# Stainless Steel Wire Mesh

# aalco

Aalco's stock of 304 stainless steel welded wire mesh panels is shown in the table opposite.

Welded mesh is manufactured by laying cross wires at 90 degrees to the longitudinal wires and resistance welding at every intersection. This produces a strong and rigid panel that provides a cost-effective solution for many applications throughout industry.

Customers in the Chemical & Petrochemical, Health Care, Food & Beverage, Oil & Gas, Pollution Control, Electronics and Construction industries have welcomed this addition to the Aalco range.

Aalco's stock range of standard panels has been found to cover most requirements. In addition, Aalco can supply other sizes to order, including:

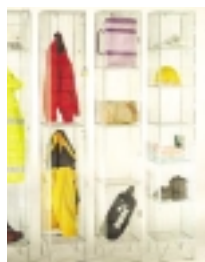

- Rolls
- Wire diameters up to 1/2"
- Other grades of stainless steel.

For applications requiring extreme cleanliness Aalco can arrange Electropolishing.

Aalco, the UK's largest independent multi-metals stockholder, offers a complete range of semi-finished products in stainless steel, aluminium,

copper, brass, bronze and nickel alloys. The 10,000 item standard stock range is supported by extensive processing facilities as well as bespoke items for particular industries and individual customers.
