

Technical Data

Wall lining

Composition and manufacture

Aalco's sheet products are produced from stainless steel, aluminium, brass, bronze and copper.

Appearance

Stainless steel is supplied with a variety of polished finishes, from satin to mirror, as well as the non-directional, wet cut, OPTISHEEN. It is also supplied with textured, embossed and/or coloured finishes.

Aluminium sheet is available in a variety of finishes. Plain sheet can be polished, anodised or colour anodised. There is a wide range of embossed and patterned products offering an interesting selection of effects.

Copper, bronze and brass sheets provide warm colours in plain or polished finishes, which can be lacquered to maintain their appearance.
