*Fire & Integrated
Solutions*

*Specialist door to door service,
maintenance and repair*

Total solution providers

of fire, security and industrial doors

The complete door to door service for all types, in all locations, at any time

The range of products in the door industry is ever changing and so is the degree of specialist expertise needed to maintain it. For over a century, Tyco Fire and Integrated Solutions have been dedicated to providing this specialist care in the manufacturing, installing, maintaining and repairing of both its own products and those of other manufacturers.

Continued investment in technology and products only makes an effective impact when delivered by skilled technicians. Our technicians receive extensive training in all skills to complete their tasks within current health and safety regulations. The culmination of our experience, investment and professional integrity is the delivery of excellence in quality and service – Tyco Fire and Integrated Solutions *Door-Care*.

**Tyco Fire and Integrated Solutions –
always at your service
24 hours a day, 365 days a year**

Our repair technicians operate on a 24hr x 7 basis from fully equipped and stocked vehicles to ensure that your problems are solved as quickly and efficiently as possible, whenever or wherever they occur. No matter who made it, we can repair it and, if it is beyond economic repair, we offer fast track replacement door solutions.

**For problems occurring out of hours,
our help desk number is 0800 585 800**

Excellence through Quality

Our activities are executed under ISO 9001:2000 quality standards, independently audited at all our locations, to ensure that our service is maintained at the highest level, including full compliance with all Health & Safety regulations.

There is no door or barrier that we can't service or install

Servicing a varied range of doors and products in the areas of:

- Access
- Acoustic
- Environmental
- Fire and Smoke
- Loading Bay
- Security
- Signage
-

The continued safe and efficient working of regularly maintained door systems will almost certainly result in many years of use, it could also protect you from prosecution (up to imprisonment) under the growing workplace and Health & Safety regulations.

Tyco Fire and Integrated Solutions *Door-Care* service agreements are designed to assist in the meeting of these regulations whilst ensuring that you are updated regularly with specific notices as applied to the door industry.

Employers must give Fire doors and shutters a higher priority because, by their very nature, they are there to protect life and property. However, it is the responsibility of all employers to protect their employees by ensuring all equipment is suitable for purpose, in good repair and subject to a monitored programme of maintenance.

Specifically, the requirements are as follows:

Provisions and Use of Work Equipment Regulations 1998 – Regulation 6

“Every employer should ensure that work equipment is maintained in an efficient state, in efficient working order and in good repair.”

“Every employer should ensure that where any machinery has a maintenance log, the log is kept up to date.”

Workplace (Health & Safety and Welfare) Regulations 1992 – Regulation 5

“... the equipment devices and systems to which this regulation applies shall be subject to a suitable system of maintenance.”

Tyco Fire and Integrated Solutions Door-Care Agreements

Our *Door-Care* packages are designed to assist in the meeting of these regulations and can be tailored to suit your needs; from simple service inspections to multi-site, multi-product agreements with single point contact. Contract pricing and invoicing can also be arranged to suit your requirements, by site, by area, per month, per visit, etc, in fact whatever you need, we can arrange it.

Fire Precautions (Workplace) Regulations 1997 – Regulation 5

“Where necessary, in order to safeguard the safety of employees in case of fire, the workplace and any equipment and devices provided ... shall be subject to a suitable system of maintenance and be maintained in an efficient state, in efficient working order and in good repair
