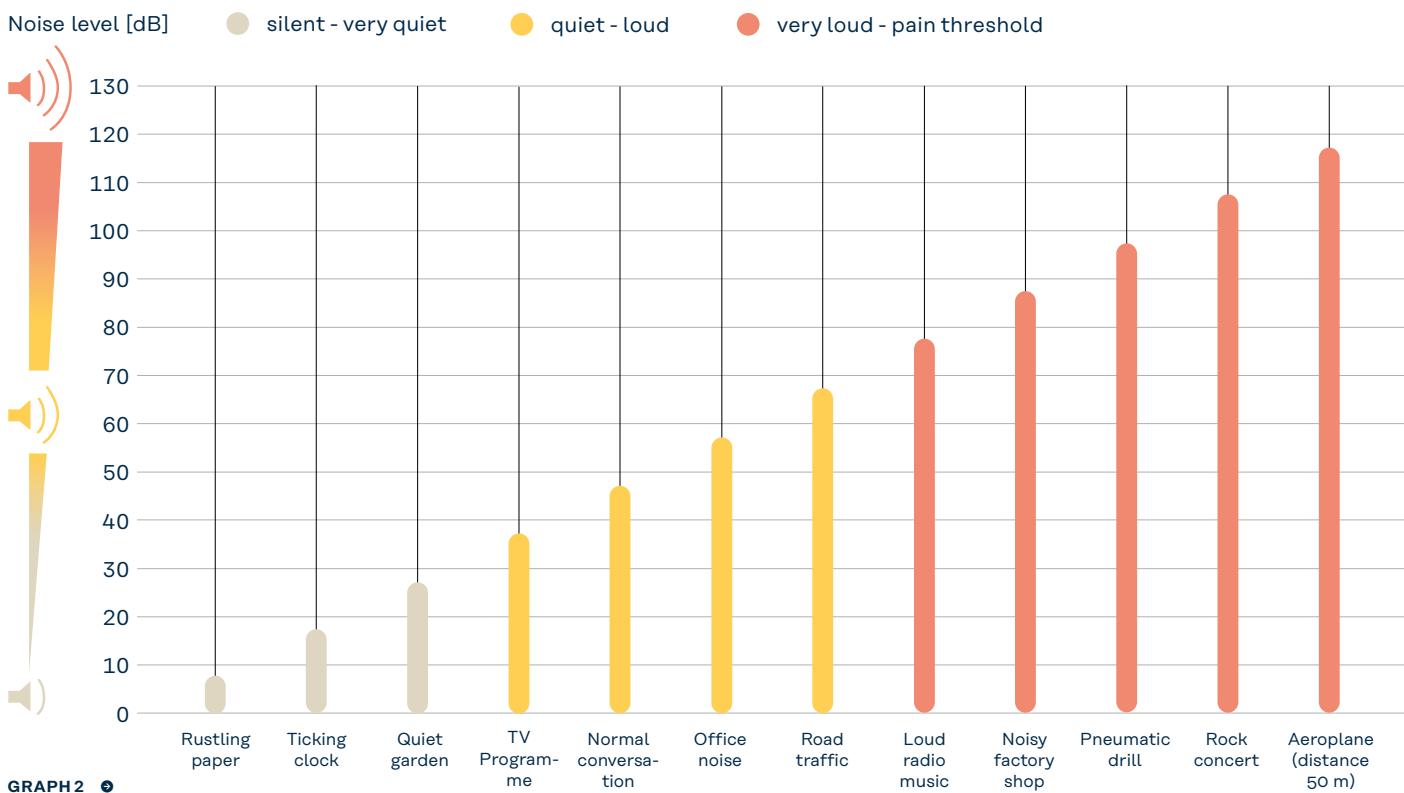

### ACOUSTIC HIGHLIGHTS

- Sole supplier of mono- and multilayer PVB for the Acoustic Glazing market.
- $R_w$  or STC/OITC values of 50 dB and better in insulated glass.

### APPLICATIONS & RECOMMENDATIONS

- Thanks to its high adhesive strength, Trosifol® SC Monolayer is particularly suitable for laying between plies of heat-strengthened or fully tempered glass.
- Trosifol® SC Multilayer is ideal for achieving impact resistance level P2A conforming to EN 356.
- Trosifol® SC Multilayer can be combined with other Trosifol® products.
- Best optical properties in terms of "orange peel" with Trosifol® SC Monolayer.
- Laminated safety glass containing a Trosifol® SC Monolayer / Trosifol® SC Multilayer has up to 3 dB better sound insulation than the same construction with standard PVB film.

## Noise sources and perception

## Sound Control – select the right interlayers for acoustic and optical performance

Property	Trosifol® Clear/UltraClear	Trosifol® SC Multilayer	Trosifol® SC Monolayer
Acoustic performance	some	excellent	excellent
Optic	great good	risk for orange peel	great good
Films' combination	yes, standard and color	yes, standard and color	no
Ball drop performance*	P2A/P1A	P2A	P1A

## UV Control Glazing

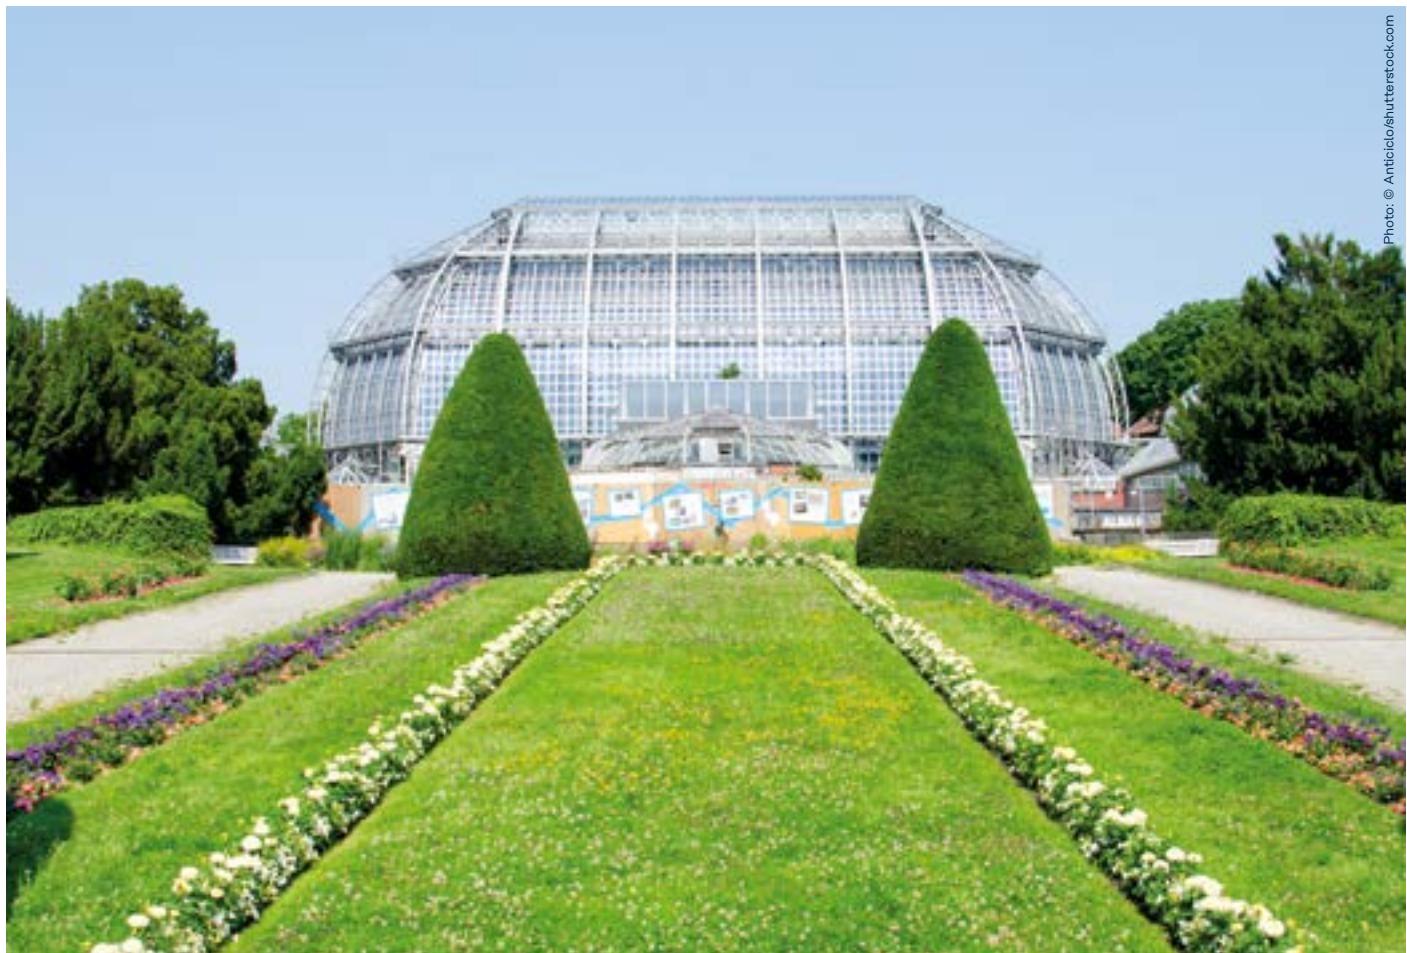

# Intentional UV Control

### UV CONTROL HIGHLIGHTS

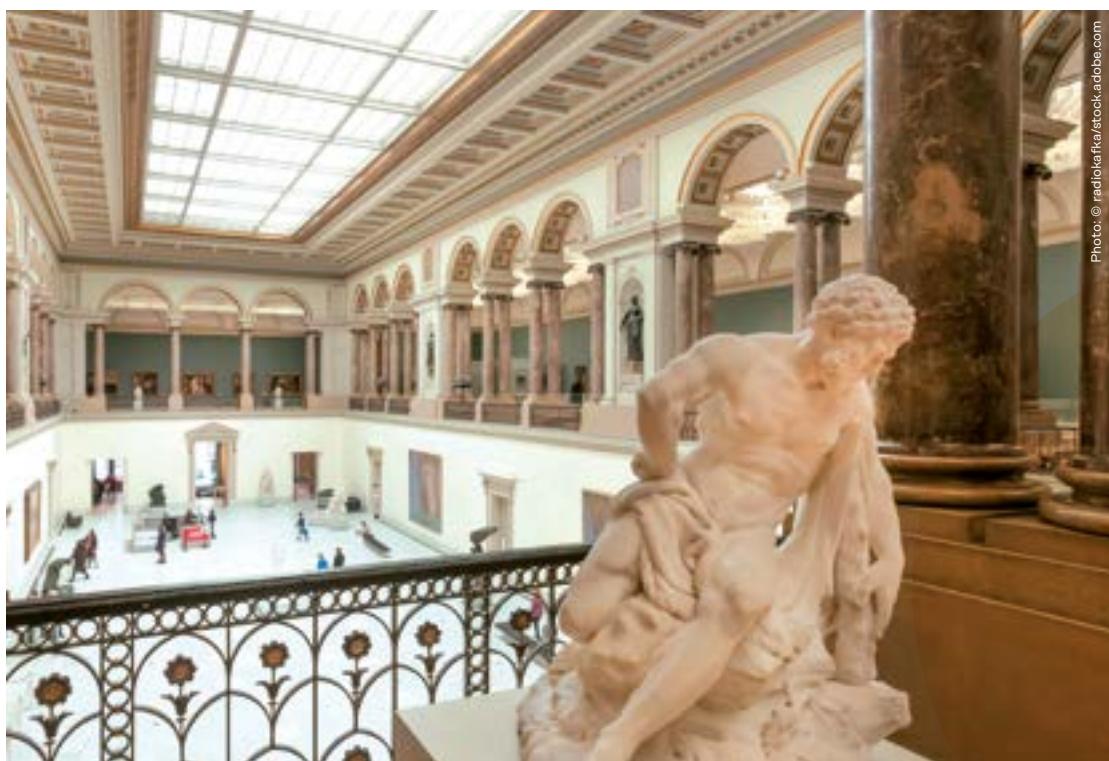

- Trosifol® UV Extra Protect
- Trosifol® Natural UV
- SentryGlas® Natural UV
- Trosifol® UV Extra Protect is crucial in protecting against the sun's harmful UV rays and protects sensitive items against fading due to sun exposure.
- Both Natural UV products allow sunlight to provide essential vitamin D through the glass to promote wellness of animals and marine life.
- Trosifol® Natural UV and SentryGlas® Natural UV for total UV permeability.

### APPLICATIONS & RECOMMENDATIONS

- Museums, archives, galleries
- Greenhouses/botanical gardens
- Restaurants, hotels, holiday resorts
- Hospitals
- Shop windows
- Children's day care centers
- Schools and universities
- Libraries
- Switchable glazing
- Zoo
- Flora
- Fauna
- Smart glazing

## Decorative Glazing

# Brilliant colors

## DECORATIVE HIGHLIGHTS

- Interior and exterior applications thanks to outstanding fastness
- Opaque Trosifol® Diamond White
- Totally opaque Trosifol® Brilliant Black
- Different degrees of translucency in the white color range
- Combination of colors possible

## APPLICATIONS & RECOMMENDATIONS

- For total opacity, we recommend Trosifol® Brilliant Black.
- With strong colors, high color intensity is achieved with just a single film in the glass module, making further layers unnecessary.
- To achieve the same effects as body tinted glass, we recommend the tinted colors.

**BirdSecure® Pro**

# Bird-Friendly solutions

## **BIRDSECURE® PRO HIGHLIGHTS**

- Outstanding threat level
- Relevant safety features remain unchanged
- Outstanding optic in combination with BirdSecure®
- Solar control performance

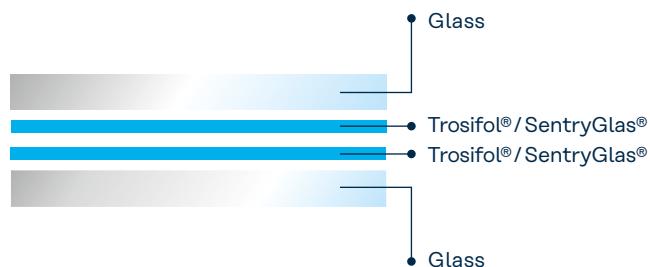

## **APPLICATIONS & RECOMMENDATIONS**

- Reflective façades
- Glazed balcony walls and balustrades
- Transparent noise barriers, glazed entrances or winter gardens with ineffective black silhouettes
- Transparent aerial walkways
- Transparent building corners
- Attractive green spaces in front of reflective façades

**TAB 9** • G(t) data were determined by Dynamic Mechanical-Analysis in accordance to EN ISO 6721 within the linear range of deformation. All samples were stored at 23°C for 4 weeks before measurement. G(t) data were experimentally verified by 4-Point-Bend-Tests on laminated glass following prEN 16613 at third party labs for selected time-load combinations.

**TAB 10** E(t) was calculated according  $E(t) = 2 \times G(t) \times (1+v)$  for isotropic materials with:  $v = 0.47$  (Trosifol® Extra Stiff),  $v = 0.49$  (Trosifol® Clear, Trosifol® SC Monolayer);  $v = 0.48$  (SentryGlas®, SentryGlas® Xtra™). The Poisson ratio  $v$  was measured in accordance to EN ISO 527 (23°C, 30% r. H.). If numerical simulation tools (FEA) require E(t) data for Trosifol® SC Multilayer, these data can be calculated using  $E(t) = 2 \times G(t) \times (1+v)$  with:  $v = 0.49$ . This is the closest approximation available and validation tests did show that it gives conservative E modulus values.

## Trosifol® Extra Stiff 0.76 (30 mil) and Trosifol® PVB combinations – Shear Relaxation Modulus G(t)/MPa

<sup>2</sup> Product also available as 0.38 mm (15 mil) version with comparable optics.

The Color samples are merely intended as illustration and inadequately represent the real colors. Custom colors are available on request.

\* All data measured in accordance with EN 410 (2011)/ISO 9050 on laminated safety glass with 4 mm – 0.38 mm PVB – 4 mm float glass. All Color types meet the requirements of EN ISO 12543. If used in exterior applications or combined with radiation sources, the energy absorption of the glass combination must be borne in mind.

# Tools & Apps

## TROSIFOL® WINSLT

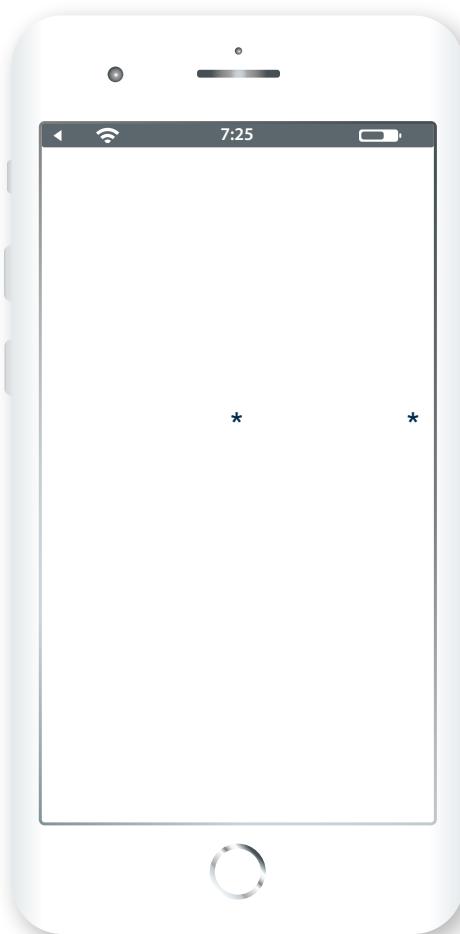

For calculating the light, solar and heat parameters of glazing specifically containing films from the Trosifol® & SentryGlas® product range.

## SOUNDLAB AI

First global acoustic calculator based on artificial intelligence for calculating/estimating acoustic performance of monolithic, double and triple glazed units.

## SOLUTION FINDER

For finding the right product of your project.

\* Only available as web app

## TROSIFOL® GLASGLOBAL

For performing structural analysis for glass.

## STRENGTH LAB AI

The goal of the Strength Lab AI tool is to provide designers, engineers, and architects with an efficient tool to facilitate the design and evaluation of glazing systems in terms of structural properties. This tool provides rapid analysis of virtually any glazing configuration, dimension and load case. Additionally, standard modules allow easy evaluation of results according to ASTM, EN and DIN standards.
