Landscaping

Charcon Infilta permeable

A hard wearing concrete block paving product used to form a permeable hard landscaped surface within a Sustainable Drainage System (SUDS). Each interlocking unit incorporates a specially designed 5mm spacer nib to allow the ingress of surface water through to the subbase water storage system below.

- Permeable surfacing and source control SUDS technique
- Colour mix and texture options to provide high quality, aesthetic and functional schemes
- Can be easily lifted for access to services and reinstated without leaving the usual repair scars
- Offers high levels of durability and good grip
- Can be used as part of a SUDS in conjunction with Charcon Permavoid™ or DrainAgg Granular Subbase to offer water storage at shallow construction depths
- Used in conjunction with Charcon Permafilter Geotextile, Infilta CBPP can enhance water quality and eliminate the need for end of line petrol/ oil interceptors.

and car parking facilities. Refer to technical services for advice on specific applications - tel: 01335 372222.

Manufacturing standard

Infilta permeable concrete block paving is compliant to European Standard BS EN 1338.

All aggregate Industries products are manufactured in accordance with ISO 9001 with factory compliance to ISO 14001.

Performance

Strength: The products are manufactured to meet the strength requirements of BS EN 1338.

Slip and skid resistance: Concrete block permeable paving has satisfactory slip/skid resistance in accordance with manufacturing standard BS EN 1338.

Complementary products

Aggregate Industries SUDS range along with block paving, flag paving and kerb, aggregate, asphalt and ready mixed concrete.

Sustainability and local sourcing

Energy use: Aggregate Industries is at the forefront of sustainability and has committed to reduce carbon emissions by 20% by 2016 based on a 2012 base line.

Recyclable: 100% of the product can be recycled thus reducing the amount of material that is sent to landfill.

Manufacturing location: Produced in the UK, with locally sourced materials under strict environmental and social legislation, for local supply.

Responsible sourcing: Aggregate Industries is the first company in the world to achieve accreditation to the BES 6001 Framework Standard for the Responsible Sourcing of Construction Products. Aggregate Industries has achieved an 'Very Good' rating for major product groups. The BES 6001 standard assesses:

- quality management
- environmental management
- health and safety management
- a range of social and environmental issues.

Life

Life is our range of sustainable products and services. For more information please visit www.aggregate.com/life

Key aggregates and recycled content

Infilta permeable block paving is manufactured using high quality aggregates. Please refer to technical services for individual material content for each Infilta option.

Generic green guide rating*

Concrete block pavers, CBP (80mm) over prepared recycled sub-base - **A rated.**

Concrete block pavers, CBP (80mm) over prepared sub-base - **B rated.**

Policies
