

Vertical Tall Cistern with Bracket

Installation instructions

Parts

Parts* required for Vertical Tall Cistern installation:

WC02-003
Tall Cistern 1½”
or
WC02-004
Tall Cistern 2”

WC00-131
Steel cistern
bracket

*not to scale

Step 1

Mark and fix the cistern bracket to the appropriate height using suitable fixings (not supplied).

Step 2

Position the base of the cistern on to the bracket fixed in the previous step, now ensure the flushvalve cable trails downwards **only** and exiting to the left or right (as above).

Step 3

Mark through the 2 outer pre-drilled holes located in the back of the cistern, now secure using suitable fixings (not supplied).
