WATER MANAGEMENT SOLUTIONS

Specialists in WC flushing and Urinal controls for a wide range of domestic and commercial applications

WATER MANAGEMENT

Specialising in water saving technology for commercial washrooms, Dart Valley Systems have been producing leading automatic washrooms for over 30 years. DVS are a market leader in the field of water saving products along with automatic washroom solutions for specialist applications, including, mental healthcare, healthcare, custodial, retail, leisure, educations, airports, public sector markets and more. DVS products have been used reliably in some of the most demanding environments for many years

Dart Valley Systems offer a comprehensive range of Water Management Products including; Taps, WC flushing and Urinal products. Most of our products are WRAS approved and Water Technology List authorised and cater for a range of applications, which can help customers achieve significant water savings.

DVS branded taps, WC flushing and urinal products are guaranteed for 5 years. The range achieves extremely high levels of reliability, value for money, require little or no maintenance and are easy to install.

HANDHELDPROGRAMMER

The DVS handheld programmer has been developed to program the complete range of DVS washroom controls, constantly being upgraded to add more options and features.

The programmer is bi-directional meaning it can also read a sensor, allowing your service team or installer to view the settings before changing.

When reading a sensor it will also supply information such as how many operations, how many purges, run time and serial number etc.

To program a sensor or tap is simple, just point and press.

The programmer allows more flexibility for DVS products, for example, when setting a WC sensor you have the option of wave-on or fully automatic operation with dual flush all from the one sensor, in the past this required three different sensors.

PROGRAMMABLE SENSORS

PROGRAMMABLE SENSORS Programmable sensor settings can be quickly

and easily adjusted using the DVS Handheld Programmer.

The DVS Handheld Programmer and Programmable Sensor combination allows settings on the following DVS products to be adjusted;

- Taps
- Urinals
- Showers
- Baths
- WC's

FEATURES_

- Brushed 316 Stainless Steel 50mm bezel
- Available in Standard (no insert), Red insert & Blue insert versions

AC02-017

AC02-025

AC02-024

HANDHELD PROGRAMMER

The DVS Handheld Programmer allows quick and easy adjustment to many settings across the various options across the Programmable Sensor range.

The following list highlights a selection of settings that can be adjusted via the Handheld Programmer;

- Run Time
- Sensor Range
- Wave-On Only or Wave-On / Wave-Off
- Purge (Default OFF)
- Purge Run Time
- Lock Outs (on or off)
- Lock Out Operations
- Upgradable Software

The above icon is to represent a product being "Programmable"

Where this icon is seen, this means the product settings can be adjusted via the DVS Handheld Programmer.

dartvalley.co.uk | +44 (0) 1803 529021

NO-TOUCH WC FLUSHVALVE

DVS have been manufacturing the WC flushvalve in the UK for over 30 years it is the choice for all high usage toilets with its proven reliability and water saving benefits.

The flushvalve can be set to flush automatically or by wave operation greatly reducing the high risk of cross contamination. Both auto and wave options have dual flush capability although DVS recommend a single 4 litre flush is best.

The DVS flushvalve has been designed to be compatible with most WC cisterns on the market today with no requirement to change the existing plumbing and can be retrofit to existing installations.

Various power options are available mains or battery there is also the option for mains with battery backup.

The flushvalve is compatible with the DVS hand held programmer making it easy to set up and adjust, it can be set to suit every environment, it's also WRAS approved.

WRAS approved 4 litre single flush

Hygienic no-touch

Adjustable settings for optimum flush, purge, lock-outs and more

Typical 30% savings on water costs

and Auto modes

DVS branded products

WC FLUSHING SYSTEM

A recent survey has shown that the most contaminated part of a washroom is the WC flush handle. By utilising DVS's WC No-Touch flushing system, there are no flush handles required. This then significantly reduces the risk of cross-infection in the most contaminated area of the washroom.

The easy to use no-touch WC flushing system is triggered by an electronic infrared sensor which is activated when the user's hand comes within the set sensor range.

WC Flushvalves are fitted in a wide variety of commercial and public buildings, and have proven to be a tried and tested solution, unchallenged in performance and reliability, offering a robust vandal proof solution.

FEATURES

- WRAS approved 4 litre single flush
- Average 30% savings on water costs
- Hygienic No-Touch operation (other options available)
- Adjustable settings for optimum flush, lock-outs, purge facility and more
- Easy to maintain

WC FLUSHVALVE KIT (MAINS)

A simple wave of the hand past the DVS sensor activates the electronic flushvalve via the WC Flushvalve Control System, in return delivering the optimum flush.

The control box enables adjustment of flush duration, auto purge facility and lock-out option for high security applications.

FEATURES

- Hygienic no-touch sensor or tactile switch operation
- Adjustable for optimum flush time
- WC Flushvalve has a WRAS approved 4 litre single flush
- Available with 1 ½" and 2" base options

WC03-003

WC FLUSHVALVE KIT (BATTERY)

The DVS Battery WC Flushvalve Control System has a typical battery life allowing up to 10,000 WC flush operations.

The system activates the DVS Flushvalve upon operation of a DVS sensor, accurately delivering the optimum flush, thanks to the easily adjustable time settings.

FEATURES_

- Hygenic no-touch sensor or tactile switch operation
- Adjustable flush time settings (0.5 6.5 seconds)
- WC Flushvalve has a WRAS approved 4 litre single flush
- Available with 1 ½" and 2" base options
- Other settings include; 24 Hour purge, lock-out and more

WC03-051

WC FLUSHVALVE KIT + INTELLIGENT CHARGER

FEATURES

- Intelligent Battery Charger can be used to provide back-up power
- Available with 1 ½" and 2" base options
- Hygenic no-touch operation via Standard or Programmable sensor.
- Also available in tactile switch operation

All control boxes are available separately, see our website for our full range at www.dartvalley.co.uk or alternatively contact us on +44 (0) 1803 529021 Or email us at sales@dartvalley.co.uk

WC03-073

dartvalley.co.uk | +44 (0) 1803 529021 Water Management Solutions

DUAL & MANUAL FLUSHING

MANUAL OVERRIDE PLATE

The manual override flush plate incorporates a wave-on sensor and a backup manual override push button - ensuring flushing operation is not disrupted in the event of a power failure.

With slimline and robust stainless steel design, this is well suited to a range of applications.

- Brushed 316 Stainless Steel
- No-touch wave-on sensor operation
- Backup manual flush operation in case of power failure
- Easy to install and maintain

WC00-006

DUAL FLUSH PLATE

The dual flush plate offers the option of dual flushing for WCs with 2 tactile switches with stainless steel bezels, one for a half flush and 1 for a full flush

With a slimline and robust Stainless Steel design, this is well suited to a range of applications.

- Brushed 316 Stainless Steel
- Simple tactile operation Average 30% water savings
- Half and Full Flush indicators
- Easy to install and maintain

WC00-097

SAVE ON WATER...

INSTALL DVS FLUSH CONTROLS AND BENEFIT FROM AN AVERAGE WATER SAVING OF 30%

WC CISTERN KITS

TALL CISTERN

Concealed tall plastic cisterns, 6L volume, with secure fitting lid, available as stand alone or complete kit. Easy to install and comes in standard 1½" or 2" versions.

The tall cistern is ideal for where confined or limited space is available.

KIT_

- WRAS approved side entry filling valve
- Optional BREEAM delayed action side entry valve also available
- 1½" or 2" options available
- Kit contents; cistern, inlet valve, flushpipe and fitting for back of pan

WC02-014

STANDARD CISTERN

Concealed standard plastic cisterns, 6L volume, with secure fitting lid, available as stand alone or complete kit. Easy to install and comes in standard 1½" or 2" versions.

WC02-002

KIT_

- WRAS approved side entry filling valve
- Optional BREEAM delayed action side entry valve also available
- 1½" or 2" options available
- Kit contents; cistern, inlet valve, flushpipe and fitting for back of pan

WC02-012

AVAILABLE IN A RANGE OF SIZES AND FEATURING INDUSTRY STANDARD FITTINGS, DVS CISTERN KITS CATER FOR VARIOUS APPLICATIONS.

URINALCONTROLS

2 STATION URINAL CONTROL SYSTEM

The Urinal Control System controls flushing for single or double station urinals.

When the DVS sensor detects the user, a pre-flush option can be set to prevent splashing in the bowl, followed by a final flush when the user walks away, ensuring high levels of hygiene are maintained.

The control box enables adjustment of the flush timer, auto pre-flush and purge on/off facility.

- Single or double station flushing
- Adjustable flush timer, pre-flush and purge facility on/off
- Significant water savings save on average 65%

11007.00

PROGRAMMABLE SENSOR

The DVS Programmable sensor enables quick and easy adjustment of settings via the DVS Handheld Programmer with no control box required.

- Adjustable settings; flush time, sensor range, purge, anti-vandal and more
- Upload real time data to PC via USB
- For Handheld Programmer see page 3

AC02-023

STANDARD SENSOR

With accurate and reliable performance, the standard urinal sensor has various adjustable settings via the Urinal Control System box.

- 50mm Stainless Steel or Chrome bezel available
- Active I.R. sensor detection
- Complete with 3 metre cable

UC07-008

LIC07-009

3 DVS FLUSHMATIC URINAL CONTROLS CAN SAVE ENOUGH WATER TO FILL AN OLYMPIC SIZED POOL
IN JUST ONE YEAR

FLUSHMATIC & PEARL DOWNLIGHTER

The Flushmatic, Pearl and Pearl Solo Downlighters are suspended ceiling urinal controls for multiple station urinals. The Pearl unit is smaller in diameter.

Using a passive infrared sensor (PIR), this detects movement within the sensing area, switching the unit into a timing mode. After the pre-set time the solenoid valve opens, allowing water to flow into the cistern and activating the flushing cycle.

FLUSHMATIC SURFACE MOUNT

The standard Flushmatic is a wall or ceiling mounted urinal control for multiple station urinals.

The fill-time for the cistern can be customised using the switches on the Flushmatic board. There is also a set of dip switches to adjust the time delay after activating the PIR. The system's fast-fill design helps eliminate scale problems associated with slow or drip fed systems.

An automatic janitorial flush every 12 hours is also programmed in to the unit, catering for periods of non-use. Up to 80% savings on water costs can be achieved. Either mains or battery versions are available to suit varying site requirements.

- Adjustable settings; cistern fill/flush and flush delay time (to prevent misuse and save water)
- Enclosed reset button
- Ceiling or wall mountable
- Available in grey or white ABS
- Available in mains or battery version
- Battery low indicator (optional extra)

UC01-001

UC01-009

PEARL & PEARL SOLO

- White ABS housing with Occupancy detection LED
- Available in mains or battery version (Solo - mains only)
- Pearl Solo is ideal for single station urinal installations
- Valve closed before battery failure (indicated by LED flashing green)

FLUSHMATIC DOWNLIGHTER

- Adjustable settings; cistern fill/flush and flush delay time (to prevent misuse and save water
- Enclosed reset button
- White ABS housing
- Available in mains or battery version

URINAL SLEEVES & TIMED URINAL CONTROL

URINAL SLEEVES

The DVS Urinal Sleeve helps to prevent urinal odours. After the initial Urinal Sleeve outlet is installed, the replacement sleeve simply drops into place.

Housed within the sleeves head is a cleaner deodoriser block. This reduces odour and scale in the outlet whilst helping to prevent blockages.

The teardrop drainage holes on the head allow urine to pass on to the active ingredient which then circulates the deodoriser down the sleeve and in to the trap.

FEATURES_

- Leaks & Stains are reduced by the sleeve lower body lining waste outlet & trap. (Quarterly replacement is recommended)
- Reduced Bio-Film build up
- Simple installation & Refill exchange
- Bio or Chemi Urinal Kits & Refills available

TIMED URINAL CONTROL SYSTEM

For more demanding high traffic environments, periodic flushing of the urinals with clean water may be required.

The DVS Timed Urinal Control System is the ideal solution, ensuring reliable consistent timed urinal flushing, helping to keep surfaces clean as well as reactivating the cleaner deodoriser block inside the urinal sleeve.

This Programmable control system that can be customised to achieve the optimum number of flushes.

FEATURES_

- Periodic Urinal flushing (Customisable timing)
- Assists hygiene maintenance, odour reduction & Blockage free pipework
- Available in mains & battery versions
- Kit includes Control System & Solenoid Valve
- Integral non-return valves prevent backflow

NON-ELECTRONIC WATER MANAGEMENT

IN-LINE FLOW RESTRICTORS

The DVS range of in-line restrictors reduce water usage and save money.

Suitable for showers and taps, these easy to install devices come in a range of flow rate options from 3 - 8LPM.

FEATURES_

- Easy installation
- Available in; 3, 3.5, 4, 5, 6 & 8LPM
- Pressure compensating
- Quick payback period

INLINE SHOWER HEAD FLOW REDUCER SH00-020

BREEAM VALVE

The BREEAM compliant and WRAS approved eco-fill side entry filling valve is an easy to install, water saving product.

It also benefits from an adjustable height and Anti-Siphon design.

FEATURES

- Delayed action fill save up to 1 litre per flush
- Includes removable pressure / flow rate restrictors
- Quick payback period

BREEAM®

RESTRICTAFLOW

Restrictaflow offers savings of approximately 40%. Meaning that payback for this product will be achieved in as little as weeks.

The Restrictaflow can also be used as an isolation valve to further enhance cost savings.

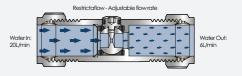

If a blockage ever occurs, the valve can easily be cleared by rotating the valve 360°

FEATURES_

- 15mm connections (suitable for urinal, shower & tap systems)
- Chrome plated brass body

AC17-039

OVERFLOW DETECTIONSYSTEM

OVERFLOW DETECTION SYSTEM

The Overflow Detection System is designed specifically for companies with large numbers of WC's on site or anywhere that water is stored in tanks or troughs.

Capable of monitoring up to 20 cubicles, the unit is usually sited remotely in the cleaners cupboard at the end of a toilet block for example, ensuring a discreet and tamper free system.

Staff can easily monitor the cisterns individually via the digital screen which indicates if a cistern is overflowing.

A second indicator can be installed remotely away from the control box allowing for a quicker detection time, the indicator will continue to flash until the overflow fault is rectified.

FEATURES_

- Immediately identifies overflowing cisterns in up to 20 cubicles
- Works in conjunction with the DVS overflow warning light plate
- Achieve significant water savings quick payback
- Easy to install and maintain
- Available in single station upon request

AC07-001

AC07-004

WATER ISOLATION SYSTEM

WATER ISOLATION SYSTEM

The DVS Water Isolation System is designed to shut off the water supply to washroom facilities when they are not occupied, preventing water wastage and possible damage from overflows.

This product is available as a kit with one or two solenoid valves for hot and cold water isolation and is offered in either battery or mains operated systems.

The Water Isolation System works by fitting the sensor above the entrance of a washroom facility. The sensor has a detection range of up to 6m.

If the washroom is empty, the system will shut off the water supply, preventing wastage from leaks and overflows, therefore avoiding the possibility of unforeseen flood damage, saving on water consumption.

FEATURES_

- Automatically shuts off water supply during non-use
- Achieve significant water savings
- Remote sensor option available Dual Sensor
- Available in; Control Box Only & 1 or 2 valve kit options (see product list)

DVS NO-TOUCH TAPS

The DVS range of automatic taps have evolved over 30 years into what we feel are the most adaptable range on the market with taps or spouts for all applications including Healthcare, education, retail and food sectors.

The DVS tap and sensor range can be controlled using the DVS hand held programmer, flow time, range and purge options can all be turned on or off or adjusted allowing for greater flexibility in all areas.

The taps can be programmed to auto purge if they are not used, this is a proven way to help prevent biofilm build up. All taps are available as mains or battery operated.

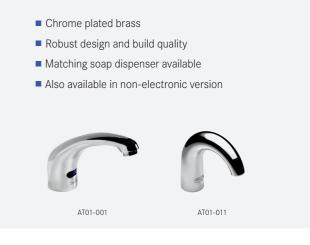

A32 & A45 ■ 316 Stainless Steel (Brushed or Polished) Robust design and build quality Suitable for a wide range of applications Also available in non-electronic version ■ Matching soap dispenser available (see website for details) AT03-003 AT03-023

ANTI-MICROBIAL OUTLET

Helps reduce harmful bacterias (including Pseudomonas, Legionella MRSA, E.Coli and Salmonella) by up to 99.9%

THERMOSTATIC MIXING VALVE 4-IN-1

SELF CLOSING TAPS

A popular product for high traffic washrooms, push taps offer great value for money, robustness, reliability and short payback periods.

DVS offer a range of self-closing, manually operated taps that are suited to all industrial and public washroom applications.

The range includes both deck and wall mounted options.

F5 SINGLE-LEVER PILLAR MIXER

- Single lever pillar mixer tap with ceramic disc technology cartridge
- Outlet height; 65mm
- Thermostatic protection from scalding

WASHROOM CONTROLS

MULTI-CHANNEL WASHROOM CONTROL SYSTEM

The DVS Multi-Channel Control System is suitable for controlling the following products via our Standard Sensor;

- WC Flushing
- No-Touch Taps
- Showers & Bath Controls
- Can be fully programmed using the DVS handheld programmer (see pages 3)

The control box has been designed to meet the requirements for safe ensuite applications and the modern day washroom. We have also designed the control box to allow for simple installation with an easy access removable wiring platform, a fully hinged front cover allows full access to the sensor and valve plugs.

VR07-020

DVS POWER PACK

The DVS Power Pack is designed to provide power in the most demanding of environments, even those which are prone to power outages.

The system features an on-board Intelligent Charger keeps the battery at an optimum charge level.

In the event of a power out, the battery will continue to supply power for up to 10 days depending on load.

Compatible with the DVS range of taps, programmable sensors and Low Voltage Flushvalve Controls.

Can power up to 5 products in series from one unit

See programmable sensors on page 3 for compatible sensor options

WC00-155

SENSORS / SWITCHES

Ligature resistant Wave-on Sensors or Tactile Switches with hot or cold indication inserts are available for controlling showers and taps, either as part of DVS Control Systems or for use with Shower Towers. (See page 3 for Programmable Sensors)

WAVE-ON SENSOR 50MM (COLD) AC02-040

DVSTHERMAL DISINFECTION VALVE

DVS THERMAL DISINFECTION VALVE (TDV)

The DVS TDV valve has been designed to eliminate biofilm, reducing the risk of waterborne pathogens.

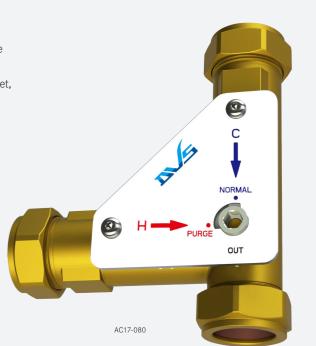

This valve allows Thermal Disinfection from the TMV through to the outlet, (1x TDV valve required per TMV)

This valve is suitable for any washroom equipment fitted with a TMV which requires thermal disinfection, this includes;

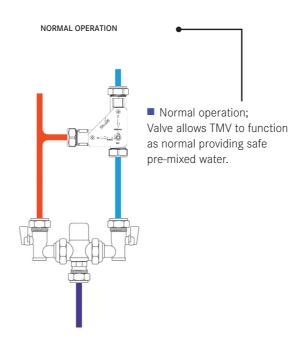

- Taps
- Shower Heads
- All other washroom equipment fitted with a TMV

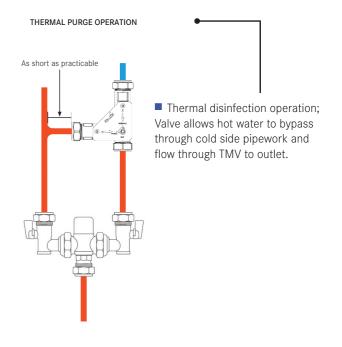

FEATURES_

- DZR brass body
- Simple, single quarter turn operation
- Suitable for 22mm & 15mm pipework
- Compliant with water regulations and by-laws
- Integral non-return valves prevent backflow

OPERATION SCHEMATIC (PRE TMV)

BAA-TERMINAL 5

BAA has set high standards for the washrooms at all their airports. Add to this the expectations of the UK's most prestigious building project, the design team for Heathrow Terminal 5 washrooms were tasked with achieving the optimum in sustainability, serviceability and aesthetics. Whilst DVS products have been used extensively throughout BAA airports for 25 years, the Terminal 5 design team wanted to ensure the products selected met all the criteria for the project and carefully investigated all options.

After a thorough review of washroom products from leading suppliers the washroom design team nominated DVS as the preferred supplier. There was a high level of confidence in the reliability of DVS products and the service support, which had been experienced over the past 25 years.

This was firmly confirmed by the BAA Engineering Leader on the team. DVS has built a reputation for flexibility and responding

AQUA 3000 OPEN FRANKE WATER MANAGEMENT SYSTEM

SUSTAINABLE

A flexible, expandable and thus future proof system that can be integrated into the computer aided facility management system.

ECONOMICAL

The efficient and demand-optimised use of resources (water, energy, time) makes the sanitary system a profitable investment.

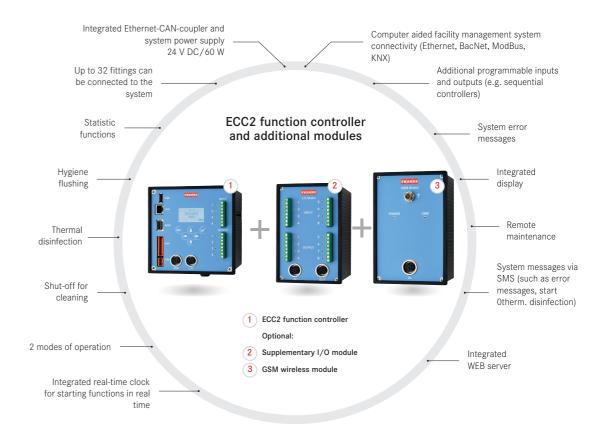

HYGIENIC

Regular hygiene flushing and thermal disinfection programs guarantee high quality drinking water.

The AQUA 3000 open water management system presents installers and operators with an easily installed, reliable, functional, hygienic and economical system which is even easier to integrate into host networks.

A sophisticated, complete water management system that facilitates economical operation of all connected components. The system can be individually programmed and expanded as required.
